Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the

well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī al-Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. This is Site G in Macdonald, Al-Muʾazzin & Nehmé 1996.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By Whb son of ʾs¹wd was here

Provenance:
al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

ISB 95

l {ʾ}{s¹}{d} {b}{n} {ṣ}{f} bn bġnmh mlk brkt

By {ʾs¹d} {son of} {Ṣf} son of Bġnmh owner of Brkt

Apparatus Criticus:
ISB 95: reads 95 and 95.1 as one text *l {ʾs¹d} bn ṣm{ʿ}n w ġnm h- mlk brktn b- db* and translates the narrative as "and the king raided two pools at DB"

Commentary:
The first seven letters have been hammered over and the 7th appears to be an enormous *f*. The text then runs at right angles to the beginning for the next four letters in which the two examples of *b* are at right angles to the direction of the text and upside-down in relation to each other. Both features are not uncommon. The text then turns again at right angles to run below the beginning. The *bġnmh* has not been found before but is of a form well-known in Safaitic in which a common name is placed between *b* and *h* to form a new name. The last two words of the text are clear on the photograph but difficult to interpret. *Brkt* is the name of a place of semi-permanent water, apparently in the area where the *ḥarrah* meets the *ḥamād* to judge from the distribution of the texts which mention it, and could be modern Burquʿ (see Macdonald 1992: 27–30). It seems unlikely that someone would declare himself "king of Brkt" in a graffito like this and so we have suggested translating *mlk* as "owner", though in what sense he could claim to be the "owner" of a watering place is difficult to imagine. So this interpretation is proposed very tentatively.

l ʿmdn bn s¹ʿd bn drs¹ w dṯ̱ʾ ḥrt ḫfg

By ʿmdn son of S¹ʿd son of Drs¹ and he spent the season of the later rains in the ḥrt [pasturing on] ḫfg

Apparatus Criticus:
ISB: dṯ̱ʾ ḥrt ḫfg "he spent the spring in the region of basalt rocks. And the camels' knees trembled (?)"
Beeston (review of ISB, JRAS 1970: 220): ḫfg is probably the name of the particular ḥarrah

Commentary:
Ḫfg occurs here and in WH 171 and KRS 1836. A member of the Ahl al-Jabal, who inhabit the ḥarrah of southern Syria and north-eastern Jordan, identified a plant of the ḥarrah shown him by Geraldine King as ḫafağ. Dr Sue Colledge later identified it from a photograph as Diplotaxis Harra. Dṯ̱ʾ ḥrt ḫfg is presumably an elliptical expression meaning "he spent the season of the lesser rains in the ḥarrah [pasturing on] ḫfg"

Commentary:
The first name is written in square letters. The final letter of the first name clearly has hooks and must be a r. Jamme reads the following bn as a g despite the fact that it is open to the left. There is no sign of the letter he reads as b before ġdw. The ḍ is of the concentric circle form more common in Thamudic E than in Safaitic. Most of the inscription is very heavily abraded. The end curves round to meet a short text running in the opposite direction which has been read as JaS 22.1. The form of the ḍ two concentric circles in the last name of JaS 22 is similar to that in 22.1.

Apparatus Criticus:
JaS: ġhmn (or khmn or zhmn) for khmn f s^{1}ḫl f dyt "and he got hold of the ransom" for fhḫl{f}dyt

Commentary:
The k of khmn is not certain . The letters fh after Khmn sugest the beginning of an invocation. However the letters which follow on Jamme's copy produce little sense and in the absence of a photograph it seems safer

to leave them uninterpreted. Jamme's reading of the ḫ as a s^1 is untenable.

Apparatus Criticus:
JaS: l ʿqrn bn lmw [w wg]m ʿl ṣhr -h wʿl b -h hṯfr "[and he has mour]ned upon his kinsman and upon his father. he was a saddle maker.

Commentary:
The third letter looks more like a y than a q on the copy. The following two letters would then be the bn. It is just possible that the second name is a badly copied hṯfr though this can be no more than a suggestion. Ar. ṣihr is not simply a "kinsman" as suggested by Jamme but the kin of one's wife or husband. Jamme's interpretation of the final word is unconvincing.

l nʿr bn zʿ()m

By Nʿr son of {zʿm}

Apparatus Criticus:
JaS: zʿnm for zʿ( )m.

Commentary:
The fourth letter from the end has a very short vertical stroke and resembles a Thamudic E ẕ. The copy has a dot between the second ʿ and the m but the name read by JaS is unlikely. It is possible that the text continues after the break and the name should be read zʿn and the m taken as the first letter of the following word. It is perhaps most likely however that the dot is the copyist's error or extraneous to the reading of the text which is what has been suggested here.

By Ms¹k son of Nṣr'l son of Grm'l of the lineage of Ḍf {n}f ---- l{t} S¹{k}{n} spoil for who leaves [this writng alone] and the evil eye for who erases [this] and he wrote [it]

Apparatus Criticus:
JaS 35: w gl s¹nf for w gls¹ nf "And he has gathered pods". JaS 36: l ts¹kn ġnmt l ḏ dʿy w nq't l ḏ yʿwr < > ḫṭṭ " By Ts¹kn. Booty to him who makes [this writing] his own and rejection for him who would erase [this] writing.

Commentary:
It is most likely that JaS 35 and JaS 36 are one text. The n of {n}f has been turned 90° and is written slightly to one side of the line of the text. The copyist has given no indication as to whether the stone is broken after the f and so it is not possible to tell whether there are letters missing between it and the following l. The first t is rather large and the crossbar is not facing in the direction of the text. The k is a slightly unusual shape and the following n is larger than the other n's of the text. JaS has restored h for w before the word ḫṭṭ. Whilst this produces a better attested formula there is no justification for doing so from the copy.

Commentary:

he has spent the spring [here] and gone over to ʾḫw and to Ts^{1}lm".

Commentary:
See JaS 43.1 for the reason this is read as a separate text. It seems likely that the copyist has left out letters at the begining. JaS suggests that the inscriber drew the stroke of the d of dṯʾ and then noticed that he had forgotten to write a w and so inscribed it partly over the stroke. The second letter of ts^{2}wq has a kink and then a short line which runs into the crossbar of the q of the same word which is written below it. The w has been copied as a q.

Commentary:

The reading of the first name in JaS is speculative as only a short line and a line with a circle remains. The latter might be the remains of a y ṯ or ṣ. It is most likely that the third letter of the name after bn is an s^2. JaS reads the letters after the break from right to left but it seems more likely given the amount of space that they should be read from left to right as a continuation of the existing line. After the gap in the copy the fork of a letter remains above the break which might be the remains of an ʾ as read by JaS or a h or a ṣ. There is not enough of the letter after the w remaining to read an s^1 as in JaS.

Commentary:
There is a good photograph of JaS65.1-65.4 in ThNSSMAS. After the ḏ there are traces of an ʾ and l and then it seems most likely that the inscription continues in a curve and ends in the letters which have been read as JaS 65.4 although the rock is very damaged and the letters uncertain. There might be a m as suggested by JaS and then there appears to be an ʿ w and ʾ. The w is read as a g in JaS 65.3 and it is possible there is a n before the letter although it seems rather close and could be incidental. Between the ʾ and ʿ the letters are illegible. The last four letters are read by the editions as a separate text see JaS 65.4. The third letter from the end seems to be relatively large and should probably be read as a g.

JaS: "By Qn. s²ʿṯm son of Qn’ was made chief".

----ġt son of Ḫdʿt {and} {he longed} {for} ʾlt

Apparatus Criticus:
JaS: read as the continuation of JaS 71.3. See JaS 71.3.

Commentary:
JaS reads this and JaS 71.3 as one text. However the name s²tyġt as read by JaS in 71.3 is difficult to explain and since the ġ is written slightly above the y it seems more likely that the letters from the ġ onwards are part of a separate text in which the preceding letters have not been drawn on the copy or a continuation of JaS 71.2 with letters missing from the copy. The s² is doubtful and it is possible that it should be read as a f as in JaS. The ʾ of the preposition ʾl has been written slightly above the q and the l has been left out altogether.

Commentary:
This text and JaS 82.2 are written on a fragment of a dish described by JaS as being of brownish limestone. This text is written on the outside of the rim. The fragment is broken before the first r and parts of all the letters after the ḏ are missing. The first letter of the lineal name could be either an ’ as read above or a h or a ḫ.

Apparatus Criticus:
JaS: l yqz w ḫtw bḍḥ hlh hf " By Yqz. And he was grieved at the appearance - O Lh - of Hff"

Commentary:
The text is written on the outside of the bottom of the same dish as JaS 82.1. It is difficult from the copy to be sure how the text reads or whether the letters belong to only one text. The copy of the letter after the first l is doubtful it is most unlikely to be a y as read by JaS but could be an incomplete w. JaS continues reading the text after the z with the w near the break in the opposite direction to that in which they are read above and then reads the last group of letters from top to bottom in the copy regardless of the fact that the r ḥ l and f all face in the opposite direction. If the letters are all to be read as one text it is much more likely that the part of the text missing at the break curves round and continues with the f and following letters.

[----]yr bn b{ḍ}m w ḏbḥ f ds²r s¹lm

----yr son of {Bḍm} and he sacrificed and so Ds²r [grant] security

Apparatus Criticus:
JaS: read with JaS 101.1: l hbtyr bn bḍm w ḏbḥ f ds²r s¹lm.

Commentary:
See JaS 101.1. The position of the letters of this text suggest that it should be read separately. It is possible that the rock is broken before the y or the beginning is written on another face. The second letter of the second name might be an ʿ rather than a ḍ. The b of ḏbḥ is written in the opposite direction to the rest of the text.

Provenance:

JaS 118.1

[----]rt bn ḥ{r}m bn ml{k} bn gfft w----ḫlf----

----rt son of {Ḥrm} son of {Mlk} son of Gfft w----ḫlf----

Apparatus Criticus:
JaS: reads JaS 118.1 and 118.2 as one text; [----]drt bn ḥrm bn mlk bn gfft w ḫlf f bny ʿl qnnt w ʿl rfz w ʿl mṣrlt w ʿl ḍrm w ʿl ʿdm w ʿl ġnm w wgm ʿl ws^{2}kt; translated from w ḫlf as "And progeny. And he has built upon Qnnt and on Rfz and on Mṣrlt and on Ḍrm and on ʿḍm and on Ġnm and he mourned over Ws^{2}kt.

Commentary:
The rock is broken after the first w and it seems likely there are some letters missing between it and the ḫ of ḫlf. The reading of f bny in JaS is very doubtful. The sign read as f is incised unlike the other letters on the rock which are chiselled and it is inscribed horizontally slightly above the line of the other letters. It is probably extraneous. There are then two hammer marks a chip and possibly a circle. Unfortunately the next part of the rock where JaS reads qnnt is covered by the scale in the photograph and cannot be checked. The remaining letters are smaller and it is most likely they are a separate text. See JaS 118.2.

--- {and} {he grieved} for Ws²kt and {for} {M----z} {and} {for} {M}---- and for {Wrm} and for {ʿḍm} ----

Apparatus Criticus:
JaS: the text is read as the continuation of JaS 118.1 see under JaS 118.1.

Commentary:
JaS reads this with 118.1 but the difference in the size of the letters and the uncertainty of JaS's reading of the letters after ḫlf in 118.1 makes it more likely that there are two separate texts. The above reading starts from the upper left hand part of the rock. The l ġ n and m as read by JaS are not visible in the slide but if the interpretation adopted here is correct then the beginning of the text would be covered by the abrasions. The last part of the text which is written on the same area of the rock is also illegible in the photograph. It is possible that the first letter of the fourth name is a circle with a dot but there seems to be a line a across the middle. The reading of the second letter of the fifth name is very uncertain. It might be a circle with a dot or simply a circle which would be read g.

l ʾns¹ bn ----w b{n} {s¹}{n}{k}{d}

By ʾns[1] son of ----w {son of} {s[1]nkd}

Apparatus Criticus:
JaS: l ʾns[1] bn ywbġ bn kd

Commentary:
The copy is extremely doubtful. The letter after the first bn might be a y but it has a curve which would be unusual. The letter read as ġ by JaS is lying on its side and is more likely to a n and the tail of a s[1] which have been joined together. The letter read as k is similarly to Thamudic E ġ as it has a tail. The spine of the d curves backwards at the ends and the loop of the letter is not completely joined. Next to the text there is a copy of shapes which might be joined letters and it is possible that the strange shape of some of the lettrs in the text is because some of the letters are joined and the copyist did not recognise this.

Apparatus Criticus:
JaS: mġb for m{b}; y for {y}; dkl for d{k}l. Translation of ṣdʾn "the two being slender in body".

Commentary:
The b of the second name has a further curve attached to it which makes the reading doubtful. The m of wgm is facing in the opposite direction to the rest of the text. The copy of the y is somewhat doubtful and the k has only a very short tail.

Apparatus Criticus:
JaS: w nds² f s¹lm "and he carded cotton [here] and was safe".

Commentary:
There is quite a large gap between the second bn and the name ʾlhnʾ. The seventh letter from the end in the copy is a n and the fourth letter from the end is a f but it seems more likely that they are a mistake of the copyist. l lḥnn bn {ʿ}kr bn wḥy ḏ- ʾl {h}k

By Lḥnn son of {ʿkr} son of Wḥy of the lineage of {Hk}

Apparatus Criticus:
JaS: gkr for {ʿ}kr; sk for {h}k.

Commentary:
The first letter of the second name is proportionately rather large for an ʿ. The first letter of the lineal name is an unusual shape. One of the lines of the fork is longer than the other and the line from the fork has a slight curve.

Provenance:

By Nẓrʾl son of ʿdy son of Ḥddn son of Nẓrʾl w qṣṣ ʿl- ʿm{m} w {r}yḥ w lt w ʿqrb and he spent the season of the late rains f ʿs^{1}s^{1}

Apparatus Criticus:
JaS: ʿmg for ʿm{m}; ryḥ for {r}yḥ. Translated from w qṣṣ as "And he was narrator to ʿmg and ryḥ and lt and ʿqrb and he has spent the spring [here] and gone to and fro".

Commentary:
The second d of the third name has a line going through the loop of the letter. The ṣ's of qṣṣ do not have a central line. The r of of the word {r}yḥ is facing in the opposite direction to the other letters of the text.

l ʾs^{1}d bn mṣbḥ bn ʿ{h}d w dṯʾ s^{1}nt ws^{1}q ṣ

By ʾs^{1}d son of mṣbḥ son of {ʿhd} and he spent the season of the later rains the year ws^{1}q ṣ

Apparatus Criticus:
JaS: l ʾs^{1}d bn mṣbḥ bn ʿhd w dṯʾ s^{1}nt ws^{1}q ḫyṣ rḍḫ w ld ʿyl; translation from w dṯʾ "And he has spent the spring [here] the year he has gathered a small quantity of crushed datestones and ʿyl has rebelled".

Commentary:
The letters ḫy read by JaS after ws^{1}q are written to the left of the s^1 of ws^{1}q and it is unlikely that they belong to this inscription unless several letters are missing from the copy see JaS 171.3. Similarly the letters rḍḫ w ld ʿyl read by JaS are inscribed at right angles to the w and q of ws^{1}q and are either a continuation of this text with several of the letters missing from the copy or the letters of part of another inscription see JaS171.4. The second ṣ is written directly after ws^{1}q and the text is either unfinished or the copy is not complete.

Provenance:

l ṣḫrn bn s^1{h}y bn ḥgrn (----) w mʿyb w ts^{2}w(q)

By Ṣḫrn son of {s^{1}hy} son of Ḥgrn ---- w mʿyb and {he was filled with longing}

Apparatus Criticus:
JaS: s^{1}hy for s^1{h}y; w s^{2}tw b yʿmw "And he has spent the winter at Yʿmw". JMAA XIV p. 195: where JaL 175 is a misprint for JaS 175. Comments on the place name being written in larger letters than the rest of the text.

Commentary:
It is possible the second letter of the second name is a k. The last part is read in the opposite direction to that read by JaS which seems the most likely interpretation given the position of the letters. There is quite a large gap between the end of the third name and the w which suggests that some letters are missing from

the copy or that possibly w mʿyb w ts²w(q) belong to another text the beginning of which has not been copied. The letters w mʿy are drawn in the copy with a double outline suggesting that they are inscribed in a different technique to the other letters of the text.

Apparatus Criticus:
JaS: l dln bn ṣtm w wgm ʿl ts^{1}ġ.

Commentary:
The first name is written above the following bn and the beginning of the next name. There is then a gap in the copy followed by a letter which might be a g or a m. Apparatus Criticus:
JaS: ġddt for {s^{2}}ddt; mmkl for mm{k}l; ḫly for ḫ----.

Commentary:
The stone is broken into two pieces. It is perhaps most likely that the second letter should be read as s^{2} see the other examples of this form of the letter in this collection. The k in the second name after the second occurrence of wgm is a different shape to the other k in the text and is facing in the opposite direction to the rest of the letters. JaS: l gs²[m bn -----]gb bn ʿbṯn [w wgm ʿl ----] for l gs²[----]gb bn ʿbṯn [----]; llʿz for {l}{l}ʿz.

Commentary:
There is a misprint in JaS ' transliteration and in the translation. The w of wgm has been left out in the transliteration and the name whb has been given for wbb in the translation. The restorations made by JaS do not seem to be based on traces of letters on the rock and although they are possible they are not the only

alternatives. The second letter of the name ġ{s^2}m might be a f. The name llʿz as read by JaS is unlikely and there are three possible explanations. The two l's might be a bad copy of another letter as has been suggested here or the second l might be dittography of either the copyist or the author of the text.

Kawar 1

l s¹mm bn ʾtwʾ w bny h- nfs¹t

By S¹mm son of ʾtwʾ and he constructed the funerary monument

Commentary:
A Safaitic inscription in the collection of Widad Kawar. The second name is unattested but seems clear. It could possibly be *ʾḫwʾ* (also unattested) but the second letter is much more a *t* than a *ḫ*. This seems to be the first record of someone making a *nfs¹t*. All the other occurrences of the word are in the context *l* N *h- nfs¹t*.

KhBG 32

l ws^{1}n bn ml()kt

By Ws^{1}n son of Mlkt

Commentary:
From the copy there appears to be an abrasion between the l and the k which might be where the author has hammered out a mistake. The name ws^{1}n is not in HIn and it is possible that ws^{1}ʿ should be read as the letter read as the first n is a small dash on the copy. The letter after the b of bn is also a small dash and so it is not possible to be certain about this.

Commentary:
The name s¹m'l is only attested once in HIn:327 as a lineal name in C 1290 where it is a doubtful reading. It is possible the copyist has left out an ʿ before the ʾ or the second t should be emended to w. s¹mʿʾl and ws¹m'l are both well-attested in Safaitic.

By {ʾs^{1}ḫr} son of {Ġmd} w hmm

Apparatus Criticus:
KhBG 127: l ʾs^{1}ḫr bn ġr

Commentary:
One arm of the first r has a bend in it. It is rather difficult to be sure of the reading after the first name. The letters bn ġ are written on a separate part of the rock and then there appears to be a rather thin m on the edge of the same part of the rock as the first name. There is then a d and then the letters w h m and m. There is a large gap between the two m's.

By S²rbt son of Ġmd are the animals w l- ḍbn bn ʿy

Apparatus Criticus:
KhBG 139: trans. of the last part "and for Ḍbn son of ʿy".

Commentary:
The last part of the inscription is rather unusual and it is possible that it should be read as a separate

inscription although it would be difficult to explain the w. There is a further occurence of h- ḥyt below this text and it is not clear where the word belongs.

l mtʿ bn ----

By Mtʿ son of ----

Apparatus Criticus:
KhBG 146: l mtʿ'l bn ḫṭbn

Commentary:
The editor's reading seems unlikely because of the position of the letters. On the otherhand it is difficult to know from the copy how the letters should be read. After the bn there are the letters l' slightly below the n. Above the name mtʿ there is a letter read by the editor as a ḫ but which has a wavy tail. There is a ṭ and then a possible b facing in the opposite direction and then two short lines.

By S^{1}mk son of Ṣl---- mʾ{g}yt

Apparatus Criticus:
KhBG 165: l s^{1}mk bn ṣlḥ m- ʾgyt "from ʾgyt" either the name of a region or a tribe.

Commentary:
The copy is not very good.

Provenance:
wadī and biyār al-ghuṣayn, unspecified region, Jordan

KhBG 166

l ḥy bn {s¹}ʿdl{h}

By Ḥy son of {s¹ʿdlh}

Apparatus Criticus:
KhBG 166: l ḥy bn s¹ʿdlh

Commentary:
The s¹ has an unusual stance and the prong of the h is missing from the copy.

Provenance:
wadī and biyār al-ghuṣayn, unspecified region, Jordan
[Latitude/Longitude: 32.400363 / 37.817258]

KhBG 168

l ntn

By Ntn

Apparatus Criticus:
There is a cartouche surrounding the inscription. It seems likely from the copy that this inscription and KhBG 169 are on the same rock but the editor does not mention this.

Provenance:
wadī and biyār al-ghuṣayn, unspecified region, Jordan
[Latitude/Longitude: 32.400363 / 37.817258]

KhBG 169

l ḥfl

By ḥfl

Apparatus Criticus:
KhBG 169: l ḥrn

Commentary:
The third letter is rather wavy and the last letter is rather long.

KhBG 171

l ns²qh bn wt ʾl ʿw{ḏ} w {ṣ}ṯy

By Nqs²h son of wtʾlʿwḏwṣṯy

Apparatus Criticus:
KhBG 171: l nqs²{h} bn wt ḏ- ʾl ʿwḏ w ṣṯy

Commentary:
It seems most likely that this is two inscriptions as the letters from the ʿ are written parallel to the rest of the letters. There is the shape of a ḥ above the t and it is not clear whether it is a letter or a wasm.

Provenance:
wadī and biyār al-ghuṣayn, unspecified region, Jordan
[Latitude/Longitude: 32.400363 / 37.817258]
Wadi Ghuṣayn

KhBG 174

l ʾs²mt bn ṯlm

By ʾs²mt son of Ṯlm

Apparatus Criticus:
KhBG 174: l ʾs²mt bn ṯrm. Possibly read as Thamudic and the last name as "grm".

Commentary:
The s² is a wavy line so the inscription is not Thamudic as suggested by the editor. It seems more likely that the penultimate letter should be read as a l.

Provenance:
wadī and biyār al-ghuṣayn, unspecified region, Jordan

l mʿly bn hrb w s²tw {f}lyt w fl{ṭ} l--h s²nʾ

By Mʿly son of Hrb and he spent the winter flyt and grant {deliverance} to him from enemies

Apparatus Criticus:
KhBG 376: "ẓlyt" for "flyt" and "flṭ" for "fl{ṭ}".

Commentary:
The copy of the fifteenth letter is not very clear but it seems unlikely that it should be read as a ẓ. The letter read as a ṭ is is rather obscured by ink marks in the copy. There is a cartouche surrounding the inscription.

KhBG 382

l bngn'l ----

By bngn'l ----

Apparatus Criticus:
KhBG 382: l gn'l bn ----

Commentary:
The letters bn are written next to the initial l and the following g and it is rather uncertain where they belong. It is possible a compound name "bngn'l" should be read or maybe this inscription should be read as the patronym written as an afterthought of s^{2}ddt the author of KhBG 383. However as the editor points out that would not explain the apparent initial l before the g. It seems less likely that the bn should be read after the name gn'l as in the edition. The copy seems to suggest the inscription continues.

By ʾqdm son of {ʾs^2g}

Apparatus Criticus:
KhBG 387: l ʾqdm bn ʾs^2g

Commentary:
There does not appear to be a n after the b although it might be part of the long prong of the second ʾ. The letters of the patronym are written in unusual positions with the last letter above the s^2. The final letter is rather small and it is possible it should be read as an ʿ.

KhBG 398

l bnyʿmr hnʾy h rḍy

By Bnyʿmr *hnʾy* O Rḍy

Apparatus Criticus:
KhBG 398: *l bnʿmr hnʾ y rḍy*

Commentary:
The *Bnyʿmr* has been found several times before. OCIANA does not alas have access to the late Fawwaz Khraysheh's photographs of the KhBG inscriptions, but supposing that the facsimile is correct, there are several possible explanations for *hnʾy*. It could be the author's *nisbah* referring to an *ʾl nʾ or nʾt. This does not seem particularly likely. It could be the something requested of Rḍy, and the root H-N-ʾ would produce suitable subjects for such a prayer, "ease", "plentiful giving", etc. but the form with final *-y* is difficult to explain. A personal name *hnʾy* is otherwise unknown and so it is unlikely that it is the author's patronym with the *bn* omitted. We have therefore left it uninterpreted for the present.

KhBG 425

l ʿbd bn hkm----m h- mʿmrʿmlʿm

By ʿbd son of Hkm----m h- mʿmr ʿm l ʿm
This habitation belongs

Apparatus Criticus:
KhBG 425: l ʿbd bn hkm{n}-----m h- mʿmr ʿm l- ʿm "li ʿbd bin {hkmn} ----m al-maʿmar ʿaman li-ʿamin"

Commentary:
The rock appears to be damaged between the first and second m. The edition mentions that the letters from the second h might be a separate text and it seems quite possible that that is the case as they are inscribed in a different way and written slightly above the second m. It is not altogether clear how the editor is translating "mʿmr" . See also H 677.

l s^1*mr bn wḥ----rlh*

By S^1mr son of Wḥ----rlh

Apparatus Criticus:
KhBG 427.2: l s^1mr bn wḥs^2 ----lh

Commentary:
There is a horizontal zig-zag line after the ḥ but it seems rather unlikely that it should be read as a s^2. There is a cartouche surrounding the inscription.

By Ḫby {son of} Ky----

Apparatus Criticus:
KhBG 430: l ḫby bn kyr

Commentary:
The second b is written facing the beginning of the inscription and the n is a rather long line. It seems unlikely that the last letter should be read as a r as it is a small curve with long arms facing the beginning of

the inscription. It is difficult to know how it should be read.

By ʾlh son of {Hggt} the year S¹dn was killed and he travelled hmdf f ḥln and O ʾlt [grant] booty this year

Apparatus Criticus:
KhBG 432: suggests "mdf" is the name of a place or a person and "ḥln" is the name of a month or season.

Commentary:
In the photograph the first letter of the second name might have a second prong. The verb ʾs¹fr occurs in C 1649 "w ʾs¹fr tdmr" and possibly in WH 3422 "----{l}ʾs¹frḥṯyt" where ḥṯyt could be a place name cf. KRS 2472.

KhBG 494

l ḫb{ṣ} (b){n} ʾḥs^{1}n h- dmyt

By {Ḫbṣ} {son of} ʾḥs^{1}n is the drawing

Apparatus Criticus:
KhBG 494: l ḫbṣ bn ʾḥs^{1}n h- dmyt

Commentary:
There are three prongs at the bottom of the sign read as a ṣ and it is possible they do not belong to the letter. If that is the case the name should be read as ḫby. The following letter has a slight tail and the n is a rather long line with a double line. The ḥ is written slightly below the s^1 and n and was either left out and then added later or else the s^1 and n were written above because there was not enough room.

Apparatus Criticus:
KhnSJ: s¹qyt for b- qyt KhNSJ: fnyt for s²nyt

Commentary:
/Pace/ the ed. pr. the script style is the same throughout the text and none of it resembles Thamudic E except for the ḍ sign which however is not uncommon in Safaitic especially in this name. The author has played with the letters of the text placing one within the other at almost every opportunity regardless of word division (e.g. ẓ mʿ ẓr f). The y of s¹ly appears to be joined to the l. The last letter in the second line cannot be s¹ (as in the ed. pr.) compare the s¹ of s¹lm but must be h. The first letter of s²nyt must be s² rather than f cf. the f later in the same line.

By Grm son of Lṯ son of Ṣrmt of the lineage of ʿmrt and he came to a place of permanent water while pasturing in the dry season

Apparatus Criticus:
KhNSJ: ʿy for rʿy

Commentary:
As in KhNSJ 2 a number of letters have been placed within each other again regardles of word-division (e.g. bnlṯ bnṣ). However at the end of the inscription the author has applied the same technique to whole words. The first letter after the w is both a q and a ṣ hence the circle is between the middle of the stem and its top and there is a short cross stroke the bottom of the shaft. Similarly the third letter after the w is both the final r ṣyr and the initial r of rʿy but is also the ẓ of qyẓ. Thus it has the short backward strokes of the ẓ and the incurving hooks of the r.

Apparatus Criticus:
KhNSJ: ʿmrt for ʿbs²t

Commentary:
The letters of the first name are very uncertain on the published photograph though the ed. pr. says that they are clear on the stone despite enclosing them in [ ] in his reading. The tribal name is clearly ʿbs²t not ʿmrt. The letter(s) between rm and qyẓ are illegible on the photograph. Ed. pr. has w on the facsimile but f in the reading. The next phrase is probably qyẓ ʿlf (cf. SIAM 28) though it is difficult to explain {t}yt. Ed. pr. translates brḥ qṣr l- bṣry as 'Caesar left Boṣra' which of course is impossible. Brḥ in Safaitic presumably had a wider sense than Arabic bariḥa 'to go away from' (with a direct object) and may have been closer in sense to Hebrew bāraḥ 'to flee (with l- 'to') to hasten' (BDB 138a).

Apparatus Criticus:
KhMNS: ʾdmt for ʾ- dmt; translation of ʾdmt "(this) gazelle" ((hāḏihi) 'l-ġazāl)

Commentary:
KhS connects the word ʾdmt to Arabic ʾadmāʾ-, pl ʾadam "a type of gazelle characterized by a long neck and beautiful eyes". It is so far unattested in Safaitic, so it might be better to regard this as a defective spelling of the word dmyt "drawing," with the definite article ʾ, especially since, according to the formula l- PN def- N, we would expect a definite article on ʾdmt, **h- ʾdmt. image not available

By ʾs¹ son of Brʾh and he returned

Commentary:
KhS connects ʿd to the Arabic ʿwd "to return." He also suggests that it could be connected to ʿadā "to antagonize", referring to the herds in the drawing. The absence of the medial glide in Safaitic II-weak verbs

is attested but the glide of III-weak verbs is consistently preserved, making the latter explanation unlikely. The edition points out that the position of the sun in the drawing indicates that the hunt was carried out in early dawn. image not available

l ḥs²b bn ---- w bkr l gzr

By Ḥs²b son of ---- and he woke early to slaughter [a camel]

Apparatus Criticus:
KhMNS: Translation of bkr l gzr "and he woke up early to hunt" (wa bakkara li-l-ṣayd).

Commentary:
Safaitic gzr can be connected with Arabic ǧazara, "he rose early to slaughter a camel" (see Lane 418b ǧazara la-hum "he slaughtered a camel for them" and 419a s.v. ǧazūr "a camel for slaughter" as in the expression raʿati l-ǧazūru "The camel for slaughter pastured". The normal word for hunt in Safaitic is ṣyd. [MCAM] If this interpretation is correct, then the inscription does not correspond to the hunting scene that accompanies it.

l ḏr bn ms¹k bn ḥgr bn ʿllt w gry h- mhr f h lt rwḥ w h ḏs²r m yʿwr h- s¹fr

By Ḏr son of Ms¹k son of Ḥgr son of ʿllt and he made the colt gallop so O Lt [grant] relief from adversity and O Ḏs²r [blind] whoever effaces this inscription

Apparatus Criticus:
KhMNS: Translation of gry h- mhr "he made the colt run" (ǧaʿala 'l-muhr yaǧrī)

Commentary:
Safaitic gry is taken as a D-stem of the Arabic root ǦRY "to run", that is, to cause to run, or, when referring to horses, "to make gallop" (the fastest gait of a horse). The drawing depicts the horseman galloping (the horse is in suspension with all four feet off the ground) in pursuit of an injured oryx attempting to escape, so the sense here fits nicely with the image. The final prayer of this inscription can be interpreted in two ways: (1) the author omitted the imperative ʿwr, which is found in the commonly attested ʿwr m(n) yʿwr, "blind whoever effaces"; (2) the m is a negative particle, comparable to the negative mā in Arabic. This would require us to interpret yʿwr as a passive injunctive followed by its subject h- s¹fr (i.e. "may the inscription not be scratched out"). Confirmation of the latter interpretation must away further discoveries. image not available

By ʿwḏn son of Ḥmt son of Ġlmt and he awaited fate (?)

Apparatus Criticus:
KhMNS: Translation of nẓr mny "and watched fate" (wa šāhada 'l-munā)

Commentary:
nẓr might be an error on the part of the author or the copyist for an intend tẓr. The formula, w tẓr mny "and he awaited fate", is very common, while nẓr mny only occurs once in KRS 2833. This inscription is found on the same rock and very close to the drawing described in Associated Drawings.

l ʿzz bn ʿn'<l> bn ʾhwl

By ʿzz son of {ʿn'l} son of ʾhwl

Commentary:
The last letter of the second name appears to have a loop half-way down the stem making it look like a d. However the area of the stem next to the "loop" has been more heavily scored than the rest of the letter and it is possible that the original line was deflected at this point by an unevenness on the surface and that the author then emphasized the intended line of the letter by repeatedly scratching the surface but did not score over the mistake. A name ʿn'd would be difficult to explain.

l nẓr bn ʾḫḏ mʿny{n}

By Nẓr son of ʾḫḏ {the} Minaean [?]

Commentary:
There seem to be faint traces of what could be a n after the y of the last word and we have tentatively suggested that this could be the -n marking the determinate state in South Arabian. Thus mʿnyn would be a South Arabian nisba form (as in CIS IV 84/1 and GIED.I 26) equivalent to Safaitic h-mʿny "the Minaean". On

the other hand it should be emphasized that the final -n is by no means certain and that the names Nẓr and ʾḫḏ are unknown in South Arabian. Moreover it is very unusual for an individual to identify himself simply as a "Minaean" though so far from home it would be understandable and one of the South Arabian examples (GIED.II 26) is from the eastern desert of Egypt (see also MNBS p. 106-108). See also Sima WZKM 88 1998 246. However if the apparent -n is not intentional the final word would be an undefined nisba. This would be extremely unusual in Safaitic and would presumably mean "a Mʿnite". In this case it is more likely that it would refer to a social group or place in Syria-Palestine or northern Arabia much closer to Khirbat al-Umbashi (for some possible sites see KMAD).

By {Ẓʿn} son of {s^{1}fʿ}

Commentary:
The ʿ of the first name is damaged and an attempt appears to have been made to erase the letter which followed it. The last 5 letters are very thinly and shallowly scratched and are difficult to read on the photograph. They may not belong to this inscription. s^{1}fʿ has been found once before in JaS 15.

Provenance:

By ʾflṭ son of ʿgr

Commentary:
The last two letters are separated from the rest of the inscription by a large crack in the stone and are very faint on the photograph. To the left of the text is a thinly scratched drawing of a camel with its tail up (?) and with erect hairs on the top of its large hump [KhU 76 d].

Commentary:
After ḫrg the text is very lightly scratched and the name rfʾt is particularly faint on the photograph. The lower fork of the ʾ has been obscured by an abrasion as has the ʿ of Yṯʿ. The letter which was originally carved after the d of zdʾl has been scored over and was presumably an error corrected by the author. The magic sign of 7 lines has been scratched below the name Ḫrg and may occur again above Zdʾl. The first four names are incised and the others are scratched.

Commentary:
The inscription runs down the right side of the drawing of a horseman turns to run below it and then up the right side. It obviously predates King Archive 1 which has been carved over part of the genealogy. There is also considerable later hammering over anything that may have followed the second *ʿwr*, and over King Archive 3. By Ḫlʾ son of Tm son of Mlk and he tracked an enemy {on} foot and he was secure and attained glory

Commentary:
s²nʾt is either an alternative to the collective *s²nʾ* ('enemies') or a singular ('an enemy'). The letter which follows *s²nʾt* looks at first sight like a *w*, and it is difficult to make sense of *w l- rgl -h* in this context. However, the central line of the *w* does not seems to be complete and it is just possible that it is a ʿ.

By Zwlt son of {Mġny} {son of} S²br son of S¹ry son of S¹mʿ

Commentary:
The shapes of some of the letters of the second and third names have been altered. The *ġ* has an additional curve on the curving part of the letter, both *n*'s in this part of the text have been turned into loops, the *y* has been made into an elongated figure of eight, the *b*'s of *bn* and *s²br* have a double curve and the *s²* of *s²br* has a line inscribed down one side of the zig-zag. It seems that the author wrote a *s¹* after the name *s¹ry* and then wrote *bn s¹mʿ* realizing that he had forgotten the *bn*.

By ʾḥd {son of} {Nʿmn} son of {Ḥrṯt} son of Ġly son of Whbʾl and he {found} the traces of Zwlt and so he grieved in pain

Commentary:
The *b* of the first *bn* has been altered with an additional curve giving it the appearance of a *m* the first *n* of the second name has been given an additional stroke giving it the shape of a small *s¹* and the following ʿ has a line across the circle giving it the shape of a small *w*. The *r* of the name *ḥrṯt* has a line across the *ḥ*. The author wrote three *w*'s after the the genealogy but corrected his mistake by crossing out the last one and continuing the inscription in a slightly different direction.

Commentary:
The inscription is very worn between the letters *wgd* and *y w ghm*. There are faint traces of an *ʾ r* and *w* and it seems very likely that *[ʾ][t]{r} {w}ny* should be restored. After the last occurrence of the connective *w* the author appears to have left out an *ʿ*.

Commentary:
There might be a *l* before the *s*^{1} but the photograph is not good enough to be certain or to know whether the inscription begins on another face of the rock. The first *n* is rather faint. The loop of the *d* is slightly uncertain and the following *n* is rather more lightly scratched than the rest of the letters. It is possible the text should be read *s*^{1ʿ}*l----b {w} rʿ{y} {d}{n} ʿnzt* where what has been read above as a *ḥ* is read as a *w* and what has been read as a *g* is an ʿ although it would be larger than the first ʿ in the text. The letter read as a *ḏ* might be a *y* if one of the apparent prongs is incidental but even so the line joining the loop would be rather doubtful. For the place name *ʿnzt* see KRS 26.

Commentary:
It is possible the inscription starts on another face of the boulder which was not photographed. The crossbar of the letter read as w in the sixth name is doubtful and it is possible it should be read as a *g.* The author appears to have left out the *m* of *s*^{2ʿ}*hqm* and the *r* of *ds*^{2}*r*. A divine name *ʿr* has not been found before. If, like the previous two divine names, it is lacking one or more letters it is difficult to suggest what they might be. l ʾbn bn ʿnhlh h- dmy w ḫrṣ f h ṣlm ʾlh dmt rw<<>>ḥ

By ʾbn son of ʿnlh the Dumaite and he was cold and hungry and so O Ṣlm god of Dūmat { [grant] relief from adversity and uncertainty}

Commentary:
There is a *m* after the second *w* and the *ḥ* at the end is written to the side of the other letters. It seems likely that the *m* was a mistake and that the author finished the text in a different direction rather than crossing it out. There is no drawing with the inscription and it seems that *h- dmy* here represents the *nisbah* from Dūmat (Akkadian *Adumatu*, mediaeval Arabic and still today Dumat al-Jandal, al-Jawf) the oasis in north Arabia. This is the only Safaitic inscription known so far in which there is an invocation to the god Ṣlm, who is here called 'the god of Dūmat', but who is better known from the mid-sixth century BC to at least the mid first century AD as the chief god of Taymāʾ (see the dedication to Ṣlm in Taymāʾ Aramaic dated to AD 56/57 in Macdonald in preparation). As yet, neither of the personal names has been found in the inscriptions in and around Taymāʾ or Al-Jawf. However, *ʿnlh* (as opposed to *ʿnhlh* here) is found in a Hismaic text from Qārat al-Mazād, north of Sakākā (Al-Ḏuyayb 2003: no. 36).

l s¹krn bn qḏy bn qdm w ẓlʿ [[]] mṯy f ʾḏm b- s²ʿhqm [[]]

By S¹krn son of Qḏy son of Qdm and he was limping while on a hurried journey and so he made a compact with S²ʿhqm for his safety

Commentary:
The author has written a *g* after the word *ẓlʿ* and then crossed it out. After the final *m* there is a circle shape with three lines across which might also be a mistake that the author has attempted to cross out or it might be a sign. The verb *mṯy* means 'to travel swiftly, to hurry' and is here the infinitive used adverbially. The expression *ʾḏm b- s²ʿhqm* has not been found before and is perhaps to be related to the *ʾafʿal* (IV) form of the Arabic √DMM which can mean 'He made a compact with someone for his own safety' (Lane 975c–976a).

By Qym son of Mrʾ son of Ẓnnʾl son of Mrʾ and he longed for Ġzlt his brother who was a true friend of Wʿl and so O S²ʿhqm [grant] the benevolence of acceptance and abundance from pasturing

Commentary:
There is a lightly scratched Arabic text written over the middle part of this text and another one written over the end. It is possible the text should be emended to *ġzlt ʾḫ -h m ḫlt [w] [ʾ][l-] wʿl* "ġzlt his brother who was a true friend [and] [for] Wʿl"

Commentary:
The *n* of the first *bn* is illegible. Part of the outer line of the second *w* is not visible on the photograph; the *ḥ* of the second *wḥd* has been added later; it seems likely that the author wrote a *q* instead of a *ṣ* in the word *ḫrṣ* and then attempted to emend the letter by inscribing over one line protruding from the circle and adding a prong to the other. By Ngm son of Ẓʿn son of Rgl son of Ṣʿd he spent the winter while migrating and so O Lt let there be a safe reunion with his family and may {Yhd} be secure and he returned with camels to the ḥarra to pasture on ʿawf [plants] of low-lying tracts of land

Commentary:
One of the prongs of the second ʾ is covered by an abrasion. The *h* before word *s^{1}lm* is written slightly to the

side of the other letters. The letter that has been read as *d* in the word *yhd* has a diagonal line running from the base of the loop and it seems possible that a *h* was written originally and then the letter was changed to *d* by the addition of the loop. There is what might be a s^2 after the *y* of *rʿy* but there are some lines over part of it suggesting it has been crossed out. The lower stroke of the penultimate letter (ʾ) runs into a *ḫ* in KRS 38, but it can be seen to be a thinner line than those of the *ḫ*. For s^2tt rather than the more usual s^2ty see Al-Jallad 2015: 122. For *ʿf* and *ht* see Al-Jallad 2015: 305 and 318, respectively.

By ʿmn son of Gnʾl son of Ḥy son of Ṣbḥ son of Ḥy son of {Gnʾl} son of Whb and he had sex with S¹lm S¹lm's slave-girl

Commentary:
It seems likely that the author made a mistake at the beginning of the sixth name and inscribed a straight line with a prong on the end which he then rubbed over and another short line. He then changed them into a *g* by drawing a curve to attach the lines at the top and joining them with a straight line at the bottom. Presumably, the two occurrences of *s¹lm* refer to two different people either with the same name or with names from the same root. The end can be translated either as above or as "S¹lm had intercourse with S¹lm's slave girl".

l ḥ{r}rb bn qqm mm---- bn nʿmn w nḏ----bḥ

By {Ḥrrb} son of Qqm mm---- son of Nʿmn and nḏ----bḥ

Commentary:
It seems likely that the author made a number of mistakes although it is difficult to be certain. The third letter has a bar across one end of the curve giving it the appearance of a *k.* However, there is also a hook at the other end which one would not expect in the letter k. It is possible that the second q should be read d but the author has made no attempt to correct it. In the photograph, the letters following the third *m* are partly covered by another rock. It is possible, however, that there is a *f* and even less certainly a *n* and a *y* which would produce the name *mfny*. Before the last two letters the surface of the rock has been broken and the top of a *ḏ* above this patch, but it is unknown if anything else has been lost. There is enough room between the *n* and the *b* at the end for another letter but nothing is visible on the photograph.

Commentary:
The first *b* and second *n* are faint. One fork of the fourth ʾ is rather uncertain and it is possible the letter should be read as a *ṣ*. The following *n* is rather short. Part of the photograph is out of focus making the reading of the fourth *y*, the fourth *w*, and the third ʿ rather uncertain. For the interpretation see Al-Jallad 2015: 255, 307, 313, 318, 329

l {g}mq {b}n ʾḥs¹b w {b}ky ʾw

By {Gmq} {son of} ʾḥs¹b and {he wept} ʾw

Commentary:
The second letter might be a *m*. The *bn* and the patronym are not very clear on the photograph but it seems that the first *b* has a hook as does the *b* of the word *bky*. The inscription appears to be unfinished probably because the rock is rough after the *w* although there is a horizontal line above the ʾ and *w* which might be an attempt at a continuation.

By ʾdm son of {Ys¹mʿl} son of Ys¹mʿl son of Ṣʿd and he grieved for his brother for ʾs¹ and for Ḥd his brother and O Lt [grant] relief from adversity and protection

Commentary:
Part of the final letter of the second name is obscured by an Arabic text. The prayer might be interpreted either as *rwḥ wqyt* "the relief of protection" or it is possible that the author forgot to write a connective and intended *rwḥ [w] wqyt* "relief from adversity and [grant] protection". By ʾnʿm son of Mḥlm son of Hms¹k son of Wqr {son of} Wqr

Commentary:
It is difficult to know how to interpret the second occurrence of *bn wqr*. It is lightly scratched on the rock above the last two names of the text. The letter read as the *n* of *bn* is a long line. If it is the continuation of

the genealogy then it is strange the author did not write it after the first occurrence of *wqr* where there is sufficient space. It is possible it was left out of the middle of the genealogy and should be inserted after *mḥlm*.

By Nġft son of ʿm son of ʿly son of Ḥḍg and he found the writing of ʾḥlm and so {he cried} for his companion

Commentary:
The text reads *kby* which seems most likely to be a metathesis for *bky*. It is difficult to know whether s^2*yʿ* is singular or plural. The context suggests that it should be translated as the former.

By S¹ny son of ʾṣr {son of} {Grmʾl}

Commentary:

The *n* of the second *bn* is a long line going through the end of the curve of the *b* and it seems most likely that the author's hand slipped when incising the letter. The second *ʾ* is written on the edge of the rock and the next face was not photographed. However, traces of a *l* are just visible on the photograph.

By Qʿṣn son of Nẓr son of S^{1}ḫr and he found the inscription of {his} paternal uncle and {he was sad}

Commentary:
The author forgot one of the *d*'s of *dd* and wrote it slightly below the other letters. He also wrote an *ʾ* after the word *dd* and then changed the letter to a *h*. There are two equally possible restorations of the text at the end. The author has either omitted the *n* of *ngʿ* as suggested above or he has left out a *w* intending to write *w wgʿ* "and he was sorrowful". There is a series of lines on another face of the rock.

Commentary:
The ʿ of the word *ʿm* is doubtful. It seems likely that the author wrote the ʿ after the *r* of *ʾṯr* and then realising that he did not have enough room to complete the inscription continued above. However, the photograph is not good enough to be certain of this interpretation.

l ʾws^{1}n bn hngs^{2} bn ʿbd h- b{k}rt

By ʾws^{1}n son of Hngs^{2} son of ʿbd is [the drawing of] the {young she-camel}

Commentary:
Only the curve of the second letter of the final word is visible but it is most likely that it is the remains of a *k* and the word *bkrt* should be read. If this is correct, the drawing is most unusual since there is a very widespread convention in Arabian rock art including that associated with the Safaitic inscriptions, of showing female camels with their tails curled up and male ones with their tails hanging down (as here). The inscription and drawing are surrounded by a cartouche and there are scratches over parts of the inscription.

By Whblh {slave of} the ʾl Ġrṭ and he pastured the sheep and so O Lt [grant] security and abundance and he grieved for his maternal uncle and for his foster child Ẓnʾl and his wife's relation Ḥgg and his wife's relation S¹ʿd son of {Mlk}

Commentary:
This is an unusual inscription on several counts. Slaves traditionally "do not have" relatives, but this text is full of them. Possibly, Whblh belonged to another tribe in the area and had only recently been enslaved by the *ʾl ġrt* (probably a small social group, which is not otherwise known, since it is difficult to imagine how it would work if he had been a slave of a larger group). He is therefore missing his immediate and wider family, and this is the first time the term *mrby* "foster child" has occurred in Safaitic, while *ḫtn* "wife's relations" is known from only one other text (C 4988). The text is clearly and expertly carved but the form of the final letter is puzzling.

The text is damaged after the *ḍ* of *ḥḍ{r}* but it is possible a *r* should be restored. The *k* and *r* of *ḏkr* and the *w* of *rwḥ* are partly obscured by hammering. For the interpretation of the second half of the text see Al-Jallad forthcoming.

l ----lm bn ḏkr bn ḍ[[h]][d]t h- b{y}{f}

By ----lm son of Ḏkr son of {Ḍhdt} hb{y}{f}

Commentary:
There are some lines before the beginning of the inscription and the first letter of the first name has been damaged by hammering. In the third name, the interpretation of the letter after the *ḍ* is difficult. It is most likely that the author intended to write *ḍhdt* and wrote a *d* and then realising that he had left out a *h* he added a fork to the letter to change it. He did not however rewrite the *d* which then needed to be added. There is a *h,* a *b,* a long line with a loop which might be a *y*, and a possible *f* after the third name which are difficult to explain.

By Rhdt {son of} ---- {son of} Hys^{1}r son of Ḍhdt son of S^{1}dy is the {carving}

Commentary:
The text between the first and third names has been scratched over and is very faint. It seems likely that the second name should be restored as *brbr* as the name *rhdt bn brbr* occurs in KRS 199 and the genealogy *rhdt bn brbr bn hys^{1}r bn ḍhdt bn s^{1}dy* occurs in KRS 189. The *ḫ* of *ḫṭṭ* is damaged by scratching. The drawing shows a horseman spearing what appears to be another equid, possibly an onager.

Commentary:
The text is surrounded by a cartouche. The author omitted the *ṭ* of the fifth name and squeezed it in above. The *n* of *bn gdr* was also originally omitted by the author and then added to the right of the *b*. The third letter from the end is slightly damaged and it is possible it should be read as a w. However the line in the circle is shallower than the other lines of the text and is probably an incidental hammer mark.

By ʾkr bn ʾbrqn is the young female camel and he camped here [among] spring herbage and may he who is arogant be thrown of the grave

Commentary:
The text is surrounded by a cartouche. The last part is presumably a curse in which the author has omitted the deity's name. He has written ḏ ʿty twice. The author seems to have carved a *r* before the *l* near the neck of the camel. *ʿty* is probably to be interpreted from Arabic *ʿatā* "he behaved proudly".

t l- wṣn {ṣ}r b- rʾy gm{l} s¹nt myt wgm m- hrbt

This [the writing] is for {Wṣn} who {returned to a place of permanent water} during the rising of Gemini the year Wgm died of extreme old age

Commentary:
There do not appear to be any letters before the first *t* which is written below the horse's head. It is possible that the text is a continuation of KRS 210 but it would be unusual as the end of that text is at the bottom of the rock and these letters are at the top end. The second *ṣ* is doubtful as the prong seems more lightly scratched and might not belong. It is possible the letter should be read as a *y*. The second *l* is more lightly scratched than the other letters of the text. Interpretation AA. For the translation of *b- rʾy gml* as "during the heliacal rising of Gemini" see Al-Jallad forthcoming. A similar phrase is found in SIJ 827: *w ṣyr m- mdbr b- rʾy gml*. The interpretation of *hrbt* is based on Arabic *hariba,* a dialectal form of *harima,* "to become extremely aged" (Lane 2889 b–c), something unusual enough in the desert to be suitable for dating.

By S²mt son of Ḥy and so O ʾlt [grant] security to ddy

Commentary:
The reading of y at the end is clear although it is difficult to explain. It is possible that it is a dual form "two paternal uncles" although one would expect the enclitic pronoun *-h* “his”. The two possible interpretations would seem to be either that *ddy* is a previously unknown personal name, or that the author has changed to the first person and it means “my paternal uncle”.

l {h}mʿḏ bn db h- s¹knt

By {Hmʿḏ} son of Db is the dwelling [?]

Commentary:
The second letter is rather ineptly inscribed and the fork is not clear. Despite the presence of a drawing of a camel the final word is clearly not *bkrt* but *s¹knt*, which would mean "a [single] dwelling". The implication is something permanent rather than a tent (*bt*). The word recurs in WGGR 1 (see Al-Jallad 2015: 341). Commentary:
The drawing, which shows a number of oryx, suggests that *bqr* here is a collective. *Bqr* is one of the words used for "oryx" in Safaitic (as in Arabic *baqar waḥš*), the other is *dṣy*. *Bqr* is, of course, also used for "cattle",

By Ḥnn son of S¹lm ʿbd ʾl ʾs¹mʿl and he found the writing of his father and so he was miserable overshadowed (with grief)

Commentary:
It is possible the name ʿbdʾl should be read after s^{1}lm and [bn] ʿbdʾl [bn] ʾs^{1}mʿl should be restored. On the other hand, the sequence *ʿbd ʾl ʾs^{1}mʿl* could mean "servant of the lineage group of ʾs^{1}mʿl". By ʾs¹lm slave of {Ḫld} son of Ḫlṣ and he pastured the sheep and he led a troop astray here so they mistreated him for twelve days the year Hnʾ son of Lbʾt was appointed commander and so O Lt [grant] security

Commentary:
Part of the rock has flaked away after the first *t* and only parts of the letters are visible. It seems most likely that a *y* should be restored and the word *fty* read and then it is possible that *ḫl* should be restored followed by a *d*. The loop of the second *d* is very faint. The author has written a *s²* instead of a *f* before *h lt*. For *w ʾḍll b- ḏ gs² w g{d}h l- ṯnʿs²r ym* see Al-Jallad 2015: 257.

By Ḍḥy son of ʾs¹wr and he was obedient as a hired man and so O Rḍw [grant] his share of his {pay}

Commentary:
The reading of the second ʾ is rather doubtful as one of the prongs of the letter is indistinct and it is possible it should be read as a *h*. For *ʿnw* cf. Arabic *ʿanā* (√ ʿNW) "he was obedient, submissive" (Lane 2178b).

The letter read as *ṯ* is partially covered by the letters of KRS 309 and is restored on the basis of the context in which it occurs. It is possible there are two ʿs after then *s*[2] but one of the small circles seems much fainter than the rest of the text. Translation as in Al-Jallad 2015: 98.

l hʿṣd bn ʿkd h- g{h}l

For Hʿṣd son of ʿkd is the {scratching post}

Commentary:
The penultimate letter is rather carelessly inscribed. We have interpreted *gḏl* from Arabic *ǧiḏl* "a post, or piece of wood, that is set up in in the place where camels lie down, at their watering place, for the mangy camels to rub themselves against it."(see Lane 397a). Alternatively it could be related to Arabic *ǧaḏil* "happy". In earlier editions of this database there was a cross-reference to *hʿṣd bn ʿkdhg'* in KRS 594. However, this is the same inscription and has been removed.

Commentary:
The inscription has been scratched over. The author appears to have left out *bn* between all the names in his genealogy. The letter after the first *d* is rather long and it is possible that it should be read as a *l*. The name *s¹wdl* has been found in WH 3851, and *s¹wdlh* in JSJ 5.

Commentary:
There is an extra *l* at the beginning of the text at a slightly different angle to the rest of the text presumably the author decided to xarve the inscription in a different direction to that in which he had originally started. In the light of KRS 379, it seems likely that the author here is using the word *bn* to mean "descendent" rather than "son".

By {Wʿr} son of {N}----s¹ son of ʿmrt son of Ḫr----

Commentary:
A cross has been scratched over the *w* and a line across the ʿ; the *n* of the first *bn* has been joined by two lines to the following letter which is probably also a *n*; the next letter is partly covered by hammering and only a short line is visible; there are some miscellaneous lines after the next *bn* and there is a line through the ʿ in the following name; the arms of the next two *r*'s have been joined to the back of the letter by diagonal lines and the arms of the next two *t*'s are joined together. There is hammering after the final *r* and no more letters are legible. The names *nks¹ bn ʿmrt bn ḫrg* occur in KRS 1829 and 1830 and it is possible that *nks¹* and *ḫrg* should be restored here for the second and fourth names respectively.

---- bn ʾḥl{{m}} w ʿwr h- s¹fr

----son of {ʾḥlm} and he scratched out the writing

Commentary:
What comes before *bn ḥl{m}* is difficult to make out on the photograph. The *m* of *ʾḥlm* has been altered by the edition of an extra lin to make it look like a *w*. This is an usual text as the author seems to be claiming that he "scratched out the inscription". Both KRS 391 and 392 are to some extent damaged by hammering.

However, the fact that some letters of KRS 392 seem to be written over some letters of the present text suggests that KRS 392 was written later and that the author is not referring to this particular damage. It seems more likely that he is referring to the changes made to the letters of KRS 391.

KRS 405

l ʾb bn s¹dy h- dr w qtl hgml

ʾb son of S¹dy was here and he fought with Hgml

Commentary:
There are some scratches covering the inscription. The text has been translated from Form III of the root qtl *qātala* "he fought" but there is not enough context to be certain of the translation. It is possible that the verb should be translated on the basis of Arabic Form I *qatala* "he killed" and that the phrase should be translated as "he killed the camel" or "he killed Hgml". However, the former translation begs the question "which camel" (one might expect rather *w qtl gml* ("and he killed **a** camel", for food or sacrifice), while the latter would be a dangerous announcement to make.

By S^{1}y son of Mhr son of {Ḥnn} son of ʾbgr son of {Ṣrmt}

Commentary:
The loop of the third letter is rather damaged and one prong of the *ḥ* is damaged. If the reading of the first letter of the last name is correct then it has an unusual stance as it has been turned 90° to the rest of the text. It is interesting that the names *mhr bn ḥnn bn ṣrmt bn ʾbgr* occur in KRS 207 and it is possible that one or other of the authors has got the last two generations muddled up.

By Mt----{n} son of {ʾmt} and he longed for ---- and for Qymt and {for} Khl {and} for Wʾl and for Whbn {and} for ʿqrb and for {Ṣhbn} and for {Ḥnn}

Commentary:
The inscription is badly damaged by abrasions and hammering. The first *n* is rather short and the second *m* is damaged. After the first occurrence of *ʾl* there are two lines with prongs which are partially covered by an abrasion and which might be ʾ's, *ṣ*'s, or *h*'s. There is sufficient space in between them for another letter. No *w* is visible after the name *qymt* and the following ʾ is damaged as is the *w* after the *khl*. The *w* after *whbn* is covered by an abrasion. The *ṣ* is an unusual shape consisting of a small circle with two lines attached, and the last two letters are damaged by hammering.

{By} Ms¹k son of {Ġzlt} son of S²rk son of {Ġyrʾl} son of Ms²ʿr and he pastured the ḫrh and so O Lt [grant] security and blind whoever {scratches out} [the inscription]

Commentary:
A prong has been added to the initial *l*. The *s¹*, *k*, and *b* of the first name and the following *bn* have been inscribed so that the letters are touching each other; lines and scratches have been added to the *t* of *ġzlt*; the *y* of *ġyrʾl* has been changed to a *ṣ* and the ʾ has been joined to the *l* by the addition of a third line to the prong. The *w* of the last word has been obscured by a chip. The last part of the inscription is written on an adjacent face. The word *h- ḫrh* is difficult to interpret. All the letters are clear, but it is difficult to find any parallels to such a word. The context requires it to represent a type of animal, a topographical feature, or a type of pasture.

l w{g}r bn ----

By {Wgr} son of

Commentary:
The text is written vertically behind and below the smaller camel and is difficult to interpret as it has been tampered with by the addition of lines and infilling. The *w* has been joined to the initial *l* by a line. The third letter might be a *g* but the variation in technique of some of the hammering suggests that it might have been a *b* and then the arms were enclosed by a line. The *r* has been joined to the following *b* by a line. The *n* is joined to the following letter which is an infilled circle. It is small enough to be an ʿ or it might be a *g* or *w*. The next letter is a line with a slight protusion in the middle. It might be a *q* with the loop filled in or a *t* or the protusion might be part of a line joining the letter to the preceding one in which case it should be read as a *l*. The last letter is a line with infilled loops at either end. It might be a *ṯ* or a *ṣ*.

l ṣb bn mk{b}{l}

By Ṣb son of {Mkbl}

Commentary:
The penultimate letter has a a short line protruding from the curve and giving it the appearance of a second *k*. However, this is probably a misdirected hammer mark similar to the one protruding from the *m*. The *l* at the end cannot be read with certainty as the photograph is not good enough.

KRS 607

l klb bn rḍ----t h- d{ṣ}{y}

By Klb son of {Rḍ----t} is [the drawing of] the {oryx}

Commentary:
Some of the letters are damaged. One end of the penultimate letter is covered by a hammer mark and it is possible that it is a *ʾ*, *ṣ*, or *h*. The word *dṣy* is found referring to a drawing of an oryx in SIAM 26. However, there is no sign of a drawing of one here. An alternative explanation of the final word is that it is a *nisbah* but no group with a name *ʾl dʾ(t), dṣ(t), dh(t) is known.

ʿs¹{b}----{y}hw

ʿs¹{b}----{y}hw

Commentary:
There does not seem to be a *l* before the ʿ unless the author intended to "share" the *l* of KRS 611. The letters

in the middle are crudely carved and difficult to read. There is possibly a *r* at the end although it is written to the side of the *w* which would be strange if it belonged to this text, as there is sufficient room for it to be written after the *w*.

[l] ʾṣhb bn ṭḥrt bn ḍbʿ bn s¹ḫb bn {r}ʿ

{By} ʾṣhb son of Ṭḥrt son of Ḍbʿ son of S¹ḫb son of {Rʿ}

Commentary:
The initial *l* is covered by abrasions. The penultimate letter might be a *r* although one arm is at a strange angle and the other is not quite attached to the line. The second ʿ is on the edge of the rock and it is unclear whether or not the inscription continues on another face. If it does not and the reading of *r* is correct, it is possible that the letters are a metathesis of the name *ʿr*. The sequence of names *ṭḥrt bn ḍbʿ bn s¹ḫ{b} bn ʿr* occurs in KRS 734. By {Ṣdm} {son of} Wṭy {son of} F----{h} and {he grieved} {for} W----

Commentary:
Most of the inscription is covered by KRS 696 and some of the letters seem to have been altered and so the reading is very uncertain. The second letter could be a *ṯ* and the third letter might be a *q*. The *n*'s in both the occurrences of *bn* appear to have been extended to enclose the arms of the *b*'s. All that is visible of the second letter of the third name is a line. The third letter of the name might be an ʾ or a *h*. The central part of the third *w* and *g* are covered by parts of the letters of KRS 696 and the ʿ is a rather large circle. After the fourth *w* there are lightly scratched lines and it is difficult to know what should be read.

KRS 702

l s¹krn bn s¹ʿd bn {ʾ}b{ʾ}n{s¹}

By S¹krn son of S¹ʿd son of {ʾbʾns¹}

Commentary:
Parts of the ʾ's of the last name are faint and the reading of the final letter is very doubtful because of an encrustation on the rock.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 703

l ḥṯmt bn ʿtd bn rfʾt bn m{l}----g

By Ḥṯmt son of ʿtd son of rfʾt son of M{l}----g

Commentary:
The letter after the *m* might be a *l* or a *r* but it is probably the former. It is not entirely certain that the *g* at the end belongs to this inscription. It is possible the inscription continues downwards and that the *g* belongs to another inscription which was written on the part of the rock which has been broken off.

By S¹wd son of Ḏbb son of Bd'l son of {Gyz} son of {S¹ḫr} {son of} ʿr son of Zd'l

Commentary:
The inscription is partly covered by an Arabic inscription and only parts of the letters of the fourth and fifth names are visible. The genealogy gyz bn s¹ḫr son of ʿr occurs in KRS 519. Part of a cartouche is visible in the photograph.

KRS 751

l kf----y bn ----fn h- bkrt wbḏ----

By Kf----y son of ----fn is [the drawing of] the young she-camel wbḏ----

Commentary:
There is hammering between the *f* and *y* and there is room for one letter which might be a *r*. Some more hammering is covering the first letter of the second name and the last part of the inscription. After the *ḏ* there is probably room for one letter and then the fork of the last letter is visible and it might be the remains of a *ʾ*, *h*, or *ṣ*. There is a drawing of three camels claimed by this inscription and KRS 750.

Commentary:
The inscription is written in between KRS 788 and the thighs of the woman in the drawing. It is badly damaged and after the initial *l* there is room for several names. One line of the letter read as *s¹* is damaged. It is unclear whether the text continues after the *m* or whether there are any letters at the end of KRS 790. Commentary:
The *ṣmd* often occurs in connection with *ḏbḥ* "sacrifice" and since in Arabic *al-ṣamad* can signify *al-naṣab* "the setting up or erecting a thing" (Lane 1726c) and *ṣamd* means "elevated ground", it seems possible that in Safaitic it may have meant a place where sacrifices were made.

By ʾs¹ and he was on the look-out the year he married [?]

Commentary:
The *r* is written back-to-front. The loop of the letter of the letter afterthe second *s¹* is very small and it is possible the letter should be read as a *n* or perhaps it should be emended to s¹<n>t. *gwz* could mean "he married".

----{y}w S¹ḥq {ḏ } ʿwr wr{h}dl---- and he watered at {al-Namārah}

Commentary:
The text is written on three faces. The first was not photographed and, from what is visible of it, it appears to be covered in lichen. The first legible letter might be a *y*, *ṣ*, or *ṯ* as only a line and a loop can be read. The letter read as *ḏ* is doubtful as the lines of the prong are short and indistinctly inscribed. The fork of the first *h* is rather doubtful. After the *l* and before the fourth *w* there is a rather large curve shape and it is difficult to know what was intended. The photograph is not good enough to be sure that the letter at the end is a *t*.

l ġyrʾl bn [[]] ṣʾr b----rr bn {{l}}ʿʾʾḫ

By Ġyrʾl son of Ṣʾr b----rr bn {{l}}ʿʾʾḫ

Commentary:
There is some scratching after the first *n* which suggests the author made a mistake and then crossed it out. It is difficult to interpret the rest of the inscription as it seems that some letters have been changed and other letters have been written over them. The letters *dgm* have been written over the patronym. After the second *b* the photograph is not very good and no letters are visible until the two *r*'s. The letter after the second *n* might be an *ʾ* but it seems possible that it was originally a *l* and then a curved line was added to one side, either to change it into an *ʾ* or to superimpose a *r*. The following letters are quite clear although their meaning is obscure. There is a *m* written across the fourth *ʾ* and the *ḫ*, possibly because someone else was trying to turn the original name into his own name. There is a possible *t* above the inscription and perhaps lines of other letters as well.

Commentary:
Ḫlf would appear to be the equivalent of Arabic *ḫilfah* that is plants that grow up after the spring herbage (*bql*) or "that comes forth not from rain but by reason of the cold of the latter part of the night", or herbage that appears in the season of *ṣayf* (Safaitic *ṣyf*) "after the spring herbage has dried up". l mlk bn {ʿ}bd bn s²rb bn ġlmt bn s²r{b}

By Mlk son of {ʿbd} son of S²rb son of Ġlmt son of {S²rb}

Commentary:
The first letter of the second name looks more like a *w* than a ʿ, but the sequence of names in other inscriptions on this rock suggest that *ʿbd* was intended. It is possible that the author left out the name *ʿḏ* after *ʿbd* as the sequence *mlk bn ʿbd bn ʿḏ* occurs in KRS 979 and 981, and *mlk bn ʿbd bn ʿḏ bn s²rb* in KRS 982 on this rock. The last letter of the text is slightly damaged and the photograph is not very clear. It is possible that it should be read as a *r*.

Commentary:
There are three lines before the deity's name ʾlh which seem to be quite clear although there are some extraneous lines across them but it is difficult to know how to explain them. It is possible the author started to write the name ʾlh and then abandoned the first attempt and wrote the name again. There is also a line curving round some of the letters in the middle of the inscription. At the end it looks as though the author has written a *b*, *h*, and *b* and then put a line across the two vertical lines to form a *ṭ*. There is then a *l* and *h* and it seems most likely that they were a mistake and and a vertical line has been added to the *h* to form a partial *ṭ* with the line of the prong of the h forming a crossbar. *Contra* Al-Jallad 2015: 258, the divine name read hear as *ṣr* is clear and it is not possible to read it as *{ʾṯʿ}*.

The drawing shows a Bactrian camel and the fact that it is called *h-gml* in the inscription suggests that there was no special name in Safaitic for animals of this breed. For the interpretation of *ḫḍʿ* cf Arabic *ḫaḍḍaʿa-hu* "it (proverty) lowered, humbled or abased him" (Lane 758a).

Commentary:
The lines of the second ʿ are slightly doubtful and the fourth *d* is doubtful as there is an extra line which gives the letter the appearance of a *q*. The author seems to have made a mistake after the deity's name *s²ʿhqm* and then attempted to cross it out. Another example of how *ʿm* is used of the grandfather and all direct ancestors above him. {By} {S¹}---- son of S¹ny son of Mḥnn and he grieved for ʾs¹ẖr

The first name and following *bn* are partly covered by hammering. It is possible that *s¹ny* should be restored on the basis of *s¹ny bn s¹ny bn mḥnn* occurring in KRS 984 from the same site. There are some letters directly after the name *mḥnn* which have been scratched over. They appear to read *w wg----mḏ*. The *g* is written to the side of the other letters and the hammering completely obscures the next letter before the *m*. It seems likely that the author was going to continue the inscription in this direction and then changed his mind and wrote the second part of the text curving up the rock instead.

By S²rk son of Ḫr son of {S¹krn} son of Ṣbḥ and so O S²ʿhqm blindness to whoever {scratches out} [the inscription] w ----hdrh{d}rnhnfs¹hwnʿmh

Commentary:
The author wrote a *ḫ* at the beginning of the third name presumably because he forgot he had already written the name *ḫr*. He then scratched out half of the letter leaving a V shape with a vertical stance which he appears to have used as a *s¹* at the beginning of the name. The *m* of *s²ʿhqm* has been decorated with lines. The two letters after the second *w* are partially covered by lichen. The first might be a *s¹*, *g*, or *w* and the second might be a *ṯ*, *ṣ*, or *y*. The loop of the second *d* is damaged and rather doubtful. The author has omitted the *w* in *yʿ[w]r*. Apparatus Criticus:
Macdonald 1995: 286: *s¹nt qttl hrdṣ* "the year Herod died mad"; probably referring to Herod the Great

Al-Jallad 2015: 131: *s¹nt qttl hrdṣ* - the year Herod waged war

Commentary:
The *ʾ*s and *t*s have "square" forms. After the *w* following the name *ms¹k* the text continues in two directions one of which has been abandoned. The author wrote *wgm l m* and then presumably decided that if he continued in this direction there would not be enough room to complete what he wanted to say and so continued to the right instead. There is scratching over the ninth *l* and the fourth letter from the end is a loop which might be a *g* or a *m* similar in form to the *m* of the word *s¹lm*. On the interpretation of *s¹rt* as "he served [in an army unit]", see Macdonald 2014: 159–160. We have interpreted *s¹rt ʿ{l}- ḫr hdy* as "he served {under} Ḫr the commander", literally "he served, Ḫr being commander", compare Arabic *ʿalay-hi amr*^{un} "command lies upon him, he is in command", (Lane 2145a, and see Macdonald 2014:160, n. 78). See also RQ.A 10 *w [[]]s¹rt ʿl- mlk h- s¹lṭn* "and he served [in an army unit] under the possessor of authority". We have

preferred Al-Jallad's interpretation of *qttl* (2015: 131) to Macdonald's earlier one (1995: 286). For the interpretation of *dʿy* see Al-Jallad 2015: 309.

l s²g{ʾ} bn s²ḥtr bn ʾs¹ḫr w wgd ʾṯr ---- f bʾs¹ mẓll

By {S²gʾ} son of S²ḥtr son of ʾs¹ḫr and he found the traces of ---- and so despair for those who remain

Commentary:
The line of one prong of the ʾ is rather faint. After the *t* of the second name the author continues the inscription below the beginning of the text probably because he calculated that he would not have enough room unless he made the loop of the inscription rather larger. He left out the *r* of the of the third name and added it below the *s¹* and ḫ. It is difficult to read the name after the word *ʾṯr* although traces of letters are visible. l d'yt bn 's^{1}lm w rʿy m- {s^1}hl

By D'yt son of 's^{1}lm and he pastured on account of {Suhayl}

Commentary:
There is a slight gap between the second *m* and the following letter but there does not appear to be anything written there. The letter read as the second *s^1* is a different shape from the first one and is written the other way up. There is a further straight line after the third *l* which might be a another letter or intended to be part of a cartouche which was never completed around the inscription. The word *m- s^{1}hl* probably means "on account of Suhayl" (Canpous), the star whose rising introduces the first winter rains in October. See Musil 1928: 7–8. See also Macdonald 1992: 2.

l {{ʾ}}bgr

By {ʾbgr}

Commentary:
The ʾ has a loop in the middle of the vertical stroke and it is possible that someone has tried to alter the letter probably to a *d*. After the *b*, there are two zig-zag lines inscribed in parallel which are possibly the hind legs of an unfinished drawing of an animal, similar in style to the legs of the completed animal next to them. The line below the animal and after the *g* above it are more lightly inscribed than the letters and are extraneous to the inscription.

Part of the *ḥ* is covered by an abrasion and the second *k* is rather faint. A *t* is not legible at the end of the sixth name but the space after the *m* and the fact that the names *ms^{1}k bn s^{2}rb bn ġlmt* occur in KRS 1078 and KRS 1079 suggests it should be restored here. There are traces of letters after the word *wgm* but nothing is legible.

Commentary:
The first part of the inscription is rather difficult to read. There is a line and then a gap in which no letters are visible. There are then three lines of which the tops of the last two are covered by an abrasion. The rock is broken after the *m* and the top of the *z* is missing and only some lines are left of the other letters in the rest of the inscription.

l ʿḏ bn ʿqrb bn ḥmyn w wgd ʾṯr ʾb -h f ngʿ w ḥll h- dr {f} {h} lt s¹lm ---- {ḥ}dṯ s¹fr ʾb -h

By ʿḏ son of ʿqrb son of Ḥmyn and he found the inscription of his father and so he was sad and he camped here {and so} {O} Lt may he be secure ---- {he renewed} the writing of his father

Commentary:
The two letters after the word *dr* are covered by an abrasion. The rock is damaged after the *m* of *s¹lm* and it is possible a *w* should be restored. The following *ḥ* is not entirely clear on the photograph. It seems likely that KRS 1121 was written by the author's father.

Commentary:
There is a line in the middle of the first letter and it is not entirely certain whether it is part of it or extraneous. It is possible the letter should read s^1. The first letters of the second name are partly covered an abrasion and it is unclear how they should be interpreted. The first r is also uncertain.

By Q---- {son of} ʾdm and O Lt and {S^2ʿhqm} [grant] abundance and w---- nʿm and so he grieved in pain

Commentary:
The letters after the first *q* and the fourth *w* are covered by abrasions. It is quite likely that *w[g][d] [s^1][f][r] nʿm* "he found the inscription of Nʿm" should be restored in the latter case. KRS 1124 which is on the same rock is by someone called Nʿm. The author appears to have omitted the ʿ and *h* in the deity's name.

By Nʿm son of Rgl son of Ṣʿd son of ʿlyn son of Mrwn and he grieved for ʾnʿm and for Nṣrʾl and {for} Qdm and

for ʾbgr and he kept watch for the enemy and so O {Lt} may he be secure and blind whoever scratches out [the inscription]

Commentary:
There is a hammer mark after the fourth *bn* and it seems likely that the author made a mistake and then crossed out what he had written. The sequence *ṣʿd bn ʿlyn bn mrwn* recurs in KRS 1567 and *ṣʿd bn ʿlyn bn ---- wn* in KRS 1233. The author has omitted the *l* of *ʿl* before the name *qdm* and there is an abrasion after the *l* of the deity's name. From the shape of the damage it is most likely that the damaged letter was a *t*. For the translation of *ḫll* see Al-Jallad 2015: 319.

By Mġṯ son of Gnʾl and he came to a watering-place f ny tl ḫms¹ m- nmrt and so O Bʿls¹mn [grant] relief from adversity and uncertainty

Commentary:
The passage between *wrd* and the prayer is difficult to interpret. It seems unlikely that *nmrt* here refers to al-Namārah since this always appears as *h-nmrt* in Safaitic. The author wrote *mrwḥ* after the deity's name and then crossed the letters out and wrote the word *rwḥ* next to them.

By Bnt son of Ẓʿn son of Ḫṭs¹t son of Ws¹m is [the drawing of] the horse and O Lt may whoever {scratches out} [the drawing of] the horse be thrown out of the grave

Commentary:
The inscription is partly covered by later hammering over the drawing. There is a *w* carved slightly below the inscription between the *w* preceding the deity's name and the *q* of *nqʾt*. It is inscribed in a different technique from the rest of the letters in the inscription. There is a letter that has been crossed out by being filled in after the *y* of *yʿwr*. The *w* and *r* of *yʿwr* are covered by the later hammering. The *r* and *s¹* of the second *frs¹* are carved on another face of the rock and cross the last three letters of KRS 1167.

Commentary:
There is a deep line after the *r* of *'ṯr* and then the letters *ṣ*, *'* and possibly anothe. The shape of the *ġ* is rather doubtful and the *h* at the beginning of the prayer and the *r* of the word *'wr* are covered by abrasions.

By {Ḫzr} son of Nʿrt son of Ḫdmt son of Trml and he found {the traces} ---- and he was distraught with grief he camped here and O Lt {may he be secure}

Commentary:
The crossbar of the third letter is not very clear. The word after *wgd* is on the edge of the rock and difficult to read although the restoration of *ʾṯr* is likely given the context. The beginning of the following word is obscure and the last letter of the inscription is partly covered by an abrasion.

By Wd son of S²ʾm son of Mṭr son of ʾws¹ and he returned to a watering place hungry and cold and so O Lt and Ds²r may he be secure

Commentary:
The word *ḫrṣ* can mean "he was on the look-out" or "he was hungry and cold". Since there is no *w* between *ṣyr* and *ḫrṣ*, *ḫrṣ* describes the circumstances in which "he returned to a watering place", in which case "he was hungry and cold" would seem to be a more appropriate translation, though "keeping watch" is not impossible.

Commentary:
There are two lines and traces of a small curve at the beginning of the text. There is a horixonatyal line at the top of the *lām auctoris* which, however, is different from the other lines in the inscription. The *y* of *rʿy* has a fork at the top as if it is serving as both a *y* and a *h*. The following word seems to read *ʾbg* or *ʾbm*. The second line of the text is very uncertain.

Commentary:
The second letter is faint and there is some lichen over the next letter or letters which makes it difficult to know how it should be read. It seems likely that the author wrote a *r* after the second *g* and then realising that there was not enough room to continue the inscription down towards KRS 1213 wrote another smaller *r* and then, without crossing out the first *r*, continued above KRS 1213.

By ʿlyn son of Rgl son of Ṣʿd son of ʿlyn son of Mrwn and he came to a watering-place and so O {Bʿls^{1}mn} [grant] relief from adversity and uncertainty with {rain}

Commentary:
The second letter is considerably larger than the other ʿ's in the text, but *ʿlyn* seems a more likely reading than glyn. The sequence *rgl bn ṣʿd bn ʿlyn bn [[]] mrwn* occurs in KRS 1124. The author appears to have made a mistake before the fifth name and then crossed out a letter which also seems to be the case in KRS 1124. The sequence *ṣʿd bn ʿlyn bn mrwn* occurs in KRS 1567. The last letter of the deity's name is covered by the scratches over the inscription and the *m* of the last word is damaged by a chip in the rock.

l ġyr'l bn s¹{ʿ}d bn rṯ'l bn bhm bn nẓr bn gḏly bn ʿb{d} bn whbn bn qmr w ḫrṣ f h lt rwḥ

By Ġyr'l son of {s¹wd} son of Rṯ'l son of Bhm son of Nẓr son of Gḏly son of {ʿbd} son of Whbn son of Qmr and he was hungry and cold and so O Lt [grant] relief from adversity and uncertainty

Commentary:
There is a short cross stroke over the corner of the second letter of the second name but it is probably an embellishment of an ʿ rather than the cross stroke of a *w*. The *d* of the seventh name is damaged. The *w* of *whbn* has been embellished with an additional stroke.

Commentary:
There is a step in the rock between *ʾs^{1}lm* and *nhb* and it is possible that a *w* was inscribed very lightly because of the awkwardness of the surface or simply left out. The letter after the *ḍ* is more like a *r*. There are

l bḫ{l}h bn nẓr bn wʿl bn s²zht

By {Bḫlh} son of Nẓr son of Wʿl son of S²zht

Commentary:
The second *l* is a rather short line. The sequence *wgm bn ʾs¹ʾl bn nẓr bn wʿl bn fhzt* reccurs in KRS 1569 and it seems likely that the fourth names in these texts should be read as the same although the readings in both cases are clear and it would assume a metathesis of the middle letters in one of the texts. None of the roots from the possible combinations are attested although *s²hzn* is attested as a man's name in Qatabanian (see DASI).

By ----ʾl son of Bʾs¹h son of {ʿwḏ} {son of} Nks¹ son of ʿmrt son of Ḫrg son of Bḥrmh son of Rfʾt

Commentary:
The beginning of the first name is faint. The third letter of the third name has the appearance of an ʾ with a thin line forming the upper fork. However, it seems most likely that this is a *ḏ* in which the third prong has been rubbed away as has the lower part of the following *b*. l m{ʿ}ll bn h{ḥ{r}m h- b{{k}}rt

By {Mʿll} son of {Hḥrm} is [the drawing of] the {young she-camel}

Commentary:
In KRS 1300, which is below the left camel on the same stone, we find what may well be the same sequence, *mʿll bn hḥrm*. In both cases the *l*'s in the first name have short horizontal lines at their tops, even though the *lām auctoris* does not. In each case too, the ʿ has a medial stroke making it appear like a *w*. The second and third letters of the second name are partly obscured by the drawing. It is possible the third letter is a *r*, although only part of it is showing. A line has been added across the fork of the first *h* possibly in an attempt to change it to a *y*. There is a lightly scratched line turning the *k* into the shape of a *m*.

l ʾl {b}n {s^1}m h- gml

By ʾl son of {s^1}m is [the drawing of] the male camel

Commentary:
The reading of the names is doubtful as the author of KRS 1318 has written over parts of all the letters of the name after the third one. He has probably also hammered round the originally scratched outline of the camel and the *g* and *m* of *gml*. The letter read as *b* has a rather shallow curve and what looks like a fork at one end, though this is probably a mistake. The tail of the *s^1* is rather long. There might be another letter after the first *m* covered by hammering although there is not much room.

By Ġlmt son of Rṭ son S²ʿ is the carving

Commentary:
The *r* of the second name is written to the side and slightly before the *ṭ*. Presumably the author forgot to inscribe it and then added the letter in the largest space available. The name might read *rṭ* or *ṭr* depending on order in which the letters are written.

l s¹bʿ bn gḥfl bn [[]] lbʾt w wgd s¹fr k{m}

By S¹bʿ son of Gḥfl son of Lbʾt and he found the writing of {Km}

Commentary:
There is a circle which has been hammered over before the first letter of the third name. It seems possible that the author began writing *w wgd* and then decided to include the third name and so crossed out the *w*. The final letter is doubtful. It has a tail and it is possible it is a *y*. If the tail is a slip in inscribing the letter

might be a *g* or *m*.

By Bny son of Ẓnʾl son of Tm and he grieved for his father and for his companions and so he was distraught for ever and O S²ʿqm [grant] relief from adversity and uncertainty to {him who} s¹lm ḥll {-k}

Commentary:
The eighth letter has three prongs with a line going across the top. It might be a *y* but the enclosing line is shallower than other lines of the letter and it seems more likely that the letter is a *ḏ* and that the line was added later. The line of the *k* at the end does not continue beyond the curve of the letter probably because it is written on the very edge of the rock. It is possible that the text continues on another face of the rock which was not photographed.

Commentary:
The letter read as ʿ in the word *s²ʿr* has a shallow tail but it is almost certainly incidental. There is a shallow stroke after the first *m* and it is possible it should be read as a *n*. See Al-Jallad 2015: 333 for *qbll*, and 152 for *mʿl ḥwq*.

KRS 1376

l kddh bn ʾny bn bnʾl w twl bql

By Kddh son of ʾny son of Bnʾl and twl the spring herbage

Commentary:
The inscription is surrounded by a cartouche and has been scratched over. A second loop outlining the first has been added to the second *d* of the name *kdd*. The side stroke on the *l* of *twl* is much more lightly cut than the main stroke and is probably an extraneous scratch.

l nẓl bn dḥmt w ḥwb ʿny m{q}bb f h lt rwḥ [m-] bʾs¹

By Nẓl son of Dḥmt w ḥwb ʿny m{q}bb and so O Lt [grant] relief {from} despair

Commentary:
The crossbar of the *q* is written over one side of the circle and it is possible that the line is extraneous and the letter should be read as *g*. It is likely that the author has left out a *m* after *rwḥ*. Parts of the text are written across the cartouche surrounding KRS 1376.

By Rbʿ son of Bqr son of {Rfʾt} son of S²qr son of Rfʾt son of Gml and O {Yṯʿ} blind whoever scratches out [the writing]

Commentary:
The ends of the line of the first *f* have been joined with a curve which gives the letter the appearance of a *m*. The name *s²qr* was presumably left out originally and was then inscribed in between the lines of the first names and final names of the text. No *bn* was added before it. The ʿ of *yṯʿ* is much larger than that of ʿwr, and

does not seem to be a complete circle. But is difficult to see what else can have been intended to be.

Commentary:
Several of the letters in the text have been tampered with. The second letter is a large oval with a line across it. It seems likely, given that the *w*'s of the text are smaller, that the letter should be emended to a *g*. The *r*'s of the first name and the deity's name have been changed to *m*'s. The *n* of *bn* has been altered to a *h*, the first *n* of the second name has been changed to *ṣ*, and the second has been changed to a *t*. The *k* of *ḏkr* and the *b* of *ḥbb* have been altered to *ḥ*'s. There is a line joining the *f* to the following *h*.

Commentary:
The last part of the inscription is written on a second face of the rock and is worn and partly damaged by a chip. On *snfḥt* see KRS 1878 and 1879. The presence of *bql* "spring herbage" in KRS 1879 suggests that *snfḥt* is not a plant but either an animal or a topographical feature.

Commentary:
The author wrote a *w* after the first *h* and then scored over it realising that he had made a mistake. The penultimate letter of the fifth name is very worn and the middle line of the *ḏ* in the eighth is not visible. The cross-lines of the second *ḏ* in the ninth name are faint. By S[2]hyt son of S[2]qq son of S[2]hyt son of ʾs[1] son of {Ḥg} {and} {he pastured} the camels and he returned to a watering place in Nīsān *mwʾ* and so O Bʿls[1]mn [grant] relief from adversity and uncertainty through rain and [grant] security and [inflict] lameness and blindness on whoever scratches out the {carving}

Commentary:
The last letter of the fifth name and the two following letters are damaged by a chip. It seems likely that *g* should be restored at the end of the fifth name given the curve that remains of the letter and the occurrence of the sequence *s*[2]*hyt bn ʾs*[1] *bn ḥg* in KRS 1486, 1489, and 1491. Enough of the following two letters remains to restore *w* and *r* given the context of the next part of the inscription. On the possible spelling of the month name *nīsān* with a *ṣ* see Al-Jallad 2015: 45. If this interpretation is correct, having to go to a place of permanent water in this month (March-April) would be sufficiently unusual (and disastrous) to be worthy of mention. The next word is difficult to interpret. The plural relative pronoun, *ḏw*, is unusual in this formula. Despite the damage, the third letter from the end is clearly a *ʾ* (i.e. one form of the definite article) not a *ḫ*, and author appears to have omitted the *ḫ*.

By {Y}s¹---- son of Ms²ʿr {son of} {S¹wd}

Commentary:
The rock is scratched after the *s¹* but there are traces of letters. There is a circular shape after the *bn* but it is inscribed in a different technique and is most likely extraneous. The multi-scratched cross after the *r* is not part of the inscription and with some abrasions probably covers another *bn* and the first letter of the third name which is probably a *s¹*. l mʿz [[]] bn s¹dʿ w ---- h- bk{r}t w{l}{ʿ}----ḥt w flṭ {m} ----{l}s¹

By Mʿz son of S[1]dʿ w ---- the {young she-camel} w{l}{ʿ}----ḥt w flṭ {m} ----{l}s[1]

Commentary:
The author has crossed out a letter after the *z*. After the first *w* there are traces of letters but it is unclear what they are. The letter read as *r* is doubtful as it does not appear to have two arms. The five letters after the second *w* are damaged by a chip. The *l* and ʿ are doubtful and the following letter might be a *ṯ*, *ṣ*, or *y*. After that, there are two letters of which only the V-shapes of the the forks remain. The end of the inscription runs into the end of KRS 1492 which makes the reading difficult. There is a *d* written over the second *m* and the following *w* should probably be read with KRS 1492 although that leaves a rather large gap in this inscription. The next letter is partially covered by some scratch marks. The following *n* belongs to KRS 1492 and the *l* is connected to the arms of a *b* in KRS 1492 and the *s*[1] is partially covered by the *r* of that text.

l {{ʿ}}r{{s¹}}{{ʿ}} bn ʾnhm b<<>>{{n}} ʾṯw{{b}} w {ṣ}yr m- ġrb s¹nt ḥrb ḥb{q} w ʾs²ll

By {ʾrs¹ʿ} son of ʾnhm {son of} {ʾṯwb} and {he returned to a watering place} from settled lands the year of the war of {Ḥbq} and ʾs²ll

Commentary:
Several letters of the text have been altered. In the first name a loop has been made on one fork of the ʾ forming a *ṣ*, a line has been added in the middle of the *s¹* forming a *ḥ*, and a line has been drawn across the ʿ forming a *w*. There are scratches attached to the *n* of the second name and the *h* of the name has two lightly scratched lines added to one fork of the letter. The lines after the second *b* are difficult to interpret. The *n* seems to be written under the arm of the *b* and attached to it with a line and then there is the form of a *s¹* which might have been added later. A scratched line has been added in the middle of one fork of the next ʾ and the curve of the following *b* has been joined up to form a *m*. The loop of the *ṣ* has been hammered over and only part of the circle of the *q* is visible on the photograph.

l ḏbb bn ----bd'l w wgm ʿl- ḥbb ʿl- yṯʿ qtl

By Ḏbb son of ----bd'l and he grieved for a friend for Yṯʿ [who had been] killed

Commentary:
It is difficult to read the beginning of the second name as there is a slight hammer mark and scratching over the letter. The sequence *ḏbb bn bd'l* occurs in the genealogy of KRS 710 and *ḏbb bn byd'l* occurs in KRS 519 and 520. It is possible the author wrote a letter and then scratched it out. This inscription and KRS 1511-1513 are surrounded by a cartouche.

l {l}f{ṯ} {{b}}n bḥḍh

By {Lfṯ} son of Bḥḍh

Commentary:
The reading of the inscription is difficult and it seems possible that some of the letters might have been changed although there is little difference in the technique of the additions that might have been made to create the changes. The second and third letters seem to have been joined but it is unclear whether the second letter should be read as a *l* or a *n* with a slightly longer ligature. The fourth letter might be an ʿ with a second circle added later. If these corrections are right then the first name would read *nf*ˣ. The following letter should probably be read as a *b* with the shorter prong having been added later.

By Mks¹r {son of} {Nḏr} and {he pastured} {the} stony tracts {whilst migrating with tribe}

Commentary:
It seems likely that a number of the letters have been tampered with but it is extremely difficult from the lines of the text to be sure how the original letters should be read. The *b* and *n* of the first *bn* are joined. The following n has been hammered over. The prongs of the *ḏ* have been joined up and a line and circles seem to have been added to the arms of the *r*. An additional line has been added to the middle of the third *r* possibly joining it to a ʿ in the form of a dot. It is possible that the next letter should be read as a *ṣ*, but there is a hammer mark over one line of the fork and it seems more likely that it should be read as a *y*. The next letter might be a *ṣ* or a *h*. The third *n* is attached to the arm of the preceding *r*. The crossbar of the *w* is rather carelessly hammered and the final letter might be a *ṯ*, although the second dot at the end of the line is rather carelessly done.

Commentary:
The first name is carved in much larger letters than the rest of the text. The reading of some of the most crucial parts of the inscription are doubtful. After the first *h* the depth of some of the lines of the letters suggest that they have been altered. It seems likely that the letter after the *h* should be read as a *s¹* which has been turned 90°. That it is not an *h* is suggested by the fact that the fork is much deeper that those of the other two *h*'s in the text and the tail of the letter is not so long. The letter has a circle but it is not as carefully cut as the other lines of the letter and is shallower and it seems likely that it was added later to turn the letter into a *ṣ*. The following letters are difficult to interpret. They are both the same and consist of lines with a slight curve at one end. They are too short to be *l*'s and are different shapes from the *b*'s and *r*'s in the text which are respectively deep curves and lines with distinct arms. It seems most likely that they should be read as *n*'s. As with the previous letter, it seems that they have been changed in this case to a *r* and a *d* by the addition of arms to the first and a loop added to the middle of the second. It appears possible therefore that *s¹nn* was what was originally carved and that it was then changed to *ṣrd*. After the second *ḥ*, the *n* was incised almost touching the arms of the preceding *r* but there does seem to be a sufficient gap to be certain of this interpretation. For the interpretation of *s¹nn* here and perhaps in KRS 1701, cf. Arabic *sanan* "a way, beaten track" (Lane 1438c).
