The name "Rijm Qaʿqūl" was applied by nineteenth-century travellers to at least four large outcrops at the southern end of the Ruḥba, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the "Rijm Qaʿqūl" copies of de Vogüé, Wetzstein and Dussaud & Macler, and only in a very few cases between those of de Vogüé and Waddington who were travelling together. The probability that there were multiple cairns with this name is supported by the fact that that while Waddington wrote that it was 10 minutes [ride] from al-ʿUdaysīyah to Riğm Qaʿqūl, Dussaud & Macler say that the journey between the two took 30 minutes. In 1995, the Safaitic Epigraphic Survey Programme identified the sites visited by Wetzstein and by Dusaud & Macler but did not find those where de Vogüé and Waddington had worked. The inscriptions found at Riğm Qaʿqūl "A" were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Rijm Qaʿqūl". Note that the co-ordinates given here are very approximate.

Provenance:
Riğm Qaʿqūl, Rif Dimashq, Syria
[Latitude/Longitude: 32.97958 / 37.32001]
The name "Rijm Qaʿqūl" was applied by nineteenth-century travellers to at least four large outcrops at the southern end of the Ruḥba, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the "Rijm Qaʿqūl" copies of de Vogüé, Wetzstein and Dussaud & Macler, and only in a very few cases between those of de Vogüé and Waddington who were travelling together. The probability that there were multiple cairns with this name is supported by the fact that that while Waddington wrote that it was 10 minutes [ride] from al-ʿUdaysīyah to Riğm Qaʿqūl, Dussaud & Macler say that the journey between the two took 30 minutes. In 1995, the Safaitic Epigraphic Survey Programme identified the sites visited by Wetzstein and by Dusaud & Macler but did not find those where de Vogüé and Waddington had worked. The inscriptions found at Riğm Qaʿqūl "A" were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Rijm Qaʿqūl". Note that the co-ordinates given here are very approximate.

C 1375 (Dussaud V 99)

l mrʾ bn ʾnʾl bn ʿbh bn dd bn ġrt bn ʾbt bn rh----

By Mrʾ son of ʾnʾl son of ʿbh son of Dd son of Ġrt son of ʾbt son of Rh

Provenance:
Riğm Qaʿqūl, Rif Dimashq, Syria
[Latitude/Longitude: 32.97958 / 37.32001]
The name "Rijm Qaʿqūl" was applied by nineteenth-century travellers to at least four large outcrops at the southern end of the Ruḥba, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the "Rijm Qaʿqūl" copies of de Vogüé, Wetzstein and Dussaud & Macler, and only in a very few cases between those of de Vogüé and Waddington who were travelling together. The probability that there were multiple cairns with this name is supported by the fact that that while Waddington wrote that it was 10 minutes [ride] from al-ʿUdaysīyah to Riğm Qaʿqūl, Dussaud & Macler say that the journey between the two took 30 minutes. In 1995, the Safaitic Epigraphic Survey Programme identified the sites visited by Wetzstein and by Dusaud & Macler but did not find those where de Vogüé and Waddington had worked. The inscriptions found at Riğm Qaʿqūl "A" were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Rijm Qaʿqūl". Note that the co-ordinates given here are very approximate.

C 1389 (Dussaud V 110)

l gd bn wʿ{l}

By Gd son of Wʿl

Provenance:
Riğm Qaʿqūl, Rif Dimashq, Syria
[Latitude/Longitude: 32.97958 / 37.32001]
The name "Rijm Qaʿqūl" was applied by nineteenth-century travellers to at least four large outcrops at the southern end of the Ruḥba, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the "Rijm Qaʿqūl" copies of de Vogüé, Wetzstein and Dussaud & Macler, and only in a very few cases between those of de Vogüé and Waddington who were travelling together. The probability that there were multiple cairns with this name is supported by the fact that that while Waddington wrote that it was 10 minutes [ride] from al-ʿUdaysīyah to Riğm Qaʿqūl, Dussaud & Macler say that the journey between the two took 30 minutes. In 1995, the Safaitic Epigraphic Survey Programme identified the sites visited by Wetzstein and by Dusaud & Macler but did not find those where de Vogüé and Waddington had worked. The inscriptions found at Riğm Qaʿqūl "A" were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Rijm Qaʿqūl". Note that the co-ordinates given here are very approximate.

Riǧm Qaʿqūl, Rif Dimashq, Syria
[Latitude/Longitude: 32.97958 / 37.32001]
The name "Rijm Qaʿqūl" was applied by nineteenth-century travellers to at least four large outcrops at the southern end of the Ruḥba, to the south and south-west of the modern water tower. This helps to explain the curious fact that there is no overlapping between the "Rijm Qaʿqūl" copies of de Vogüé, Wetzstein and Dussaud & Macler, and only in a very few cases between those of de Vogüé and Waddington who were travelling together. The probability that there were multiple cairns with this name is supported by the fact that that while Waddington wrote that it was 10 minutes [ride] from al-ʿUdaysīyah to Riǧm Qaʿqūl, Dussaud & Macler say that the journey between the two took 30 minutes. In 1995, the Safaitic Epigraphic Survey Programme identified the sites visited by Wetzstein and by Dusaud & Macler but did not find those where de Vogüé and Waddington had worked. The inscriptions found at Riǧm Qaʿqūl "A" were all texts copied by Wetzstein and no one else. It is likely therefore that this is the place he regarded as "Rijm Qaʿqūl". Note that the co-ordinates given here are very approximate.

Provenance:
On the right (= east) bank of Wādī al-Gharz near its debouchment into the Ruḥbah., Rif Dimashq, Syria [Latitude/Longitude: 32.953 / 37.294]
Dussaud & Macler (1901: 104) say that these inscriptions (Dussaud V 312–392) come from right bank of Wādī al-Gharz. C is therefore incorrect in placing them "beside the track from Wādī al-Gharz to Khirbat al-Hubayrīyah. Note that C spells the latter with an initial "Ḥ", whereas according to geonames.org it should be "H".

By Knt son of Zʿq son of Ltn

Provenance:
On the right (= east) bank of Wādī al-Gharz near its debouchment into the Ruḥbah., Rif Dimashq, Syria [Latitude/Longitude: 32.953 / 37.294]
Dussaud & Macler (1901: 104) say that these inscriptions (Dussaud V 312–392) come from right bank of Wādī al-Gharz. C is therefore incorrect in placing them "beside the track from Wādī al-Gharz to Khirbat al-Hubayrīyah. Note that C spells the latter with an initial "Ḥ", whereas according to geonames.org it should be "H".

C 1459 (Dussaud V 351 c, d, e)

[l] ngm

By Ngm

Provenance:
On the right (= east) bank of Wādī al-Gharz near its debouchment into the Ruḥbah., Rif Dimashq, Syria [Latitude/Longitude: 32.953 / 37.294]
Dussaud & Macler (1901: 104) say that these inscriptions (Dussaud V 312–392) come from right bank of Wādī al-Gharz. C is therefore incorrect in placing them "beside the track from Wādī al-Gharz to Khirbat al-Hubayrīyah. Note that C spells the latter with an initial "Ḥ", whereas according to geonames.org it should be "H".

C 1479 (Dussaud V 387)

l ’{s^1} bn m{l}k

By ’s^1 son of Mlk

Provenance:
On the right (= east) bank of Wādī al-Gharz near its debouchment into the Ruḥbah., Rif Dimashq, Syria [Latitude/Longitude: 32.953 / 37.294]
Dussaud & Macler (1901: 104) say that these inscriptions (Dussaud V 312–392) come from right bank of Wādī al-Gharz. C is therefore incorrect in placing them "beside the track from Wādī al-Gharz to Khirbat al-Hubayrīyah. Note that C spells the latter with an initial "Ḥ", whereas according to geonames.org it should be "H".

C 1487 (Dunand 309)

l ḫyḏt bn ḫ{b}ṯ bn s¹mk bn s¹w{r}

By Ḫyḏt son of {Ḫbṯ} son of S¹mk son of {S¹wr}

Provenance:
Zalaf (a) "Camp Krazinski"., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. The Safaitic Epigraphic Survey Programme in 1995 was unable to locate the camp which C calls "Camp Kraziniski" (Zalaf (a)).

C 1577 (Dunand 344)

l mṭr bn ḥg

By Mṭr son of Ḥg

Provenance:
Zalaf (b) "Near the track leading to Ǧabal Says" (C p. 209)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ğabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

C 1607 (Dunand 363 a)

l ḫlf bn nʿmn bn kn w wlh ʿl- gs² [-h] ḏ ḥ{r}bn f h lt ṯʾr

By Ḫlf son of Nʿmn son of Kn and he was distraught over {his} troop who were {plundered}, so, O Lt, he will have vengeance.

Apparatus Criticus:
C: l ḫlf bn nʿmn bn kn w wlh ʿl- gs² {-h} ḏ ḥ{r}bn f h lt ṯʾr

Provenance:
Zalaf (b) "Near the track leading to Ǧabal Says" (C p. 209)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

By Gn son of ʾnʿm

Provenance:
Zalaf (b) "Near the track leading to Ǧabal Says" (C p. 209)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

C 1638 (Dunand 376 b)

l khl bn ʾʿfr

By Khl son of ʾʿfr

Provenance:
Zalaf (b) "Near the track leading to Ǧabal Says" (C p. 209)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ğabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

C 1667 (Dunand 395 a)

l tmn bn hʿwḏ bn ḥkm bn ʾḥs¹n bn ẓlm bn bdn w rʿy h- rḥbt s²yḥ

By Tmn son of Hʿwḏ son of Ḥkm son of ʾḥs¹n son of Ẓlm son of Bdn and he pastured the raḥaba in a time of dearth

Apparatus Criticus:
C: *ʾḥs¹{l}* for *ʾḥs¹n*; *s²yḥ* "he returned (?)" for *s²yḥ* "in a time of dearth"

NAEN I p. 23 32 n.4: w rʿy h- rḥbt - he pastured this *raḥabah*.

Provenance:
Zalaf (b) "Near the track leading to Ǧabal Says" (C p. 209)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl,

but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

C 1696 (Dunand 412)

l s¹wr bn ġyrʾl bn ġḍḍt bn ʿm bn ʿly bn ḥḍg bn s¹wr ----

By S¹wr son of Ġyrʾl son of Ġḍḍt son of ʿm son of ʿly son of Ḥḍg son of S¹wr

Provenance:
Zalaf (b) "Near the track leading to Ǧabal Says" (C p. 209)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" covers a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which "track leading to Ǧabal Says" the Dunands meant, or whereabouts near this track, they found these inscriptions.

C 1711 (Dunand 420 d)

l ṯlg bn tm bn rġḍ bn mḥlm bn nkf bn ṣ'r

By Ṯlg son of Tm son of Rġḍ son of Mḥlm son of Nkf son of Ṣ'r

Provenance:
Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names

Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

C: *h- hgr b-ʾqhwn* "the camels in ʾqḥwn" for *hgrbʾqḥwn*

Provenance:
Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

C 1798 (Dunand 463 b)

l s¹ʿd bn mlk

By S¹ʿd son of Mlk

Provenance:
Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

C 1827 (Dunand 476 b)

l rqʿ bn grm bn wkyt

By Rqʿ son of Grm son of Wkyt

Provenance:
Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

C: *ḫrṣ -h yn* "Yn waited for him" for *ḫrṣ {ṣ}y{r}*; *ḫḍʿ () m- {l}*t "and may he be humiliated by Lt" for *ḫḍʿ nmġt* "humble *nmġt*"

Provenance:
Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names

Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

C 1856 (Dunand 490)

l rb bn {ġ}{z}lt bn s²rk w wgm ʿl- ---- f h lt s¹lm

By Rb son of Ġzlt son of S²rk and he grieved for ---- and so O Lt may he be secure

Apparatus Criticus:
C: *ʿl- {l}wlb* for *ʿl- ----*

Provenance:
Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

C 1869 (Dunand 498 b)

l ḥny{k}

By Ḥnyk

Provenance:
Zalaf (c) "To the south of Zalaf in a place near the larger *khabrah* [a depression in the plain where water gathers] or *Khabrah kubrā* [?]" (C p. 225)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify the "place near the larger khabrah".

C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 1913 (Dunand 527 d)

l ḏb

By Ḏb

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 1942 (Dunand 537)

l ʾs¹ bn mʿn bn s²ḥ{l} bn ʾḥrb

By ʾs¹ son of Mʿn son of S²ḥl son of ʾḥrb

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 1956 (Dunand 544)

l s¹ʿd bn ʾlwhb

By S¹ʿd son of ʾlwhb

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 1986 (Dunand 562)

l ʾdd bn rbḥ h- ḍrḥ bn ḥr{t} bn ḥs¹d

For ʾdd son of Rbḥ is the grave son of {Ḥrt} son of Ḥs¹d

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 2000 (Dunand 662 c)

l ḥlbt

By Ḥlbt

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 2015 (Dunand 668 a)

l ẓnn bn s^{1}ʿ{d} bn m{s^{1}}

By Ẓnn son of {S^{1}ʿd} son of {Ms^{1}}

Apparatus Criticus:
C: *m{g}* for *m{s^{1}}*

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

By son of Lwh son of ʾs¹ son of ʾqwm ----Mn son of Whbʾl son of Nġbr son of Grmʾl son of ʿbṭ and he spent the night here in the season of the later rains and so O Lt may he be secure and [inflict] blindness {on} whoever scratches out the inscription

Apparatus Criticus:
C: *l ----{l}{ʿ}h* for *l ---- {b}n*; *[b][n] [l][ʿ][t]mn* for *----mn*;

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 2059 (Dunand 692 a)

l qdmʾl bn s¹{r}y bn hngs²

By Qdmʾl son of S¹ry son of Hngs²

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

l grs¹ bn ḫb(ṯ)t bn ḥzn w nqmt yṯʿ m- s²n'

By Grs¹ son of Ḫbṯt son of Ḥzn and [grant] booty Yṯʿ from enemies

Apparatus Criticus:
C: *ḫb(l)t* for *ḫb{ṯ}t*

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

C 2076 (Dunand 704)

l lṯ fty gʿd bn ʿbṯn w s¹rt ʿl- {ḥ}d{d} ʾbgr b- ʾlf rgl w mʾt f[r]s¹ w tnẓr h- s¹my b- h- d{r} f h lt r{w}ḥ w h bʿls¹{m}[n] ----

By Lṯ slave boy of Gʿd son of ʿbṯn and he served [in an army unit] on the {borders} of ʾbgr with a thousand foot soldiers and a hundred {horsemen} and he waited for the rains in this {place} so, O Lt, [grant] {relief}, and O {Bʿls¹mn} ----

Apparatus Criticus:
C: *l lṯ [b][n] fty [b][n] {w}ʿd bn ʿbṯn w s¹rt ʿl- (ṣ)dqʾl {w} rbʾl f rʿl w m(y)t f [n]s¹ w tnfr h- s¹my b- h- d{r} f h lt r{w}ḥ w h bʿls¹{m}[n]* ---- "By Lṯ {son of} Fty {son of} {Wʿd} son of ʿbṯn and a sign for {Ṣdqʾl} {and} Rbʾl and he was pierced and {died} and S¹mt [should be S¹my] left and fled near this place [?] and O Lt relief {and} O Bʿls¹m[n]---- "

Al-Jallad 2015: 235: *w s¹rt ʿl- {ḥ}dq ʾbgr* "and he served in a troop against the {walled enclosure} of ʾbgr"

Commentary:
Safaitic graffiti by slaves are relatively common and they give their personal name but the genealogy of their master. On *s¹rt* meaning "to serve in an army unit" see Macdonald 2014: 159–160, and n. 78. The "borders of ʾbgr" could refer to the territory of Edessa which had a series of kings named Abgar. It is interesting that slaves also served in army units. See also KRS 1024 and RQ.A 10 for examples where *s¹rt ʿl-* means "served in an army unit under [someone]".

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C 2088 (Dunand 709 b)

l {ṣ}ʿd bn zḥk bn ms^{2}ʿr w {k}lʾ h- nḫl ḫms^{1} ws^{1}q

By {Ṣʿd} son of Zḥk son of Ms^{2}ʿr and {detained} five mobs of driven cattle in the valley.

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

By Ks¹ṭ son of Gḥr son of Wrd son of Ks¹ṭ son of ʿbdhm and he found the inscription of Whbʾl and so he yearned

Apparatus Criticus:
C: *bn w(r)(d) (b)(n) ḥr bn wrd* for *bn g()ḥr bn {w}rd*

Provenance:
Zalaf (d) "On the right of the track leading to the Ruḥbah" (C p. 249)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which of the many tracks leading to the Ruḥbāh, this is.

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

C 2164 (Dunand 611)

l mlk bn rġy

By Mlk son of Rġy

Provenance:
Zalaf (e) "On the right of the track leading to Damascus" (C p. 279)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

C 2179 (Dunand 1227 c)

l tẓm bn s¹ʿd bn fʿl

By Tẓm son of S¹ʿd son of Fʿl

Provenance:
Zalaf (e) "On the right of the track leading to Damascus" (C p. 279)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

C 2194 (Dunand 621 a)

l rkb bn ẓn bn ʿnmt bn ʾmʿḍ bn nyn bn ʾdm w ḫrṣ f {h} yʾ{l}t nqmt m- s^{2}nʾ w ----

By Rkb son of Ẓn son of ʿnmt son of ʾmʿḍ son of Nyn son of ʾdm and he was on the look-out and so O Yʾlt [grant] booty from enemies *w* ----

Provenance:
Zalaf (e) "On the right of the track leading to Damascus" (C p. 279)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the

descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

C 2209 (Dunand 625 a)

l gd bn frs¹ ḏ- ʾl {ḍ}f f twqy b- s¹nt ḥrb yẓr

By Gd son of Frs¹ of the lineage of {Ḍf}, so may he preserve himself during the year of the war of Yẓr.

Apparatus Criticus:
C: l gd bn frs¹ ḏ- ʾl gf f twqy b- s¹nt ḥrb yẓr

Provenance:
Zalaf (e) "On the right of the track leading to Damascus" (C p. 279)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

C 2224 (Dunand 576 a)

l qtl bn ʿ(z)hm ----

By Qtl son of {ʿzhm} ----

Apparatus Criticus:
C: *w (ḫ){r}ṣ* for ----

Provenance:
Zalaf (f) "In the neighbourhood of Zalaf, on the west side of the track leading to Damascus " (C p. 291)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is impossible at this stage to identify which track leading to Damascus, this is.

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Unfortunately, it is not known whether the modern road which runs past Zalaf and al-Namārah follows the track mentioned here, or where to the east of it the inscriptions may have been found.

C 2268 (Dunand 632 c)

l ʾġny w nyk s¹lm ḏ- ʾl gḏl qd

By ʾġny and he had sex with S¹lm of the lineage of Gḏl Qd

Apparatus Criticus:
C: l ʾġny w ny {b—} s¹lm ḏ- ʾl gḏl qd

Provenance:
Zalaf (h) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the east side" (C p. 296)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman.

Latitude: southern end of the road approximately 32.9035, northern end approximately 32.9504
Longitude: southern end of the road approximately 37.2962, northern end approximately 37.2951

References:

C 2269 (Dussaud V 218; Dunand 637)

l {ḥ}y bn {r}qf

By {Ḥy} son of {Rqf}

Apparatus Criticus:
C: *bqs²* for *{r}qf*

Provenance:
Zalaf (h) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the east side" (C p. 296)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman. According to Dussaud & Macler (1901: 86), this inscription was found "on the way from the mouth of the Wādī al-Gharz" [i.e. the southern end of the Ruḥbah] heading towards al-Namārah, which would suggest they were following the "Roman" road], "after an hour's walk, on the right [west] of the road".

Latitude: southern end of the road approximately 32.9035, northern end approximately 32.9504
Longitude: southern end of the road approximately 37.2962, northern end approximately 37.2951

C 2275 (Waddington 192 b; Wetzstein 216; Dussaud V 205 b; Dunand 641 b)

l s¹ʿr bn ʾḥlm

By S¹ʿr son of ʾḥlm

Provenance:
Zalaf (h) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the east side" (C p. 296)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman. According to Wetzstein (Grimme 1929: 93), these texts were found "on the track between al-ʿUdaysīyah and al-Namārah, and according to Dussaud & Macler (1901: 86), they were found "on the way from the mouth of the Wādī al-Gharz" [i.e. the southern end of the Ruḥbah] heading towards al-Namārah", which would suggest they were following the "Roman" road, "after an hour's walk, on the right [west] of the road".

Latitude: southern end of the road approximately 32.9035, northern end approximately 32.9504
Longitude: southern end of the road approximately 37.2962, northern end approximately 37.2951

l ʿwḏ bn ġnm bn {l}ḏn bn s²mt bn ġnm bn ʾnʿm bn ʾ{s¹} w rʿy h- mʿzy f h lt s¹lm m- bʾs¹ {w} nqʿṣ l- mn ḏ ḫbl h- s¹fr

By ʿwḏ son of Ġnm son of {Lḏn} son of S²mt son of Ġnm son of ʾnʿm son of {ʾs¹} and he pastured the goats, so, O Lt, let there be security against misfortune {and} may whosoever would obscure this writing experience a sudden death.

Provenance:
Zalaf (i) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the west side" (C p. 298)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman.

C 2284 (Dunand 644 e)

l ʿlg bn lʿṯmn w wgm ʿl- ks¹ṭ rġm mny

By ʿlg son of Lʿṯmn and he grieved for Ks^{1}ṭ struck down by Fate

Apparatus Criticus:
C: *rs^{2}m mny* "he is dead" for *rġm mny* "struck down by Fate"

Provenance:
Zalaf (i) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the west side" (C p. 298)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman.

Latitude: southern end of the road approximately 32.9035, northern end approximately 32.9504
Longitude: southern end of the road approximately 37.2962, northern end approximately 37.2951

C 2293 (Dunand 646 g)

l ḫḏm bn ʿg

By Ḫḏm son of ʿg

Provenance:
Zalaf (i) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the west side" (C p. 298)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman.

Latitude: southern end of the road approximately 32.9035, northern end approximately 32.9504
Longitude: southern end of the road approximately 37.2962, northern end approximately 37.2951

C 2302 (Dunand 650 a)

l s¹wdn bn ʿdyn

By S¹wdn son of ʿdyn

Provenance:
Zalaf (i) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the west side" (C p. 298)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman.

Latitude: southern end of the road approximately 32.9035, northern end approximately 32.9504
Longitude: southern end of the road approximately 37.2962, northern end approximately 37.2951

C 2311 (Dunand 655 a)

l wḥs² bn ḥddn bn ʾnʿm w r{ʿ}y h- mʿ{z}{y}

By Wḥs² son of Ḥddn son of ʾnʿm he {pastured} the {goats}

Provenance:
Zalaf (i) "Near the Roman road leading from al-Namārah to the Ruḥbah, on the west side" (C p. 298)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9035 / 37.2962]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate. Approximately, 1.90 km north of the "island" of al-Namārah there is a stone-built barrier, approximately 750 m long from which a wide track cleared of stones runs roughly northwards for approximately 5.6 km to the southern edge of the Ruḥbah. The road was first discovered by C.C. Graham (1858: 239 and map) and was discussed by von Oppenheim (1899–1900, i: 225–226) and Poidebard (1928: 119, fig. 1, pl. XL). There is no firm evidence that it is Roman.

Latitude: southern end of the road approximately 32.9035, northern end approximately 32.9504
Longitude: southern end of the road approximately 37.2962, northern end approximately 37.2951

C 2322 (Dunand 3)

l ʿ{ṣ}ṣ bn qṭʿn bn hgml

By ʿṣṣ son of Qṭʿn son of Hgml

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2339 (Dunand 13 a)

l rb[b][n] bn bʿḏ{ʾ}

By Rbbn {son} of {Bʿḏʾ}

Apparatus Criticus:
C: l rbbn bn bʿḏ{h}

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2355 (Dunand 20)

l {ʾ}qf

By ʾqf

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2434 (Dunand 64)

l bʿdʾl

By Bʿdʾl

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2450 (Dunand 70 c)

l s¹lm bn ʾḫḏ

By S¹lm son of ʾḫḏ

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C: *ẓ(n)n* for *ẓhn*; *w bʾ s²h* "and he brought back the sheep"

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2528 (Dunand 121 a)

l rfʿt bn bʾ(ḥ)(l)

By Rfʿt son of {Bʾḥl}

Apparatus Criticus:
C: l rfʿt bn bʾ(s^1)(h)

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2543 (Dunand 130)

l ġlm bn ḥmyt

By Ġlm son of Ḥmyt

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

Clark 1979: *kṯbt*.

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2586 (Dunand 159 b)

l ʿdy bn mty bn mr b[n] ʿḏhl

By ʿdy son of Mty son of Mr {son of} ʿḏhl

Apparatus Criticus:
C: l ʿdy bn mty bn mr b[n] lʿḏ h- {d}[r]

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2616 (Dunand 173a)

l rṯ'l bn ḥnn bn {z}bdy w wgm ʿl- nr w ʿl- ṣfw[n]

By Rṯ'l son of Ḥnn son of {Zbdy} and he grieved for Nr and for Ṣfwn

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riǧm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

C 2630 (Dunand 179)

l ḥ{n}n bn ms¹k bn (ʾ)(ṣ)ḥ{y}

By Ḥnn son of Ms¹k son of ʾṣḥy

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.

[l] nr bn ẓnn bn kmd bn m{b}ny bn s¹r bn ṣbḥ b[n] qs²m bn s¹ry bn hngs² bn whbn bn ʿ{b}{d} bn qmr bn ʿḏ

{By} Nr son of Ẓnn son of Kmd son of Mbny son of S¹r son of Ṣbḥ son of Qs²m son of S¹ry son of Hngs² son of Whbn son of {ʿbd} son of Qmr son of ʿḏ

Apparatus Criticus:
C: [l] {n}{s¹}r bn ẓnn bn kmd bn m{ġ}ny bn s¹r bn ṣbḥ b[n] qs²m bn s¹ry bn hngs² bn whbn bn ʿ{d}y bn qmr bn ʿḏ

Provenance:
Zalaf (j) "In the neighbourhood of Zalaf, near Wādī al-Shām " (C p. 304)., Rif Dimashq, Syria
[Latitude/Longitude: 32.9269 / 37.3296]
Zalaf itself consists of three, or possibly more, wells and some trees, but the Dunands used its name to cover a large area surrounding the place itself. This is subdivided into areas to which we have given the names Zalaf (a) to Zalaf (m). C (p. 199), following the Dunands, says that Zalaf is about 10 km south of Riğm Qaʿqūl, but in fact it is more like 5.5 km to the south-south-west. Since "Zalaf" is used in C of a wide area, and the descriptions of the sub-areas are often very vague, the co-ordinates given here are necessarily approximate.
