KRS 1575

l ḫl bn ḏrh {{b}}{{n}} s²{{b}}{{k}}y {{b}}{{n}} gm{l} w h yṯʿ flṭ l- ʿlgt -h

By Ḫl son of Ḏrh {son of} {S²bky} {son of} {Gml} and O Yṯʿ [grant] deliverance to his *ʿlgt*

Commentary:
The second and fourth *b*'s are attached by scratched lines to the *n*'s that follow turning them into circle shapes. After the *s²* there are two circles, the second with a tail. Although it is difficult to tell from the incised lines whether they have been tampered with, it seems from changes made to the other letters that the first circle was originally a *b* and the second was a *k* and in both cases the arms of the letters have been closed by the addition of a line. The last letter of the fourth name consists of two lines drawn parallel to one another. The sequence *ḏrh bn s²bky bn gml* occurs in KRS 1792 and *s²bky bn gml* in KRS 902.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 1585

l frʾ bn ʿll h- ʾtn w h- gr

By Frʾ son of ʿll is [the drawing of] the she-ass and the snare

Commentary:
For *gr* perhaps see Lane 400c *ǧurrah* "a piece of wood about a cubit long having a snare at the head and a cord at the middle with which gazelles are caught". If this interpretation of *gr* is correct it is not clear whether the she-ass is wild and snared on purpose or a domestic one and snared by accident.

KRS 1602

l {{w}}hb {{b}}{{n}} {{b}}{{n}}h {{b}}{{n}} ʿmy b{{n}} {{s¹}}wd h- ġ{{l}}mt

By {Whb} {son of} {Bnh} {son of} ʿmy {son of} {S¹wd} is [the drawing of] the {slave girl}

Commentary:
Incised vertically down the left edge of the face. Several letters appear to have been altered or joined together obscuring the sense of the text. It seems possible that the second letter is a *w* and lines have been added giving it the appearance of a *q*. The *h* has been joined to the following *b* by inscribing the back of the latter along the line of the *h*. The following *b* and *n* have been joined together as have the *b* and *n* of the second name. The next *b* and *n* have been joined together and a cross line has been added to form a *w*. The *n* of the next *bn* has been joined to the first letter of the fourth name giving it the appearance of a *ḥ*. A line has been added to the *l* after *ġ* giving it the appearance of a *s¹*. All four inscriptions on the rock claim the drawing.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

---

KRS 1604

{{l}} ḫmṯt w ʿṯrt hʿṯm ---- ġ{{l}}mt

{By} {Ḫmṯt} *w ʿṯrt hʿṯm* ---- {slave girl}

Commentary:
Incised vertically immediately to the left of the woman's body. The rock is rubbed between the second *m* and the *ġ*. The *l* of the last word seems to have been changed to a s^1 as in KRS 1603. All four inscriptions on the rock claim the drawing.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022233.html

---

KRS 1605

l s^2*ʿl bn ḥrf ʾ- ġlm[t]*

By S^2ʿl son of Ḥrf is [the drawing of] the {slave girl}

Commentary:
Incised vertically immediately to the right of the woman's body. There is a line going through the second *l* but it is shallower than the other lines of the text and is probably incidental. The rock is damaged after the *m* but there is a short line visible and it seems likely that a *t* should be restored at the end. All four inscriptions on the rock claim the drawing.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 1610

---- *bn tm h- nʿmt*

---- son of tm is [the drawing of] the ostrich

Commentary:
Incised down the right edge of the face. The first part of the inscription is covered by rubbing and lines. The use of the word *nʿmt* here implies that the author is claiming only one of the ostriches, in contrast to the author of KRS 1607 who uses the collective.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

---

KRS 1621

l m{{ʾ}}{ṣ} bn nqḍ {ṯ}w{ṣ}

By {Mʾṣ} son of Nqḍ *ṯw{ṣ}*

Commentary:
The third letter is a line with an infilled circle at one end and infilling or destructive hammering at the other end. Originally it might have been an ʾ, *ṯ*, ṣ, *h*, or *y*. The next letter might be a *ṣ* but the way the loop is attached to the line and the slightly rougher technique used in inscribing the fork suggest that both might have been added later and that the original letter was a *l*. The third letter from the end looks like a *ṯ* but again, from the texture of the line of one loop, it is possible that it was a *ṣ* and the fork has been closed up. The last letter has the form of a *ṣ* but the fork is rather doubtful and it is possible that it was added later to what was originally a *y*. It is difficult to be certain about these changes but if the interpretation is correct then the word at the end would read *ṣwy* "he built a cairn". The reading *ṯwṣ* at the end is difficult to explain.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Wadi Abyad

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 1622

l mʿd b{n} {ḫ}{l} b{n} ʾ{l}b

By Mʿd {son of} {Ḫl} {son of} {ʾlb}

Commentary:
The above is one possible interpretation of the inscription as the letters are crudely hammered and the author appears to have attempted to join them together. The circular shape after the fourth letter is probably a *b* and *n* joined together. The next letter might be a *ḫ* or a *t* and the following line a *l* attached to a *b*. The next letter is probably a *n* with a hammer mark attaching it to the back of the *d*. After the ʾ there is a straight line, possibly a *l*, joined slightly to one fork of the ʾ and then joined to the next letter which is a *b*.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Wadi Abyad

KRS 1657

l ʾmrt bn {ʾ}w---- bn ʿbd

By ʾmrt son of {ʾw----} son of ʿbd

Commentary:
One prong of the second ʾ is doubtful and the letter after the *w* is very uncertain.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022286.html

---

KRS 1658

l ts¹lm w h- rgm

For Ts^{1}lm and the cairn [is for him]

Commentary:
There is part of a cartouche visible in the photograph surrounding this inscription KRS 1659 and part of KRS 1662.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022287.html

---

KRS 1659

l ḫlf bn ms^{1}k w rʿ[y]

By Ḫlf son of Ms^{1}k and {he pastured}

Commentary:
The last part of the inscription is too faint to be read from the photograph. It seems likely however that *rʿy* should be restored.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022288.html

---

KRS 1660

l ʾs^{1} bn rfʾt bn n----m ----t----

By ʾs^{1} son of Rfʾt son of N----m----t----

Commentary:
There is possibly an ʿ after the third *n* and then two lines are visible after the *m*. It is possible the inscription continues as there are faint traces after the *t*.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022289.html

---

KRS 1661

<<>> l nʿmn bn ----d----

By nʿmn bn----d----

Commentary:
There is a *m* before the beginning of the text which presumably was a mistake. Some lines are visible after the *bn* and further lines after the *d* possibly a *b* and a *n*. The inscription might continue but the rock is very worn and nothing is legible.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022290.html

---

KRS 1662

l ms^{1}k bn ġzlt bn s^{2}rk w wgm ʿl- ʾnʿm w ʿl- ṣʿd w ʿl- nẓr w rʿy h- ḏʾn f h lt s^{1}lm

By Ms^{1}k son of Ġzlt son of S^{2}rk and he grieved for ʾnʿm and for Ṣʿd and for Nẓr and he pastured the sheep and so O Lt may he be secure

Commentary:
The last part of the inscription is written inside the cartouche surrounding KRS 1658-1659.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022291.html

---

KRS 1663

l ms^{1}k bn ḥyn bn wʿl h- ḫṭṭ

By Ms^{1}k son of Ḥyn son of Wʿl is the carving

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 1664

<<> l ʾ{f} {ḃ}n bn bnhlh bn s^{1}wd bn mlk

By {ʾf} {son of} Bnhlh son of S^{1}wd bn Mlk

Commentary:
Part of the wavy line of the *f* is not visible as the rock is worn. The first *b* is a rather long line with a very shallow curve.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022293.html

---

KRS 1665

l b{ʿ}

By Bʿ

Commentary:
There are several possible interpretations of the text. The small dot between the arms of the *b* might be an ʿ or it might be extraneous. If the latter then the letters might be a false start at KRS 1666 or they might be the shapes of a *wasm*.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 1668

l s²hyt bn ḥg bn mṭr bn ḥg bn s²bḥr bn grm'l w ḫrṣ f h lt s¹lm w ʿwr l- ḏ ʿwr h- s¹fr w ġnmt l- ḏ dʿy

By S²hyt son of Ḥg son of Mṭr son of Ḥg son of S²bḥr son of Grm'l and he kept watch and so O Lt may he be secure and [inflict] blindness on whoever scratches out the writing and may whoever would read [it] aloud have booty

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022297.html

---

KRS 1669

l ʿdy bn ʿnhm w tẓr ḥyt f hy 'lh blh

By ʿdy son of ʿnhm and he was waiting for some animals and so O 'lh *blh*

Commentary:
The name and patronym of the author are chiselled and hammered and the statement and the prayer are scratched. There two hammered letters or marks between this text and KRS 1670 with possibly two scratched *w*'s below them. They do not seem to belong to the text.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022298.html

---

KRS 1670

l bns¹ḫl w s¹r{{y}} {{l-}} h- nḫl bql kbr

By Bns¹ḫl and {he travelled by night} {to} the valley [to] tall herbage

Commentary:
An extraneous loop has been added to the *y* of *s¹ry* making it resemble a *m* and joining it with a line to the following *l*.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022299.html

---

KRS 1671

l ʾs¹hʾlh bn lbd w w[[]]ʿ{r} ʿw

By ʾs¹hʾlh son of Lbd *w w[[]]ʿ{r} ʿw*

Commentary:
The name and patronym of the author of the inscription are hammered and the last part is scratched. There is a line of hammered dots near the end of the inscription. The last part is difficult to interpret. It is possible that after the second w the author wrote another w by mistake and then crossed it out. He may then have decided not to emend the ʿ and *r* to *ʿwr* but started again by writing ʿ and *w* before abandoning the inscription.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 1683

l bny bn wrd bn s²hyt bn ʾs¹ w ḥll h- dr b- ʾhl -h w ḫr{ṣ} ʿl- ʾbl -h f hy lt w h s²ʿhqm s¹lm w ʿwḏ -k w h gdʿwḏ w h gdḍf ʿwḏ -km h- ʾbl

By Bny son of Wrd son of S²hyt son of ʾs¹ and he camped at the place with his family and he watched over his camels and O Lt and O S²ʿhqm let there be security and your protection and O Gdʿwḏ and O Gdḍf the camels are [under] your protection

Commentary:
The loop of the *ṣ* has been hammered over. Given the context however the reading is probably certain. The inscription is notable as being one of the very few containing the second person pronominal suffixes, both singular (though apparently referring to two deities, see Al-Jallad 2015: 99, 143) and plural. It is also worth noting that the author invokes the Gd of both the two major tribal divisions (ʿwḏ and Ḍf) in the area, cf. C 2246 whose author, however, had been pasturing herds of ʿwḏ and Ḍf.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

---

KRS 1693

l wqf bn ṣnfn bn grm w mnʿ s¹fry l- ġnṯ m- yẓr

By Wqf son of Ṣnfn son of Grm and he protected two inscriptions belonging to Ġnṯ from Yẓr

Commentary:
There are some scratches over the inscription after the r of *s¹fry* but the reading is clear. There are two inscriptions by someone called *ġnṯ* on the same rock and it is possible that *Wqf*, the author of KRS 1693, felt they needed protection from someone called Yẓr. Another interpretation of *m yẓr* would be as a relative clause "who was keeping watch" referring to Ġnṯ. In this case *yẓr* would be the 3rd person masculine prefix form of *nẓr* where the *n* has been assimilated.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

By Qḏy son of Y's¹ son of Drh son of ʿnq son of S¹ḫr and he was keeping a look out for the king's slave and so O Yṯʿ may he be relieved and he was waiting and O Rḍy blind whoever scratches {it} out

Commentary:
There is a shallower line at a slightly odd angle which gives the last letter the appearance of a *ḏ*, but is clearly extraneous. The letters *hmlk* might be the proper name Hmlk or could be read as *h- mlk* "the king". On the use of *ʿyr* for *ʿwr* here see Al-Jallad 2105: 125.

Provenance:
Unspecified site, Al-Mafraq, Jordan

KRS 1703

l kn bn s²{k}rh bn gls¹ bn wʿr w dṯʾ {ʿ}rs¹ wḥd f ʾḏry

By Kn son of {s²krh} son of Gls¹ son of Wʿr and he spent the season of the later rains {exhausted} [and] alone and so *ʾḏry*

Commentary:
The second letter of the second name is written by a crack but it seems most likely that a *k* should be read. The first letter of the word after *dṯʾ* might be a *n* as it is slightly longer than the dot of the other ʿ in the text. The inscription is directly hammered except for the last three letters which have been scratched possibly so that the author could fit them into the remaining space.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 1705

l qdm bn khl bn qdm bn qdmʾl bn wdmʾl bn grmʾl bn nḫr bn ġrb bn s^{1}lm bn rfʾt bn gml bn zdʾl bn ʾs^{2}l<l> w h lt ʿwr ḏ y[ʿ][w][r] ----

By Qdm son of Khl son of Qdm son of Qdmʾl son of Wdmʾl son of Grmʾl son of Nḫr son of Ġrb son of S^{1}lm son of Rfʾt son of {Gml} son of Zdʾl son of ʾs^{2}ll and O Lt blind whoever {scratches out} ----

Commentary:
The inscription is written on four faces. The last letter of the final name has a loop and it is possible that it is a *d*. However, a name *ʾs^{2}ld* is unkown and the sequence *rfʾt bn gml bn zdʾl bn ʾs^{2}ll* occurs in KRS 1543 and *gml bn zdʾl bn ʾs^{2}ll* in KRS 1447. The last part of the inscription is very faint.

KRS 1719

l mrʿ bn ʿbd bn ʿḏ bn s^{2}rb w kmʾ b- rʾy ʿqbt b

By Mrʿ son of ʿbd son of ʿḏ son of S^{2}rb and he collected truffles at the rising of Scorpio *b*

Commentary:
There is a b after the last word and it is possible the inscription is unfinished. There is some scratching next to the inscription. Truffles abound in the season of the later rains, from February to April, but they can continue to grow as late as June. Perhaps it was this especially long season that caused the author to mention it in an inscription. The final b could indicate that the inscription is incomplete.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 1726

l ʿ{y}b{t} {{b}}{{n}} qmʾl bn mʿ{y}r {b}{{n}} {b}wb {{b}}{{n}} ʿrs¹ h- s¹trt w wgm ʿl- {{ḥ}}b{{b}} qtl

To {ʿybt} {son of} qmʾl son of {Mʿyr} {son of} {Bwb} {son of ʿrs¹} belongs the shelter and he grieved for {a friend} [who had been] killed

Commentary:
Lines have been drawn across the inscription and drawing and some of the letters have been altered making reading the original difficult and uncertain. The third letter, and the penultimate letter of the third name, which have been read as *y* have a line going across the loop and it is possible they were originally *ḏ*'s with the prongs closed by a line. The crossbar of the fifth letter is shallower than the down stroke and it is possible that it was originally a *n*. The following *b* and *n* have been joined together to form a circle. The fifth *b* has several lines forming the curve. There is then a line which was presumably a *n* which has been extended with thinner lines and a crossbar has been added at one end. There then appears to be another *b*, *w*, and *b* which are difficult to make sense of as a name. The following *b* and *n* have been joined to form a circle. A circle has been drawn around the first *t* of *s¹trt*. A curve has been added to the *ḥ* of *ḥbb* forming a *w* and the last *b* of the word has been changed to a *g*.

---

KRS 1739.1

l s^1{*r*}ʾ

By {s^1rʾ}

Commentary:
The s^1 has been turned 90 degrees. The letter read as *r* is only slightly curving and there is a rather large gap between it and the ʾ. It is possible that this inscription and KRS 1739.2 are practice texts.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 1744

l {m}{d}d {m}{{n}} {m}ʾḫ {h-} dm----

By {Mdd} {mn} {Mʾḫ} {the} *dm----*

Commentary:
The shapes of the letters give the impression that the author was rather uncertain as to how to write. The second letter seems to be an unfinished *m* and the next letter is a carelessly inscribed *d*. The sixth letter has the shape of a *m* as does the eighth, although the latter is indented and a different shape to the other *m*'s in the text. It is possible that the letters of this part of the text have been altered but, if so, it is not possible to distinguish the original lines. The first *m* could originally have been a *b* to which a curve was then added, the *n* to have had a loop added turning it into a *d* and the second *m* might originally have been a *l* to which a wavy line was added or a *f* to which a straight vertical line was added. The last word is partly hidden by another rock. It is possible that *dmyt* 'drawing' should be restored.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

---

KRS 1748

l ḍl {{b}}{{n}} {{l}}{{ʿ}}[b

By Ḍl {son of} {Lʿlb}

Commentary:
The reading is doubtful because it seems that the shapes of some of the original letters have been altered by attempts at joining them. There is a slight extension to one line of the *ḍ* which joins it to the preceding *l*. The {b} of *bn* has been joined to the preceding *l* by two dots, making it look like a *s¹*, while the *n* has been joined to the following *l* giving the combination the appearance of a *d*. This *l* is then joined to the following ʿ.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 1773

l ls^{2}ms^1 bn ḥgzt bn ḥd bn ʾs^{1}ktby [b][n] ʾ{f} bn ʾ----f w rʿy <f> h lt s^{1}lm w tẓ[r] {h-} my

By Ls^{2}ms^1 son of Ḥgzt son of Ḥd son of ʾs^{1}ktby {son of} {ʾf} son of {ʾ----f} and he pastured {and so} O Lt may he be secure and he {waited for} {the} rain

Commentary:
There is a recent wasm hammered across this inscription and KRS 1774-1775. The third *bn*, and the fifth and sixth names are covered by the wasm. The letter following *rʿy* has the shape of a *s^2* but it is presumably meant to be a *f*. The *r* of *tẓr* and part of the fourth letter from the end are covered by the wasm. The latter might be a *ṣ*, *ʾ*, or a *h*. It is possible that a *s^1* should be restored before the following *m* and *{h-} [s^1]my* read but there does not seem to be enough space for another letter. The phrases *w tẓr ʾ- my* and *w tẓr my* occur in KRS 102 and 1267 respectively.

Provenance:

Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 1792

{{l}} {{b}}{{ʿ}}{{d}}h bn s²b bn {{ḏ}}{{r}}h bn s²bky bn gm{{l}} {{h-}} {{b}}{{k}}rt w h- dr

By Bʿdh son of S²b son of Ḏrh son of S²bky son of Gml is [the drawing of] the young she-camel and [he] was here

Commentary:
Thin lines have been added to some of the letters. There is a slight curve added to the back of the initial *l*; a curved line has been added inside the arms of the *b*; two lines have been added to the ʿ and a line has been added on either side of the *d*. An additional prong has been added to the *ḏ* and a fork has been formed at the other end; a line joins the arms of the *r* and a line is attached to to the ends of the *l* of the fifth name. A line has been added to the following *h* forming three prongs at one end and a fork at the other; the *b* has been changed to a circle and a line has been added through the middle of the *k*.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 1813

l ʿg bn gmʿs¹ bn {n}{s¹}q ngʿ ʿl- ḥbb

By ʿg son of Gmʿs¹ son of Ns¹q he grieved in pain for a loved one

Commentary:
From some angles the *n* and *s¹* of the third name look as though they are joined and form a *k*. There is no connective before the verb.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022442.html

---

KRS 1814

l <ʿ>wdʾl bn s²----mh bn qdm<<>>{t}

By {ʿwdʾl} son of {S²----mh} son of {Qdmt}

Commentary:
The second letter has a line across the circle but it seems likely it should be emended to ʿ. The *d* has been hammered over and there are scratched lines across the ʾ. The second letter of the second name is difficult to interpret but might be a *s¹*. The first three letters of the third name are rather squashed together and have been scratched over. They are followed by a *h* and a *t* which is doubtful as one line of the cross seems to be less definite than the other. It is difficult to explain why there is a *h* but perhaps it was a mistake that the author did not correct. Another possibility is that the lines read as *q* and *d* are in fact a *q* where the additional vertical line is incidental and the slight rubbing at one end of the *h* covers a loop, in which case the letter should be read as a *ṣ*. The name at the end would then read *qmṣt*.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 1835

l hnʾ bn bs^{1}ʾ w wgd s^{1}f{r} ʾs^{2}[y]ʿ -h f {s^{1}}dḏ

By Hnʾ son of Bs^{1}ʾ and he found the {inscription} of his friends *f {s^{1}}d{ḏ}*

Commentary:
The arms of the *r* are uncertain. It seems likely that a *y* should be restored after the *s^{2}* to read *ʾs^{2}[y]ʿ*. The third letter from the end is indistinct it might be a *s^{1}* or a *ḥ* in either case it is difficult to make sense of the last three letters. There is part of a cartouche surrounding this inscription and part of KRS 1834.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 1836

l rbʾl bn tmʾl bn ḫyḏt bn ms^{1}k w rʿy <f> h bʿls^{1}mn ḥlmt m- ḏ qbl w rʿy h- ʾbl ḫ<f>g b- rʾy ʿqbt w lʿn h- brk ḏ yʿwr

By Rbʾl son of Tmʾl son of Ḫyḏt son of Ms^{1}k and he pastured {and so} O Bʿls^{1}mn may that which he has offered bring forth forbearance and he pastured the camels on {ḫfg} during the rising of Scorpio and may the Blessed One curse whomever scratches out [the inscription]

Commentary:
The author has written *s^{2}* instead of *f* before the deity's name and in the word *ḫfg*. Ḫfg occurs here and in WH 171 and ISB 113. A member of the Ahl al-Jabal, who inhabit the *ḥarrah* of southern Syria and north-eastern Jordan, identified a plant of the *ḥarrah* shown to him by Geraldine King as *ḫafağ*. Dr Sue Colledge later identified it from a photograph as *Diplotaxis Harra*. A deity *h- brk* has not been found before in Safaitic and it may be a way of referring back to Bʿls^{1}mn. The translation of *<f> h bʿls^{1}mn ḥlmt m- ḏ qbl w rʿy h- ʾbl ḫ<f>g b- rʾy ʿqbt* is that of Al-Jallad (forthcoming).

Provenance:

KRS 1903

l whbʾl bn ʾktb w ḫrṣ ʿl- rgl -h f h lt s¹lm w nqʾt l- ḏ yʿwr

By Whbʾl son of ʾktb he watched over his men and so O Lt may he be secure and may whoever scratches out [the inscription] be thrown out of his grave

Commentary:
There are some additional lines inscribed over the ʿ and top of the l after the word ḫrṣ. It is possible that *rgl* should be interpreted as "foot-soldiers" in a unit led by Whbʾl.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 1921

l {ḫ}r{ʿ} b{n} {g}{r}{s^{1}} w fʿl fʿlt wlh ʾnys^{2}ʿ

By {Ḫr} {son of} {Grs^{1}} *w fʿl fʿlt wlh ʾnys^{2}ʿ*

Commentary:
The second letter is rather large and has an usual stance. There is possibly an ʿ which has been filled in after the first r. The sixth letter has a crossbar which appears to be slightly shallower and was probably added later. If it is intentional then the word would read bt "daughter". The letters of the second name have been altered. The first has been filled in and lines have been joined to the arms of the next letter. One of them extends beyond the letter and the other stretches to the back of the following letter which might be a s^{1}.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

---

KRS 1964

l ḍbr bn s¹bʿ bn ḫl w s²ty ʿny {ʾ}lt f ʾḫlṣ ʾ- ḍʾn ḏ- ʾl ḥlṣ

By Ḍbr son of S¹bʿ son of {Ḫl} and he wintered taken captive (or suffering distress) [and] {in deficiency} [of provisions] and he made safe the sheep of the lineage of Ḥlṣ

Commentary:
It is possible that the first letter after ʿny is a ḫ but the form of the letter is probably closer to the examples of ʾ in the text than to those of *ḫ*. ḏ ʾl ḥlṣ is carved in larger letters and the ḏ and ḥ have the Hismaic forms of these letters. If the ʾ before ḍʾn is an article then the lineal affiliation must refer to the author rather than the owner of the sheep.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan

in 1989 and published here

KRS 1971

----{q}{m}---- bn gfft bn drr w wgd ṣ¹fr ḥmlt f ngʿ

----{q}{m}---- son of Gfft son of Drr and he found the inscription of Ḥmlt and he grieved in pain

Commentary:
The first part of the inscription is very faint and doubtful.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022600.html

---

KRS 1972

l s²ḥl bn ġs¹m bn ʾḥrb bn ms¹k bn ẓʿn bn s²rb w wgd s¹fr ḥ{m}{l}----

By S²ḥl son of Ġs¹m son of ʾḥrb son of Ms¹k son of Ẓʿn son of S²rb and he found the inscription of {Ḥml----}

Commentary:
The end of the inscription was underground when it was found and the letters are rather faint. It is likely that the name ḥmlt should be restored after the word s¹fr. The author of KRS 1971 says he found the writing of Ḥmlt and 1975 is by Ḥmlt which might be the inscription which is mentioned.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

KRS 2018

l mrbḥ bn ymlk w s²ṭr f ḥnn ʾl- -h

By Mrbḥ son of Ymlk and he had withdrawn far from his family and yearned for it [his family]

Commentary:
s²ṭr has been interpreted on the basis of Arabic *šaṭara* "he withdrew far away from his family; or broke off from them, or quitted them in anger" (Lane p. 1550c). Although, Lane gives this as the meaning of *šaṭara ʿalā aḥlihi*, the meaning of the active participle *šāṭir* "one who withdraws far away from his family; or breaks off from them, or quits them in anger" (Lane p. 1551b) suggests that the verb can mean "he withdrew from his family", etc. without specifying *ʿalā ahlihi*. In Arabic, the verb *ḥanna* "he longed for" takes the preposition *ilā* (Lane p. 652c) which suggests that the letters *ʾlh* after *ḥnn* should be interpreted as *ʾl- -h* "for it", rather than *ʾl -h* "his family".

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 2022

{l} ʿm<<>>rlt bn {k}{l}b h----

{By}{ ʿmrlt} son of {Klb} h----

Commentary:
There is a dot after the m which is probably extraneous as the name ʿmʿrlt is difficult to explain. The second name might read ltb or, as suggested here, klb with one line of the k joined to the l which is then joined with another line to the following b. The author has not finished the inscription or the drawing of an ibex.

Provenance:
Jawa, Al-Mafraq, Jordan

KRS 2033

l ʿzzt bn ʿgd{h}

By ʿzzt son of ʿgd{h}

Commentary:
The prongs of the last letter are very short and indistinct and it is possible that the letter should be read as a l. It is possible the inscription is unfinished and the end should be read ʿgd {h}. Neither of the names ʿgdh or ʿgdl are known in Safaitic, though ʿgd and ʿgdn have been found once each (KshMSMI 1 and KRS 1742 respectively). There appear to be two false starts at inscriptions on the rock One is a l and possible ʿ and the other is a l and a s[1].

Provenance:
Jawa, Al-Mafraq, Jordan
[Latitude/Longitude: 32.329208 / 37.018092]

l s²ʿṯm bn grm{l}h- gml{n}

By S²ʿṯm son of {Grmlh} {is} [the drawing of] {the} {two camels}

Commentary:
The eleventh letter has a loop at one end which is not completely closed. The name grmy is not attested and neither is grml as read by SIJ. It is possible the letter should be emended to l and the name grmlh read. If this is correct, the final *-h* and the following definite article may have been treated as a geminate consonant and therefore not carved twice (see Al-Jallad 2015: 38). The last letter is only a slight dash.

Provenance:
Unspecified site, Al-Mafraq, Jordan
[Latitude/Longitude: 32.328153 / 37.018420]

KRS 2076 (SIJ 253-254)

l s¹krn ----f bn ʾṯʿ h rḍy ġ{n}mt m- ḥwlt h- s¹trt h- s²rs¹

By S¹krn ----f son of ʾṯʿ O Rḍy [grant] booty from Ḥwlt [to him belongs] the shelter [and he was present at] the rugged place

Apparatus Criticus:
SIJ 253: *l s¹krn bn {s¹wr bn} hf bn ʾṯʿ h- rḍy ġnmt*
SIJ 254: *...ḥwlt hs¹trths²rs¹*
JSaf.N p. 112: reads the second half of SIJ 253+254: *h rḍy ġlmt m- ḥwlt h- s¹trt h-s²r{t}* "O Rḍw [grant] a young girl, from Ḥlt, the modest, the beautiful"

Commentary:
This inscription and SIJ 255-256 (= KRS 2077-2078) were originally on a boulder which had cracked into three parts with SIJ 251-252 (= KRS 2079-2080), KRS 2081 (not read by SIJ), and SIJ 257-258. The bulldozers creating tracks for the oil exploration vehicles in 1989 broke up the boulder and the parts were scattered around. SIJ 257-258 were not found by the Rescue Survey. The letters of the first name have been joined up by carelessly carved ligatures. After this, the text was very heavily scored over and SIJ's reading of (s¹r bn) hf is not justified on the original. The third n is rather long and might have been added to later. After ġnmt, SIJ reads the letters as a separate text (SIJ 254) but the spacing of the letters indicates they should all be read as one text, as suggested by JSaf.N p. 112, although his interprtetaion is clearly wrong. It is unusual that the author did not place a connective before the beginning of the prayer and it is possible that he left out a connective or preposition in the last part of the text.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:

KRS 2129

l yʿs²b bn s²ʿ bn yʾs¹ʾl [[]] w ḏkr ḥbb ḥdd ----

By Yʿs²b son of S²ʿ son of Yʾs¹ʾl [[]] and he remembered a friend Ḥdd ----

Commentary:
The letters wḏkbb are written after the name and the words w ḏkr ḥbb are written to one side. It seems likely that the author made a mistake after the name and then decided to write the correct words running down next to it. It is possible the inscription continues after the name ḥdd but the rock is very damaged and nothing is legible.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 2130

l s²ḫm bn ʾṯʿ bn ʾ----{b}{n} ʿdhʿ----

By S²ḫm son of ʾṯʿ son of ʾ---- {son of} ʿdhʿ----

Commentary:
The rock is damaged in places and the reading very doubtful. The curse read at the end of KRS 2131 is on another face and it is difficult to be certain from the photographs whether it belongs there or should be read with this inscription.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022759.html

---

KRS 2131

l m{ḏ}y bn hʿḏr bn ḫrt wy---- [r]ḍy ʿwr m- {ʿ}w[r]

By {Mḏy} son of Hʿḏr son of Ḫrt wy---- Rḍy blind whoever {scratches out} [the inscription]

Commentary:
The middle prong of the first ḏ is doubtful. After the second y the rock is damaged and then most of the curse is written on another face of the rock. It is difficult to tell from the photographs whether it should be read with this inscription or as the end of KRS 2130. The r of the deity's name is damaged by abrasions as is the third ʿ. It is unclear where the r of the last word was written.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

---

KRS 2174

l ṣbḥ bn ʿmd w----ʿylmb----lty{w}l----

By Ṣbḥ son of ʿmd *w----ʿylmb----lty{w}l----*

Commentary:
The letter after the first w looks like a ġ on the photograph but it is unlikely to be as the following letter is clearly an ʿ. After the third b there is possibly a w. The l, t, and y are clear and then there is possibly another w although the crossbar does not seem to go across the whole circle. There is then a l and possibly further letters which it are difficult to interpret.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022803.html

---

KRS 2175

l ʾ{y}ʿ---- bn ʾs¹r

By ʾ{y}ʿ---- son of ʾs^{1}r

Commentary:
The y is rather carelessly carved and it is unclear how the fifth letter should be read. It is a long line with an arm at one end and a hook at the other. It might be a l or a r.

Provenance:
Unspecified site, Al-Mafraq, Jordan

KRS 2224

h s²ʿn[ʿ]r s¹ʿd ʿwḏ w {l}nm ʿl- ḏ mlg -h

O {S²ʿnʿr} help ʿwḏ *w {lnm} ʿl ḏ mlg -h*

Commentary:
The thirteenth letter has short arms and it is possible that it should be read as a r. It would however be a different shape to the other r in the text which is a slight curve. The other l's in the text have one hook and it is possible that the bottom hook of this letter is simply the result of the careless hammering technique used to carve the inscription. The letter read as a g has a hammered dot on one side of the circle. The divine name s²ʿnʿr occurs in KRS 36. There is no clear second ʿ in the name here although possibly a small hammered dot above the preceding n is intended to be one and was added later having been left out. If that was the case the name should be read s²ʿn + ʿ + r.

---

KRS 2250

h rḍw s¹ʿd ks¹n bn rb{h} {ʾ}{l} rb{h} n{t}l s¹[n]t qtl lb {q}l{ʾ} ḏ q{t}l ----

O Rḍw help Ks¹n son of Rbh *{ʾ}{l} rb{h} n{t}l s¹[n]t qtl lb {q}l{ʾ} ḏ q{t}l ----*

Commentary:
The letters are written carelessly and are lightly scratched on the rock. The prong of the second h is slightly covered by lichen. The prongs of the following ʾ are rather unclear and the next letter is not very straight. The prong of the third h is very shallow and the crossbar of the first t is doubtful as the line has a black patina and might not belong to the inscription. There is a chip out of the rock between the third s¹ and following t. The third t is rather small. The crossbar of the second q is curved and uncertain and the prongs of the second ʾ are roughly formed. The crossbar of the penultimate letter is doubtful. The rock is damaged after the final letter and it is possible there are further letters after it.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

---

KRS 2273

l qdm bn ʿmr w ṣyr m- ḥ{l}{s¹}

By Qdm son of ʿmr and he returned to a watering place from {Ḥls^1} or on account of {weakness}

Commentary:
There are possibly indistinct forks on the line of the penultimate letter and perhaps it should be read as an ʾ. The lines of the s^1 are slightly doubtful.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022903.html

---

KRS 2274

l rġḍ bn {m}f[n][y] bn s^{2}rk w wgm ʿl- ḥbb

By Rġḍ son of {Mfny} son of S^{2}rk and he grieved for a friend

Commentary:
Some hammer marks have partially covered the m, the whole of the n, and one end of the y so that only a line is visible. There is a line after the ḫ which is probably extraneous. It is possible that KRS 2274.1 is a continuation of this text.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022904.html

---

KRS 2274.1

l {ʿ}r w {ḫ}<<>>>rṣ f h lt s^{1}lm

By {ʿr} and {he was on the look out) and so O Lt may he be secure

Commentary:
The lines of the ʿ are slightly doubtful and there is a line after the ḫ which is presumably extraneous. It is not absolutely certain that the letter read as the initial l is the first letter of the text as it is written on the edge of the rock and it is possible there are letters before it on another face which was not photographed. Equally, it might be a continuation of KRS 2274 although it is difficult to see why the author wrote the l on the edge of the rock and not after the b of ḥbb.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024046.html

---

KRS 2275

l ḥ[] bn km h- bkrt w h lt nqʾt l- ḏ yʿwr h- s¹fr

By Ḥ son of Km is [the drawing of] the young she-camel and O Lt may whoever scratches out the inscription be thrown out of the grave

Commentary:
The reading is clear. The author has not completed the first name.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 2293

l ms²kr bn gdy bn {b}nn bn n----s²ḥ bn ḫz[[]]{r}

By Ms²kr son of Gdy son of {Bnn} son of N----s²ḥ son of {Ḫzr}

Commentary:
The first letter of the third name has a slight tail which is probably an incidental stroke made when inscribing. There is part of another letter after the sixth n and then the rock is broken and the inscription continues on another line with a s². There are some scratched lines after the z and it seems likely that the

author made a mistake and then erased it. The sign read as r at the end is rather long and thinner than the other letters of the text and it is possible that it is extraneous.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022924.html

---

KRS 2293.1

{l} bn

{l}bn

KRS 2318

<<>>l s^{2}ʿṯm bn [ʾ][b]gr bn ʿm w wgm ʿl- ʾnʿm w ʿl- ḫṭs^{1}t w ʿl- ʾḫt -h ʿl- tmlk

By S^{2}ʿṯm son of ʾbgr son of ʿm and he grieved for ʾnʿm and for Ḫṭs^{1}t and for his sister for Tmlk

Commentary:
There is a l and s^{2} on the left of the drawing which is presumably a false start at KRS 2318. Part of the first

letter and all of the second letter of the second name are damaged by a chip on the rock. It seems likely that ʾ and b should be restored. The sequence s^{2}ʿṯm bn ʾbgr bn ʿm occurs in KRS 1065. The t of the name ḫṭs^{1}t has been left out and added above the s^{1} and the following w.

Provenance:

---

KRS 2330

l s^{1}ʿdlh bn [[z]]bdy h- t{y}ll

By S^{1}ʿdlh son of Zbdy *h- t{y}ll*

Commentary:
The author has written an ʾ at the beginning of the second name and then changed it to a z. The loop of the third letter from the end is faint and it is possible it should be read as a h.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022961.html

---

KRS 2331

l ʾnʿm bn ʾnʿm bn grmʾl bn ---- [t]s^{2}wq ʾl- ʾḫ -h

By ʾnʿm son of ʾnʿm son of Grmʾl son of ---- {he longed} for his brother

Commentary:
The rock is broken between the second bn and the begining of the word ts^{2}wq. It is possible that the name wḥs^{2} should be restored as the sequence *ʾnʿm bn ʾnʿm bn grmʾl bn wḥs^{2}* occurs in KRS 2305 2350 and 2364. It is possible that this inscription is on the same rock as KRS 2332–2336.

Provenance:

Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:

KRS 2348

l ʿbd bn bdbl bn ʿbd bn grmʾl bn wḥs² w wgm ʿl- ṣʿd

By ʿbd son of Bdbl son of ʿbd son of Grmʾl son of Wḥs^2 and he grieved for Ṣʿd

Commentary:
The g of wgm seems to have been left out. It is possible that it has been added next to the w after the name wḥs^2.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022979.html

---

KRS 2349

l ʿbd bn bdbl bn ʿbd bn grmʾl bn wḥs^2 bn ḥ---- bn ----wḏ w wgm ʿl- ----

By ʿbd son of Bdbl son of ʿbd son of Grmʾl son of Wḥs^2 son of Ḥ---- son of ----wḏ and he grieved for ----

Commentary:
The last part of the inscription is written on the edge of the rock and was inadequately photographed. It is possible that the last name should be restored as ʿwḏ on the basis of the genealogy in KRS 2363 where unfortunately the name before is also missing from the photograph. The inscription probably continues on another face of the rock which was not photographed.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:

KRS 2358

l bdbl bn ʿbd bn grmʾl w ts²wq ʾl- ġnṯ f h lt s¹lm w qbll

By Bdbl son of ʿbd son of Grmʾl and he longed for Ġnṯ and so O Lt [grant] security and a reunion of loved ones

Commentary:
The last letter of the third name has a crossbar which is most likely a mistake or an attempt to join the letter to the preceding ʾ. The vertical line seems to be too long for the letter to be a t. There are two lightly scratched curves at the end.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0022989.html

---

KRS 2359

l ---- bn ẓnʾl h- t<<>><<>>ll

By ---- son of Ẓnʾl are the words

Commentary:
The beginning of the inscription has been damaged by hammering. There are four lines after the t. The first two lines are rather short for l's and perhaps the author realised this and rectified his mistake by inscribing two longer ones but did not scratch out the two he had carved before.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2363

l ʿbd bn bdbl bn ʿbd bn grmʾl bn wḥs² {b}{n} ---- bn ʿwḏ w wgm ʿl- ṣʿd w ʿl- ġnṯ w ʿl- ḥb {w} ʿl- ḫl -h f h lt s¹lm l- ḏ s²r

By ʿbd son of Bdbl son of ʿbd son of Grmʾl son of Wḥs² {son of} ---- son of ʿwḏ and he grieved for Ṣʿd and for Ġnṯ and for Ḥb {and} for his maternal uncle and so O Lt [grant] security to whoever is of good character

Commentary:
The photographs are inadequate to be certain of parts of the reading. After wḥs² the inscription is carved on the second and third faces and it seems likely that there is another name before ʿwḏ. The preceding b and n are partially covered by lichen. The seventh w is rather faint. For the interpretation of s²r see Lane (1617b)

šār "a man goodly in his internal, or intrinsic, states or qualities, and equally so in his outward appearance".

KRS 2370

l ḫr bn ʾs¹ bn ḫr bn {ʾ}s¹ bn mġny ḏ- ʾl m{s¹}---- w rʿy h- ḍʾn b- ʿnzt bql

By Ḫr son of ʾs¹ son of Ḫr son of {ʾs¹} son of Mġny of the lineage of {Ms¹----} and he pastured the sheep at ʿnzt on spring herbage

Commentary:
The first letter of the fourth name and the lineal name are partially covered by a drawing. A fork of the former is visible and it should probably be read as a ʾ rather than a ṣ or h which are the other possibilities and enough of the second letter of the lineage name remains for it to be read as a s¹. In view of the narrative *w rʿy h- ḍʾn b- ʿnzt* "and he pastured the sheep at ʿnzt", it is worth noting that the area where this inscription was found is known today as Khallat ʿAnazah.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 2371

l ḫṭs¹t bn ms¹k h- ḫ[ṭ][ṭ]

By Ḫṭs¹t son of Ms¹k is the {carving}

Commentary:
The letter after the s¹ is doubtful but it is possible that it is a k. The vertical line appears to be broken and the cross line seems to run into a natural line in the rock which makes it appear much longer. The rock is chipped after the letter. There are lines after the ḫ and it is likely that the word ḫṭṭ should be restored.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:

KRS 2376

l {q}{b}{ṯ}t {{b}}{{n}} ṣʿ{{b}} {{b}}{{n}} {ġ}{s²}{w}

By {Qblt} {son of} {Ṣʿb} {son of} {Ġs²w}

Commentary:
The letters have been joined together and possibly tampered with and it is very difficult to be sure of much of the reading. The first letter looks like a q although some of the hammering over the loop might have been intended for joining and the letter could have been a d. The next letter is either a b or a s¹ and the next one looks like a ṯ although it is possible that one hammered dot was intended to join the letter to the previous one. If that is the case the letter could have been a y. The following b and n have been joined together forming a circle. The letter after the ʿ is possibly a b although it is difficult to explain the thick line joining the arms of the letter. It seems most likely that the next part of the inscription should be read downwards and parallel to the first part although it is still difficult to make sense of the patronym and it would also be possible to make a case for reading the letters up the rock except for the last one which would be difficult to explain. The b and n have been joined together with a line which also runs into the next letter which could be a ġ. The next letter is possibly a s² and the last one possibly a w.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Khallat ʿAnazah

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2377

l r{y}ḍ bn nt{n} bn mṣ {{b}}{{n}} ----wq {{b}}{{n}} wrd bn {ṣ}ḫm

By {Ryḍ} {son of} {Ntn} son of Mṣ son of ----wq son of Wrd son of {Ṣḫm}

Commentary:
As with KRS 2376 the letters have been joined together and possibly changed making the reading difficult. The third letter has the appearance of a ṯ but it seems likely that one of the hammered dots was used to join the letter to the second arm of the preceding letter. The first n is joined to one arm of the preceding b and then by a small curve to the second n. There is a line going from the second n through the t and through the next letter which might be a another n. The third b and n have been joined together to form a circle. The following letter is very difficult to interpret. It might have been a s¹ but there is possibly a y inscribed over it. The following b and n have been joined into a circle. The fork of the third letter from the end is doubtful and it could just be an attempt at joining in which case the letter would appear to be a y.

---

KRS 2420

l ʿqrb bn nhb w rʿy h- mʿzy f ḫrṣ h- [] ṣhy w wrd ʾʿly h- ṣwy ʾbgr b- ʾ- {d}r{n} f h bʿls¹mn rwḥ b- mṭr

By ʿqrb son of Nhb and he pastured the goats and so he watched h- [] ṣhy and he came to a watering-place [and] raised the cairn [for] ʾbgr in a {place of abode} and so O Bʿls¹mn [grant] relief from adversity and uncertainty in rain

Commentary:
There is a small line between the h and ṣ after the word ḫrṣ. It is possible that it is a n and the words h- nṣhy should be read. However, its position near the tops of the other letters rather than in the middle as is usual in the Safaitic script suggests that it might be incidental or a false start at a letter. The loop of the d and what is probably a n in the word before the beginning of the prayer have been hammered over.

Provenance:
Wadi Salma, Al-Mafraq, Jordan
[Latitude/Longitude: 32.442302 / 37.288703]

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

l ʿwḏ bn s²---- bn s²mt

By ʿwḏ son of S²---- son of S²mt

Commentary:
There is sufficient space for two names between the first and last names read here but the letters are very faint.

Provenance:
Unspecified site, Al-Mafraq, Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023059.html

---

KRS 2429

l ʿbdʾl bn ----nn h- g{z}lt w rʿy h- nḫl

By ʿbdʾl son of ----nn h- g{z}lt and he pastured the valley

Commentary:
There are lines joining the initial l to the ʿ and the ʿ to the following b. There is also a line going from the n of bn to the following n. It is unclear whether the name nn should be read or whether the line covers another letter possibly an ʿ. The letters of the next word are joined as well making their interpretation rather difficult. The h is joined by a ligature to the back of the following letter which is a circle shape. The next letter might be a z, n, or l. If either of the latter then a bar has been added to the top to join it to the preceding letter although it does not reach to the following one. The l is then joined to a crossbar of the t.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023060.html

---

KRS 2430

l mzn bn gnʾl

By Mzn son of Gnʾl

Commentary:
There are lines joining the m to the z and joining the letters of the second name.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023061.html

---

KRS 2431

l qn <b>n s¹ʾlt bn bḥrmh bn ḥs²b w rʿy h- rmḫ bql

By Qn {son of} S¹ʾlt son of Bḥrmh son of Ḥs²b and he pastured the herd on spring herbage

Commentary:
The author has written s[1] rather than b after the first name. The letter read as a r after rʿy h is a line with a hook and is facing in the opposite direction to the following letters. The author probably had to change the direction of the text because there was insufficient space.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023062.html

---

KRS 2432

l {ḥ}s[1]m bn ʾs[1]ḥmt w h yṯʿ rwḥ

By {Ḥs[1]m} son of ʾs[1]ḥmt and O Yṯʿ [grant] relief from adversity and uncertainty

Commentary:
The middle line of the ḥ is not joined to the others.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2440

l ln bn {ḥ}{n}y bn f----

by Ln son of {Ḥny} son of F----

Commentary:
The text is incised in very small letters and some of them are too small in the photograph to be read with any certainty. The middle prong of the letter read as ḥ is shorter and thinner than the other lines and it is possible the letter should be read as a s¹. The seventh letter might be a natural line in the rock. The text might be unfinished but it is possible there are further letters written in very faint lines and maybe a n and a y should be read after the f.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Qitar al-ʿAbd

References:

---

KRS 2473

l ṣbḥl bn mlk w ṭʿm {r}ḍw kll nʿm w{l}ʿ bql

By Ṣbḥl son of Mlk and {Rḍw} feed all grazing animals {eager} for spring herbage

Commentary:
The name ṣbḥl has so far been found nowhere else in Safaitic. The letter read as r resembles the b's of the text and it is possible it should be read as such although it would be difficult to suggest a translation. The letter read as the sixth l is rather shorter than other l's in the text.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Qitar al-ʿAbd

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2487

l {{ʿ}}{{b}}{{t}} {{b}}n ʾṣḥr {{b}}{{n}} zwr

By ʿbt son of ʾṣḥr son of Zwr

Commentary:
Several letters of the text have been altered. The second letter is most probably an ʿ. There is a dot and lines have been added on either side. A tail has been added to the following b forming a k and a circle has been added around the t. There is a short line next to the letter. A middle line has been added to the next b to form a ḥ. A dot has been hammered on to one arm of the r and the following b and n have been joined together to form a shape that resembles m or g. The cross bar of the z has been hammered over. There are two lines to the right of the inscription.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Qitar al-ʿAbd

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2488

l kṯ {{b}}{{n}} s¹d {b}{n} {{n}}g{y} {{b}}{{n}} {{ʿ}}{{g}}{r}

By Kṯ {son of} S¹d {son of} {Ngy} {son of} {ʾgr}

Commentary:
The inscription is difficult to interpret and presumably the letters have been altered. We present one possible interpretation here. The fourth letter has the appearance of a w but it seems possible that the b and n have been joined together and an additional line has been added. The b has been joined to the n of the next bn. It is possible the next letter was originally a n and a cross-bar has been added later. The b and n of the third bn have joined together to form a g. A line has been added across the fork of the ʾ to form a ṣ and an additional loop has been added to the following g. One arm of the final letter has only a slight curve and the other has been hammered over.

Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023141.html

---

KRS 2509

l rbʾl bn ḫfy w rʿ[y] bql w h yṯʿ ġnmt h- {s¹}[n]t w flṭ m- bʾs¹

By Rbʾl son of Ḫfy and {he pastured} the spring herbage and O Yṯʿ [grant] booty this {year} and deliverance from despair

Commentary:
There are scratches and some hammering covering the inscription. The letter after the first ʿ is damaged by hammering. Given the context it seems likely that y should be restored. The letter read as the first s¹ has a vertical stance unlike the s¹ at the end but it has a short tail suggesting that it is most likely a s¹ and not a h. It also seems most probable that the author left out a n between this letter and the following t and that h-s¹nt should be read.

Provenance:
Unspecified site, Al-Mafraq, Jordan

Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023142.html

---

KRS 2510

l ʾṣr bn bny bn grmʾl bn mlk

By ʾṣr son of Bny son of Grmʾl son of Mlk

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

By S¹lmʾl son of Zhmn is [the drawing of] the young she-camel

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023145.html

---

KRS 2513

l s²ʿl bn m---- bn ml {f} h rḍw ʿwr m ʿwr h- s¹fr

By S²ʿl son of M---- son of Ml {and so} O Rḍw blind whoever scratches out the inscription

Commentary:
The inscription is carved over the lines attached to the cartouche surrounding KRS 2152. The tops of the letters following the first m are covered by lichen and it is difficult to know how they should be restored. The first f is a wavy line.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

KRS 2593

l rks¹ bn ʿgz bn ẓnn bn mrʾ

By Rks¹ son of ʿgz son of Ẓnn son of Mrʾ

Commentary:
The first n of the third name has an extraneous line attached to it.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023227.html

---

KRS 2594

l b's^2t bn ḫzr bn qm{r}

By B's^2t son of Ḫzr son of {Qmr}

Commentary:
The arms of the last letter are very doubtful and it is possible the letter should be read as a l.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

---

KRS 2603

----*mn w wrd ydʿl {f} l{t}*----

----mn and he came to a watering-place *ydʿl* {and so} {Lt} ----

Commentary:
The boulder has been broken by a bulldozer and the beginning of the inscription is missing. After the first l there is a slightly wavy line which might be a f, then a l and then a possible t with rather long lines. There are then other lines on the rock but it is difficult to distinguish any letters. KRS 2604 is on another part of the boulder which was broken off by the bulldozers.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023237.html

---

KRS 2604

l mʿyr bn ʾs¹ bn nʿ---- h bʿls¹mn rwḥ w s¹lm w ḫṭʾ l----ʿ----r w{s¹}r

By Mʿyr son of ʾs¹ son of Nʿ---- O Bʿls¹mn [grant] relief from adversity and uncertainty and security and *w ḫṭʾ l----ʿ----r w{s¹}r*

Commentary:
The rock is broken after the second ʿ and before the prayer. There are probably two letters after the third l and before the ʿ and there might be a letter between the ʿ and the r although it is not certain. The rock is chipped at the end but a r and w can be read with certainty and then a possible s¹ and another r. KRS 2603 is on another part of the rock which has been broken away.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023238.html

---

KRS 2605

l ẓʿn bn bhl

By Ẓʿn son of Bhl

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023239.html

---

KRS 2606

hym bn k

hym son of K

Commentary:
The first letter appears to be a h although it is possible the fork was added but it is difficult to know why. The inscription seems to be unfinished.

Provenance:
Unspecified site, Al-Mafraq, Jordan
[Latitude/Longitude: 32.381698 / 37.429825]
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

l s^{2}ḫm bn ḫdmt

By S^{2}ḫm son of Ḫdmt

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023247.html

---

KRS 2614

l ẓnn bn ʿbdy b{n} ----{b}

By Ẓnn son of ʿbdy b----

Commentary:
There is a rough line joining the letters of the first two names. The letters after the first name are roughly hammered and are not very clear on the photograph.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023248.html

---

KRS 2615

l kʿ{m}h bn bs¹ʾ b[n] ʾs¹d

By {Kʿmh} son of Bs¹ʾ son of ʾs¹d

Commentary:
The letters have been hammered over. The m is uncertain and second n is not visible.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023249.html

---

KRS 2616

l qb{{r}} b----d----

By {Qbr} b----d----

Commentary:
The letters have been vandalised and it is extremely difficult to be sure of anything. The first b has a short line inside one arm which was probably added later. The following letter has the apparance of a w but it is possible it was originally a r. The letter or letters after the second b are illegible and it is likely that the text continues on another face of the rock which was not photographed.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 2620

l ----n---- bn tzny

By ---- son of Tzny

Commentary:
The tops of the the letters of the first name have been hammered over and it is difficult to be certain of anything except perhaps a n.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023254.html

---

KRS 2621

l ẓnn bn grm'l bn ʿb{ṭ} bn ʿzhm bn mr' bn ʿrs¹

By Ẓnn son of Grm'l son of {ʿbṭ} son of ʿzhm son of Mr' son of ʿrs¹

Commentary:
The last letter of the third name has been hammered over but most of the three vertical lines are visible and the horizontal line is more or less clear under the damage. The sequence grm'l bn ʿbṭ bn ʿzhm bn mr' bn ʿrs¹ occurs in the genealogies in KRS 822 and 829.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

---

KRS 2664

l dḥ bn dġm {b}{n} ḫ{l}{l} b----

By Dḥ son of Dġm {son of} {Ḫll} b----

Commentary:
There is a cartouche which runs through the second bn and then the rest of the inscription is written outside. The letters of the last name have been joined together with lines at the top and bottom of them and it is difficult to know whether the two letters after the ḫ are l's or r's. There is then probably a b and some more letters which have been hammered over and are difficult to read.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023298.html

---

KRS 2666

l mʿnʾl bn nh {b}{n} wbḍ

By Mʿnʾl son of Nh {son of} Wbḍ

Commentary:
The second b and n have been joined together.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023300.html

---

KRS 2667

l hn{ʾ}l bn ṣb {b}{n} {g}{h}r

By {Hn'l} {son of} Ṣb {son of} {Ghr}

Commentary:
The second, third, and fourth letters have been joined to each other. The fourth letter looks rather like a ḫ but this is probably partly because of the extension of the lines for joining. The second n is joined to the preceding b by being attached to one arm and the letters of the second bn have been joined to form a circle. The next letter might be a g or it might be another b and n joined together to form a circle. The last two letters are inscribed in thinner lines. The first one is damaged by an abrasion but it might be a h since part of a fork seems to be visible.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023301.html

---

KRS 2668

l b's^1{h} bn n----ft bn ----

By {B's^{1}h} son of N----ft son of ----

Commentary:
The b and n after the initial l have been joined together. The letter read as h has a hammered dot at one end and it is possible it should be read as a ṣ. The middle letter of the second name is faint although it is possible it should be read as a y. The last part of the inscription is damaged and is not legible on the photograph.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023302.html

---

---

KRS 2730

l ns²l bn gyz bn s¹ḫb bn ʿ{l} w rḍw ʿyr l- ʾḫ -h w ʿwr m ʿ{w}r

By Ns²l son of Gyz son of S¹ḫb son of {ʿl} and Rḍw [grant] vengeance for his brother and blind whoever {scratches out} [the inscription]

Commentary:
The sequence gyz bn s¹ḫb bn ʿr occurs in KRS 519 and possibly in KRS 521 although in the latter text the r is doubtful. It is possible a r should be read here in the fourth name instead of a l as the lines are faint and something might be missing. The penultimate letter appears to be unfinished as the circle is not enclosed on one side of the crossbar.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 2763

l ---- ʾ{n}{ʿ}

By ---- ʾ{n}{ʿ}

Commentary:
The beginning of the text has been hammered over. The letter after the l is illegible and then there is possibly a r, m, and a g, or a b and n joined together, giving the appearance of a g. The ʾ is quite clear and then there appears to be a n written under the fourth letter of KRS 2764. There is then a ʿ although the lines of the letter have been hammered over in a similar way to some of the lines of KRS 2764.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023397.html

---

KRS 2764

l ḏdb bn s¹wd bn ḥrt w ḥwb

By Ḏd son of S¹wd son of Ḥrt and he wept with grief

Commentary:
Some of the lines of the first two names have been re-traced with hammered lines and the inside of the first w has been scratched over. The first name is difficult to explain although the shape of the ḏ is quite clear. The author has used two different forms of ḥ one with the lines tapering to a point and the other with a straight back and three horizontal lines.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023398.html

---

KRS 2765

lf

lf

Commentary:
The text is unfinished.

Provenance:
Unspecified site, Al-Mafraq, Jordan

Jordan

References:

KRS 2810

l ----bbw{h}

By ----bbw{h}

Commentary:
The letters after the initial l are not legible on the photograph. It is difficult to make sense of the letters that can be read.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023444.html

---

KRS 2811

l {ṣ}rm bn nʿmy bn wqr w tẓr s²nʾ f h lt s¹lm

By {Ṣrm} son of Nʿmy son of Wqr and he was lying in wait for enemies and so O Lt [grant] security

Commentary:
The loop of the ṣ is slightly doubtful. There are traces of further possible letters near the inscription.

Provenance:

Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023445.html

---

KRS 2812

h {y}{ṯ}{ʿ} s¹ʿd ʿmr bn s²bn w flṭ b- s¹n{b}

O {Yṯʿ} help ʿmr son of S²bn and deliver *b {s¹nb}*

Commentary:
The inscription is written on three faces of a small boulder. The letters of the deity's name and parts of the last letter are very faint.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023446.html

---

KRS 2813

l ʿbdgʾ {b}n ġnṯ ḏ- ʾl ṣlḫd w h lt s¹{l}{m}

By ʿbdgʾ {son of} Ġnṯ of the lineage of Ṣlḫd and O Lt {may he be secure}

Commentary:
The initial l is a long line that continues through the second line of the inscription. The b is not a complete curve; there is a long scratch attached obliquely to the penultimate letter; and final letter is rather small and has an usual stance. For the name ʿbdgʾ compare the names ʿbdg and ʿbdlg in the Hismaic texts TIJ 156 and KJC 205, 647 respectively.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023447.html

---

KRS 2814

l mbl bn ẓ<<>>rr bn {y}---- bn brqn bn mny bn ʿn w wgm wny w rʿy

By Mbl son of {Ẓrr} son of {Y}---- son of Brqn son of Mny son of ʿn and he grieved being feeble and he pastured

Commentary:
There is a short line after the first letter of the second name but it seems likely that it is extraneous. The third name has been damaged by the recent Arabic inscription.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

KRS 2851

l g{d}d bn ----m----m bn ʿbd w rʿy h- nḫl b- ṯlg b- {k}s¹ʾ ḏkr

By {Gdd} son of ----m----m son of ʿbd and he pastured the valley while snow fell in {the cosmical setting [or] full moon} of Aquarius

Commentary:

Parts of the third letter are rather doubtful in the photograph. The lines of the sixth letter from the end are rather doubtful and there is an additional line which if part of the letter would suggest it should be read as a rather carelessly inscribed m. There is probably space for three names between the first and last names but most of the letters are damaged and illegible.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 2927

----lʿyhḏrh{t}ynn s¹nt ʾd rdf {f} [r][ʿ][y] ----

----lʿyhḏrh{t}ynn the year *ʾd rdf* {and so} {he pastured}

Commentary:
There are traces of letters before the l which are illegible and it is very difficult to know how to interpret the following letters which are fairly clear. The crossbar of the first t might be an incidental scratch. The second f is partly covered by an abrasion and would be a different shape to the first f in the text. All the last three letters are partly damaged but it seems the restoration suggested here is likely.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

---

KRS 3000

l ẓn'l bn 's¹n bn bn<<>>y

By Ẓn'l son of 's¹n son of Bny

Commentary:
There is an extraneous curve between the n and y at the end.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023637.html

---

KRS 3001

l 'fl h- rglt w h- {k}rs¹

'fl was present at the water-course and the {enclosure}

Commentary:
There are lines joining the initial l to the ', and the f to the following l. The tail of the k is slightly curved. From w to the end, the letters are rather carelessly inscribed and it is possible that the last part was carved by someone else later as an insult and should be translated as "and the cake of dung and urine".

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 3029

{l} s¹ʿd bn ʾnʿm bn hmlk bn n{h}{ḥ} w tẓr ḏ mny f h rḍw fṣy m- bʾs¹ s¹ʿd h- ḍfy

{By} S¹ʿd son of ʾnʿm son of Hmlk son of {Nhḥ} and he awaited Fate and so O Rḍw [send] deliverance from despair [and] help the Ḍfite

Apparatus Criticus:
MNH p. 345 n. 269: on the occurrence of rḍw with h- ḍfy.

Commentary:
The initial l is on the edge of the rock and is slightly doubtful and the second and third letter of the fourth name are worn and uncertain. The name nhḥ is read on the basis of ʾnʿm bn hmlk bn nhḥ in WH 845 and hmlk bn nhḥ in KRS 218. It seems likely the author left out a w before s¹ʿd. For the interprtetation of *ḏ* in of *tẓr ḏ mny* see Al-Jallad 2015: 84–85, though the translations here differs from the one there.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

l s¹qn bn wtr ḏ- ʾl ʿmrt w ʾlt ʾ{ġ}b {h} s¹lm w ʾgʿn -h ʿn bn ʾns¹ {ʾ}s²nʾ

By S¹qn son of Wtr of the lineage of ʿmrt *wʾlt{ʾġb}{h}s¹lmwʾgʿnhʿnbnʾns¹{ʾ}s²nʾ*

Commentary:
The ġ is a line with a slight zig-zag at one end and is a rather unusual shape. The letter read as the first h is written below the preceding b and following s¹ and was probably left out and then added later. It is possible it should be read as a s¹ as it does not have a very long stem although the abrasion might cover part of it. It is possible the fourth letter from the end is a h as one of the "forks" does not seem to be attached to the rest of the letter and is inscribed in a different technique.

Provenance:
Unspecified site, Al-Mafraq, Jordan

l s²ʿ{{ʾ}}l bn {{ḥ}}{{b}}n bn yqn{{ʾ}}l bn w{{ḥ}}fy bn {b}grt w

By S²ʿ'l son of Ḥbn son of Yqn'l son of Wḥfy son of {B}grt *w*

Commentary:
The forks of the ʾ's have been closed to give the letters the appearance of ṯ's. The arms of the second b have been closed with a line and the arms of the third b have been joined to the following n. The arms of both the ḥ's have been closed to form a w. The first letter of the last name looks more like a r but the name would be difficult to explain if it was read as a r, and the g has a line going halfway across the circle. The inscription probably continues after the w at the end but the letters have been scratched over and nothing is legible in the photograph.

---

KRS 3117

l bgt bn bnḥrm bn lṭmt w {q}r f wrd m{l}ḥ

By Bgt son of Bnḥrm son of Lṭmt and he remained at a watering-place during Aquarius

Commentary:
The letter read as *q* is doubtful since it looks as though the author miscalculated when carving it and drew the stem along one side of the circle rather than through the middle, making it resemble a *d*, though it is different from the clear *d* later in the text. The penultimate letter appears to have a slight prong giving it the appearance of a h. For *qr* cf. Arabic *qarra* "to remain (in [*fī*] a place)" (Lane p. 2499a). It is followed by the preposition *f* "in, at". On the translation of *m{l}ḥ,* see Al-Jallad 2014: 218–220, and Al-Jallad forthcoming.

Provenance:

l {ʿ}{q} bn {n}y {bn} ʿmʾt {w} lwḏ lmn

By {ʿq} son of {N}y {son of} ʿmʾt {and} he took refuge *lmn*

Commentary:
There are ligatures joining several of the letters some of which carelessly written and obscured by hammering. There is line joining the initial l to the following letter which has been read as an ʿ. It is possible

the third letter should be read as a d. There is some hammering above the second n. It seems likely that the second b has been joined to the preceding letters by a line going through the middle and the following n joined to the arms of the letter giving it the appearance of a w. The name ‘m’t however is not previously attested. The next two letters might be a b and n joined together giving it the appearance of a w or maybe as above it should be read as a w and lwḏ read as a verb. The translation of lmn at the end is problematic and even though it runs directly on from the ḏ perhaps it should be read as a separate text l mn "By Mn".

---

KRS 3182

l s¹mn{{ʾ}} bn {b}ʾl bn ----

By S¹mnʾ son of {Bʾl} son of ----

Commentary:
A line has been added to the fork of the ʾ forming a ṣ and the n has been joined to the arms of the first b. The following letter has a tail and it is possible it should be read as a s¹. Equally it might be an attempt to join it to the preceding n or it might be an incidental chip. One arm of the letter is extended to join it to the followng ʾ and then the ʾ is joined to the l by two ligatures. The end of the inscription is in shadow and cannot be read with certainty. There might be a h, some other letters, and then possibly a b.

Provenance:
Unspecified site, Al-Mafraq, Jordan

Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

---

KRS 3187

l ----n b{n} dn h- ʿr

By ----n son of Dn is the hinny

Commentary:
The attempt at joining the letters and the infilling make the interpretation of the inscription extremely difficult. The first letter might be a r and the second letter might be an ʾ, ṯ, or ṣ, depending on whether or not the joining of the fork is part of the letter. The next letter might be a g or a m, and then there appears to be a n joined to the adjacent letters by a line across one end. Then there is a b, and then probably a n which has been more or less obscured by hammering which has been extended to join the back of the following letter. For the interpretation of *h- ʿr* see Macdonald, M.C.A. (in press, a)

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

KRS 3197

l ḏr bn ʾl{s¹} bn ʿb<<>>ṭ bn ʿmr bn mlkt bn frhz bn ḫfy bn ḫbb bn zmhr w tẓr s²nʾ s¹nt qtl bny

By Ḏr son of {ʿls¹} son of {ʿbṭ} son of ʿmr son of Mlkt son of Frhz son of Ḫfy son of Ḫbb son of Zmhr and he lay in wait for enemies the year Bny was killed

Commentary:
The first s¹ is rather faint. There is possibly a n after the third b and perhaps the name should be read as ʿbnṭ. However, it seems more likely that the apparent n is incidental and that the name is ʿbṭ. The t of the word s¹nt has been left out and is written slightly above the q.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:
[KRS] Inscriptions recorded by Geraldine King on the Basalt Desert Rescue Survey in north-eastern Jordan in 1989 and published here

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0023835.html

---

KRS 3227

l qrs²m bn s¹ʿdʾl bn [[ʾ]]byn bn bṭnt bn ḥr w h nqmt m- mkbl

By Qrs²m son of S¹ʿdʾl son of {ʾbyn} son of Bṭnt son of Ḥr and O [] [grant] vengeance from Mkbl

Commentary:
The author wrote a b at the beginning of the third name and then corrected the mistake by writing an ʾ over it. After the connective it seems most likely that the h should be read as a vocative particle and that, to complete the invocation, it is necessary to assume that a deity's name was left out.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

References:

l ġṯ bn ʿḏn bn hʾs¹ bn ḥrs¹ bn ġṯ bn yʿly h- ʿn

By Ġṯ son of ʿḏn son of Hʾs¹ son of Ḥrs¹ son of Ġṯ son of Yʿly is the ass

Commentary:
There is a drawing of an equid and rider. The rock is chipped obscuring the head of the animal. The drawing does not look very much like an ass, but cf. Arabic *ʿānah* "a she-ass" (Lane 2204a), which in Safaitic may have had a masculine form *ʿān.

Provenance:

KRS 3239

l nṣr bn ʾs¹d bn ʿmrt h- ʾn{f}s¹ h- nql

To Nṣr son of ʾs¹d son of ʿmrt belong the {monuments} *at the rocky ground*

Commentary:
It is possible that the letter after the second ʾ is a rectangle in which some of the lines are not joined and the horizontal lines do not appear to be as deep as the other lines and the letter should be read as a g. However it is more likely it should be read as two letters a n followed by an ill-formed f. The last four letters are inscribed in a different technique.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

KRS 3249

l ---- bn ʾbd h- ʿr w wlh ʿ[[]]l- ʾs[2]yʿ -h w ġzz b- ḥrt {f} {ʾ}m---- w ʿwr m- ʿwr

By ---- son of ʾbd is the hinny and he was distraught for his companions and he was on a raid in [the] Ḥrt *{f} {ʾ}m*---- and blind whoever scratches out [the inscription]

Commentary:
The rock is broken in half. The first part of the name has been crossed out. The author wrote an ʾ after the ʿ of ʿl and then, realising he had forgotten the l, crossed it out. The f has an extra squiggle which gives it the appearance of a s[2] and one prong of the following ʾ is faint. The letters after the first m are faint.

Provenance:
Unspecified site, Al-Mafraq, Jordan
Jordan

---

KWQ 82

l 'sˡlm b{{n}} ---- h- ṣrt

By 'sˡlm {son of} ---- is the picture

Commentary:
A line of the m has been extended to join the letter to the following b and the arms of the b are attached to the letter read as n. The line read as n is long and has a short horizontal line at one end. It is possible that the additions have been made later or the letter should be read as a z. There are then two relatively large hammered circular shapes which obscure two or more letters and there is a line hammered under them. The t at the end has arms attached to the ends of two of the crossed lines. Lane 1745a: ṣºrah "image picture".

Provenance:
Tell 3, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024235.html

---

KWQ 135

l ʾmr bn drʿ

By ʾmr son of Drʿ

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024292.html

---

KWQ 136

lw

lw

Commentary:
On same face as KWQ 131-135. Probably a false start at an inscription.

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024293.html

---

KWQ 137

l qmy bn ʾṣmʿ bn whb bn ʿmd

By Qmy son of ʾṣmʿ son of Whb son of ʿmd

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024294.html

---

KWQ 138

l wkyt bn drh h- dr wḥd

Wkyt son of Drh was present here alone

Commentary:
There are ligatures joining some of the letters. The crossbar of the t is extended across the middle of the following b which gives it the appearance of a ḥ. The n is attached to the following d and the arms of the r are joined to the h. The second d is attached to the following r the r to the w and the w to the ḥ.

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024295.html

---

KWQ 139

l ʿmrt bn qds[1]

By ʿmrt son of Qds[1]

Commentary:
There is a cartouche surrounding this inscription and KWQ 140.

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024296.html

---

KWQ 140

l ḥl bn khl

By Ḥl son of Khl

Commentary:

There is a short dash after the third l which is a slightly different colour to the other letters. It might be incidental or possibly a n. A cartouche surrounds this inscription and KWQ 139.

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024297.html

---

KWQ 141

l s²gʿt bn ʾṣhb

By S²gʿt son of ʾṣhb

Commentary:
The penultimate letter is squashed in between the ṣ and the b.

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024298.html

---

KWQ 142

l gr{m}t bn ʾḏn

By {Grmt} son of ʾḏn

Commentary:
The inscription is on the left of KWQ 141. There is a cartouche surounding it.

Provenance:
Tell 6, unspecified region, unspecified country.
Wadi Qattafi

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0024299.html

---

LP 1

l ls²ms¹ bn mġny bn nʿmn bn qḥs²

By Ls²ms¹ son of Mġny son of Nʿmn son of Qḥs²

Provenance:
Ruǧm al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.767 / 36.9814]
According to Littmann (1943: 1) this inscription was found about half an hour's ride [that is approximately 2.2 km, see below] west of Al-Ḥifnah. The distance is based on the measures of distance and time for travel on horseback in the *ḥarrah* given by Wetzstein (1860: map) which are the same as those given by Butler, viz: "an average of two and three-quarter miles [= 4.4 km] per hour for ordinary going..." (Butler, Norris & Stoever 1930: vii). The measurement has been taken following the couree of the wadi, assuming that the party was riding in the wadi bed.

l rwḥ bn mlkt bn ḫṭs¹t

By Rwḥ son of Mlkt son of Ḫṭs¹t

Provenance:
Ruǧm al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.767 / 36.9814]
According to Littmann (1943: 1) this inscription was found about half an hour's ride [that is approximately 2.2 km, see below] west of Al-Ḥifnah. The distance is based on the measures of distance and time for travel on horseback in the *ḥarrah* given by Wetzstein (1860: map) which are the same as those given by Butler, viz: "an average of two and three-quarter miles [= 4.4 km] per hour for ordinary going..." (Butler, Norris & Stoever 1930: vii). The measurement has been taken following the couree of the wadi, assuming that the party was riding in the wadi bed.

l ʾnʿm bn ʾnf bn grmʾl w wgd s¹fr ʾnʿm f ngʿ w rʿy h- ʾbl s¹nt mrq nbṭ gw ḏ

By ʾnʿm son of ʾnf son of Grmʾl and he found the inscription of ʾnʿm, so he grieved in pain [for him] and he pastured the camels the year in which the Nabataeans passed by this watering place

Apparatus Criticus:
LP 4: *gw ḏ* "this valley" for "this watering place"
CSNS pp. 93, 192: *s¹nt mr(d) nbṭ ʿwḏ* " the year ʿwḏ rebelled against the Nabataeans" for *s¹nt mrq nbṭ gw ḏ* "the year in which the Nabataeans passed by this valley"

Commentary:
It is tempting to make the emendation suggested by CSNS, but *mrd* in the sense of "he rebelled" requires *ʿl-* "against", and the supposed ʿ of *ʿwḏ* is very large compared to the other examples in the text. On the other hand, the use of a postposed demonstrative *ḏ* with a noun which is not preceded by the article is very rare. See the discussion in Al-Jallad 2015: 81–82. For the interpretation of *gw* see Groom 1983: 128. It is appropriate to Al-Ḥifnah, the location of this inscription, which is place where water is retained just below the surface.

Provenance:
Ruǧm al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.767 / 36.9814]

l mlk bn ʿwḏ bn hwlʾ w ṣyr mn rḥbt md(w)(y)(t)

By Mlk son of ʿwḏ son of Hwlʾ and he returned to a place of permanent water from the Ruḥbah {which was covered with herbage}

Apparatus Criticus:
LP 7: *hwl(y)* for *hwlʾ*.

Commentary:
On *rḥbt* mean "the Ruḥbah" as opposed to *h- rḥbt* which means "this *raḥabah* (a shallow depression in which water collects and produces herbage)" see Macdonald 1992: 23–25.

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is

a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the

wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

l s²dd bn mlkt bn ḫṭs¹t

By S²dd son of Mlkt son of Ḫṭs¹t

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. LP 26

l ʾbgr bn ys¹lm

By ʾbgr son of Ys¹lm

Commentary:
As well as this text, LP 131 [= C 3835], Dussaud M 236 (= C 3706) and Dussaud M 357 (= C 3835) are all from al-Ḥifnah and all read simply *ʾbgr bn ys¹lm*. Although it is difficult to be sure, given that all are known only from hand copies, they would appear to be four, or at least three, different texts, possibly by the same man. C 3835 identifies Dussaud M 357 with LP 131, and this is possible but uncertain.

l s¹ny bn qḥs² w ḥll h- dr wlh ----

By S¹ny son of Qḥs² and he camped here distraught ----

Apparatus Criticus:
LP: *wlh* ---- "yearning ----" for *wlh* "distraught"

Commentary:
The text (or possibly the copy) is unfinished with a few stray marks after the *h*. We have taken the last three letters as a participial circumstance clause *wālih "distraught" reference to his mental state while he was camping there, but it also possible that they should be read *w l- -h* ---- "and his is ----".

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

l gh bn hm

By Gh son of Hm

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. [Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

l flṭt bn tm bn flṭt bn bhs² bn ʾḏnt w ḥll ʿl- h- ḥs¹y f klm -h h- ʾs¹d f h lt {s}{¹}{l}m

By Flṭt son of Tm son of Flṭt son of Bhs² son of ʾḏnt and he camped on the edge of an area of sand then the lion injured him so O Lt [grant] security

Commentary:

The text is carved in large letters over two faces of the rock. A *ḥs¹y* is a place where water sinks easily through the permeable soil or sand and is then stopped by an impervious layer of rock and so is trapped relatively close to the surface and can be reached with only a small amount of digging (Lane 572c–573a, Littmann 1940: 123–124, Groom 1983: 112 under *hisá*). Al-Ḥifnah is a place of this sort and indeed the name, *ḥifnah*, means a place where water collects (see Groom 1983: 111 *Ḥifnah* and 113, under *Ḥufnah*).

Provenance:

Al-Ḥifnah, Al-Suwaydah, Syria

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifnah runs downstream from a series of wells in the wadi bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and may be ancient, others are of the small Bedouin type. In July 1995 three were blocked and one was operational. Site Hf.A is the escarpment of the left bank of the wadi north of the pool, where the major concentration of inscriptions is to be found.

By Ẓnn son of Drʾl son of ʾs²ym son of Drʾl and he camped at this place where the water lies just below the surface and he dug to reach the water and so O Lt [grant] security to whoever leaves [the inscription]

untouched

Apparatus Criticus:
LP 162: *w ḥll h- ḥs¹y b- s¹nt 42* "and he encamped at this water-place in the year 42"

Commentary:
In small incised letters running vertical boustrophedon between the letters of LP 161. The reading is that published in MISS.C. A *ḥs¹y* is a place where water sinks easily through the permeable soil or sand and is then stopped by an impervious layer of rock and so is trapped relatively close to the surface and can be reached with only a small amount of digging (Lane 572c–573a, Littmann 1940: 123–124, Groom 1983: 112 under *hisá*). Al-Ḥifnah is a place of this sort and indeed the name, *ḥifnah*, means a place where water collects (see Groom 1983: 111 *Ḥifnah* and 113, under *Ḥufnah*). The verb *ḫs¹f* means, among other things, "he dug a well so as to reach an unceasing, or a copious,source of water" (see Lane 738b–c).

Provenance:
Al-Ḥifnah, Al-Suwaydah, Syria
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifneh runs downstream from a series of wells in the wadi bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and may be ancient, others are of the small Bedouin type. In July 1995 three were blocked and one was operational. LP 169 (RR 13)

l ʿmrt bn rbʾl bn ʾnʿm bn ʾs¹ w ḥll h- {d}{r} {f} s¹tr w h- bkrt {f} lt ʿwr ḏ yʿwr h- s¹fr

By ʿmrt son of Rbʾl son of ʾnʿm son of ʾs¹ and he camped {here} {and then} built an enclosure and [his is the drawing of] this young she-camel {and so} Lt blind whoever scratches out this inscription

Apparatus Criticus:

LP: *[f ṣ]wr <<w>> h- bkrt* "and drew <<>> the young she-camel" for *{f} s¹tr w h- bkrt* "{and then} built an enclosure and [his is the drawing of] this young she-camel"; *w h lt* "and O Lt" for *f lt* "and so Lt".

Commentary:
On a stone with RR 12 and an elaborate rock drawing. This text is thinly chiselled to the left of LP 170 and runs down to the right of the camel and then curls under it. The lower parts of 3 letters (*d r f*) in the middle have been lost where the edge of the stone has been broken. This was already the case when Littmann copied it. However enough of the tops of the letters have survived to make the reading virtually certain. In the next phrase, the photograph shows that what Littmann copied and read as *w* in *{ṣ}wr* is actually a *t* and so *s¹tr* appears to be a better reading. This is usually found as a substantive in Safaitic, but there is one inscription, SAMAS 9.42.1 in which it occurs as a verb. The rather abrupt *w h- bkrt* "and [his is the drawing of] the young she-camel" can be paralleled in Ms 44. Finally, it can be seen on the photographs that what Littmann copied and read as *w h* before *lt* is actually a badly carved *f*, thus *f lt*.

Provenance:
Ruǧm al-Ruṣayʿī, Al-Suweidah, Syria
[Latitude/Longitude: 32.7978 / 37.1043]
Ruǧm al-Ruṣayʿī is a large cairn with many inscriptions of which Littmann copied only 5. It is c. 1.75 km, as the crow flies, from Biʾr al-Ruṣayʿī, around which there are many cairns, and it is not clear why was given the name Rijm al-Ruṣayʿī. The local bedouin do not appear to know it as this today.

LP 175

l mty bn ʾẓlm bn ndm bn s¹yl

By Mty son of ʾẓlm son of Ndm son of S¹yl

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 216

l bḫlh bn zhyn bn tlb bn klb bn ṭḥrt h- dr

By Bḫlh son of Zhyn son of Tlb son of Klb son of Ṭḥrt was here

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 237 (Mr.A 11)

l ʾḥrb bn s²ḥl bn ʾḥrb bn ms¹k bn ẓʿn bn s²r[[]][[]]b bn ġlmt w nṣb hlt f lt s¹lm s¹nt {g}lḥ h- ḏʾb ʾns¹ w nqʾt l- ḏ yʿwrn h- s¹fr

By ʾḥrb son of S²ḥl son of ʾḥrb son of Ms¹k son of Ẓʿn son of S²rb son of Ġlmt and he set up a standing stone

for Hlt so O Lt [grant] security in the year in which the wolf encountered ʾns[1] and ejection [from the grave] to him who effaces this inscription

Apparatus Criticus:
LP 237: *f h lt* for *f lt; {g}lḥ h- ḏʾb ʾns*[1] "the year in which the wolf encountered men" [or *ʾns*[1] in the commentary]; *yʿwr* for *yʿwrn*.

Commentary:
On one face of a large stone. The author originally wrote *ḥl* after the *r* in the fifth name but then scraped over these letters and wrote the *b*. The divine name/epithet *hlt* is also found in SIJ 840. For another inscription in which the author sets up a standing stone for one deity and then immediately prays to another see RQ.A 9. Note the unusual plural (*yʿwrn*) in the curse.

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed"

consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 258 (Mr.A 2)

l ḫydṯ bn ḫbṯ bn s¹mk bn s¹wr bn mlk bn bdn w ḥll h- dr tbb m- ḥrn b- rʾy ḏkr f h bʿls¹my s¹lm

By Ḫydṯ son of Ḫbṯ son of S¹mk son of S¹wr son of Mlk son of Bdn and he camped here having become lost [on his way] from Ḥrn during the rising of Aries so O Bʿls¹my [grant] security

Commentary:
There is a stray scratch, shallower than the lines which form the letters, between the *lām auctoris* and the *ḫ*. Scratches around the *b* of the second *bn* give it the appearance of a *m*, but it is clearly a *b*. The signs for *b* and *r* are clearly distinguished in this text, with *r* consisting of a long straight line with a short curve at one end. For the interpretation of the verb *tbb* compare Classical Arabic *tabba* "he suffered loss" or "he became lost", here in the infinitive, compare Arabic *tabab*, *tabāb*, *tabīb* "being lost". On *b- rʾy ḏkr* see Al-Jallad 2016: 99.

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. LP 259 (Mr.A 3)

[l] ḥfl bn ʾs¹d bn wʿl bn ḥgml w ġnmt bʿls¹mn m- s²n{ʾ}

{By} Ḥfl son of ʾs¹d son of Wʿl son of Ḥgml and booty Bʿls¹mn from {enemies}

Apparatus Criticus:
LP 259: *gʿl* for *wʿl*; *ġnm -h* "gave him booty" for *ġnmt* "booty"; *bʿs¹m(y)* for *bʿls¹mn.*

Commentary:
The *lām auctoris* and possibly one or more names appear to be missing. LP reads *ġnm -h*, but *ġnmt* is clear on the photograph as is the *n* (not "an incomplete *y*") of *bʿls¹mn*. One side-stroke of the final ʾ is missing. LP reads LP 259.1 as the end of this text but there seems no justification for this since it begins at the opposite side of the face from the end of LP 259. It is possible that both LP 259 and 259.1 begin on the adjacent face.

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. LP 260 (Mr.A 1)

l ʾyl bn ḫbṯ bn s¹mk bn s¹w{r} bn m{k} w h bʿls¹my s¹lm

By ʾyl son of Ḫbṯ son of S¹mk son of S¹wl son of {Mk} and so Bʿls¹my [grant] security

Commentary:
LP 258–260 are on three sections of the same rock face. All except LP 259.1 (= Mr.A 4), are firmly incised. The author of this text would appear to be a brother of the author of LP 258. If this is so, *s¹wl* would appear

to be a mistake for *s¹wr* (in 258), though there are no other examples of *l* in this text for comparison, and carving *r* as a straight line may simply have been an idiosyncrasy of this author. Similarly, *mk* for *mlk* (in 258) could be a mistake, though it might represent a difference of pronunciation. Note that the divine name is *bʿls¹my*, an Arabian re-formation of the more usual *bʿls¹mn* which is found in LP 259.

LP 276

l klṯmt bn ḥmyn h- ʿry

By Klṯmt son of Ḥmyn is the enclosure

Provenance:
Al-Namārah, Rif Dimashq, Syria
[Latitude/Longitude: 32.88545 / 37.29163]
Al-Namārah itself is an "island" in a basin at the confluence of the Wādī al-Ṣawṭ and the Wādī al-Shām. The island rises to a considerable height above the wadi bed. On it's top are the ruins of a Roman fort the outlines of which, and the square north-east and south-west towers, can still be made out. However, much of the masonry has been reused to build a mediaeval mausoleum, including a lintel with an unfinished Greek inscription mentioning Marcus Aurelius (Waddington 1870: no. 2264) and stone doors. There are many Safaitic, Greek and two Latin graffiti on the slopes of the island and the banks of the wadi. In antiquity, there were small dams, cisterns, wells and diversion channels to trap the water and to lead it to nearby fields, see Macdonald 2009.

LP 278

l ḥzr

By Ḥzr

Apparatus Criticus:
LP ḥzr[t] "because ḥzrt is a known name]

Provenance:
Al-Namārah, Rif Dimashq, Syria
[Latitude/Longitude: 32.88545 / 37.29163]
Al-Namārah itself is an "island" in a basin at the confluence of the Wādī al-Ṣawṭ and the Wādī al-Shām. The island rises to a considerable height above the wadi bed. On it's top are the ruins of a Roman fort the outlines of which, and the square north-east and south-west towers, can still be made out. However, much of the masonry has been reused to build a mediaeval mausoleum, including a lintel with an unfinished Greek inscription mentioning Marcus Aurelius (Waddington 1870: no. 2264) and stone doors. There are many Safaitic, Greek and two Latin graffiti on the slopes of the island and the banks of the wadi. In antiquity, there were small dams, cisterns, wells and diversion channels to trap the water and to lead it to nearby fields, see Macdonald 2009.

LP 281 (Is.Mu 889)

l ʾʿdg bn mʿn bn ʾʿdg ḏ- ʾl ḫṣmn w wld h- mʿzy

By ʾʿdg son of Mʿn son of ʾʿdg of the lineage of Ḫṣmn and he helped the goats to give birth

Commentary:
Lightly incised boustrophedon.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 282 (Is.M 26)

l rbʾl bn ʾnhk h- nqt w {{h}} ʾlt rmʿn nqʾt m- qbr l- ḏ yʿwrn -h

By Rbʾl son of ʾnhk is the she-camel and {O} goddess of Rmʿn [inflict] ejection from the grave on whoever may scratch it out

Apparatus Criticus:
LP 282: *(ṣ)m (w) <<>>nqʾt* for *rmʿn nqʾt.*

Commentary:
The two prongs of the fork of the *h* introducing the invocation have been joined making it into a *y*. However the prongs have then been extended beyond the join. The The first letter of *rmʿl* cannot possibly be a *ṣ* as suggested by Littmann and is similar to the *r* of *qbr*. The "flaw in the stone" (LP p. 69) after this letter can be seen on the photograph. The following *m* is faint but clearly visible on the original. Between this and the ʿ

there is a small ridge on the surface and no letter was written. The last letter of the word and the sign which immediately follows it are both considerably longer than the examples of *n* at the beginning of the text but appreciably shorter than the *l* following *qrb* and similar in length to the penultimate letter. *Rmʿn* is presumably a toponym referring to al-ʿĪsāwī itself or a place nearby since the author would be unlikely to invoke the topical deity of another place to protect a drawing left here. Littmann interpreted *yʿwrn* as the 3rd m. pl of the suffix conjugation. However, Al-Jallad (2015: 97–98) considers is more likely that it represents the energic ending. For the interpretation of *nqʾt* see Al-Jallad 2015: 335, under QYʾ

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. LP 284 (Is.M 25)

l bʿwn bn kmd bn ʿlhm h- nqt

By Bʿwn son of Kmd son of ʿlhm is the she-camel

Apparatus Criticus:
LP 284: *rgwn* for *bʿwn*

Commentary:
Although the name *bʿwn* is previously unattested, Littmann's reading *rgwn* seems less likely. The *b* is identical to the examples in the two *bn*'s and the second letter of the name would be very small for a *g*. Written round a drawing of a she-camel on an adjacent face to that bearing LP 283

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. LP 285 (LP 1096; Is.Mu 12)

l ʾws^{1}ʾl bn s^{1}ly bn wdm

By ʾws^{1}ʾl son of S^{1}ly son of Wdm

Apparatus Criticus:
LP 285: *s^{1}ny for s^{1}ly* ;
LP 1096: *ṣ(ḥ)ly* for *ṣly*; *glm* for *wdm*

Commentary:
LP 285 (= LP 1096) and LP 286 (= LP 1095) are on the same face of the same rock. LP 1095–1096 were copied by "servants of the Princeton University Archaeological Expedition" (see LP p. iii) and Littmann did not recognize the identity of these two copies with LP 285 and 286, which he himself had copied. His emendation of the second name in LP 1096, was forced by the fact that the copyist had assigned the *t* of *ʾʿtr* in LP 1095 (= LP 286) to this text, an understandable error given its position. Since *s^{1}tly seemed an unlikely name Littmann read it as *ṣ(ḥ)ly*.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. LP 286 (LP 1095; Is.Mu 13)

l ymlk bt ʿm bn ʾʿtr bn s¹mkʾl w rḏy s¹lm

By Ymlk daughter of ʿm son of ʾʿtr son of S¹mkʾl and Rḏy [grant] security

Apparatus Criticus:
LP 286: *b(n)* for *bt* though he notes that it was *bt* on the stone; *ʾʿtb* for *ʾʿtr*
LP. 1095: *ʾmn* bn for *ymlk*; *btʿm* for *bt ʿm*; *b[n]* for *bn*; *ṣʿb* for *ʾʿtr*; *w [h] rḏy* for *w rḏy*

Commentary:
Bt for *bnt* is frequent in Safaitic. The upper fork of the *ʾ* of the third name has been filled in. It is not necessary to assume with LP that the *ʿ* and *t* of this name were omitted and added above the line. If LP 285 (= Mu 12) was written first it would have forced a change of direction on the author of LP 286 (= Mu 13). The fourth letter of *ʾʿtr* has a shallower curve, like the *r* of *rḏy*, unlike the tighter curves of the *b*'s of *bt* and *bn*. There appears to be a line joining the *l* of the last name and the following *w*. LP 1095–1096 were copied by "servants of the Princeton University Archaeological Expedition" (Littmann 1943: iii) and Littmann did not recognize the identity of these two copies with LP 285 and 286, which he himself had copied. The copyist of 1095 and 1096 assigned the *t* of *ʾʿtr* in LP 1095 to the second name (*s¹ly*) in LP 1096 (= LP 285) which Littmann then emended to *s¹(ḥ)ly*.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī Area H. Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 297 (Is.Mu 25)

l ʿwqʾ<l> bn hḏ{t} w rʿy h- nḫl ġzz s¹nt qtl mʿn

By {ʿwqʾl} son of Hḏt and he pastured the valley while raiding in the year in which Mʿn was killed

Apparatus Criticus:
LP: *[w] ġzz* for *ġzz*

Commentary:
The last letter of the first name looks like a *h*, but it seems likely that the side bar was added later since it is slightly wider than the long stroke. The last letter of the second name is also in doubt since the horizontal bar is much thicker than the vertical, and it is possible that the name was actually *hḏn.* We take *ġzz* as an active participle in the accusative of *ḥāl*.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria

LP 299 (Is.Mu 31)

l nẓmʾl bn mms[2]y bn bʿḏrh bn ġḍḍt bn ʾnḍt bn ws[2]yt w ṣyr mn- rḥbt f wdʿ

By Nẓmʾl son of Mms[2]y son of Bʿḏrh son of Ġḍḍt son of ʾnḍt son of Ws[2]yt and he returned to the watering place from rḥbt, and he became wealthy

Apparatus Criticus:
LP 299: *ʾnḍḫ* for *ʾnḍt*;

Commentary:
The inscription is carved on three faces of the stone. The final word is difficult to make out on the photograph, but the second letter is almost certainly a *d* rather than a *g* as copied by Littmann. The translation of *wdʿ* is based on comparison with Arabic *wadaʿa* "to become wealthy", though it could also mean "he became calm" (Hava 859).

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

LP 305 (Is.Mu 44)

l mnʾl bn ʾws¹ʾl bn s¹ẖr bn ḥml w wgd s¹fr mnʾl w s¹fr tmʾl w s¹fr s¹ẖr <<>> ḍlln f h lt s¹lm l- ḏ s¹ʾr w nqmt m ḏ qtl w wgm ʿl- ʾs¹ w ʿl- wdʿ gr {-h} ḍlly w h bʿl[[]][[]][[]]s¹mn ʿwr ḏ yʿwr h- s¹fr

By Mnʾl son of ʾws¹ʾl son of S¹ẖr son of Ḥml and he found the inscription of Mnʾl and the inscription of Tmʾl and the inscription of S¹ẖr who are lost and so O Lt [grant] security to him who remains and revenge on him who killed [them] and he grieved for ʾs¹ and for Wdʿ {his} neighbour both lost and O Bʿls¹mn blind whoever scratches out the inscription

Apparatus Criticus:
LP 305 reads the scratched over *d* before *ḍlln* as a *h*; *wdʿ w kl ḍlly* for *wdʿ gr {-h} ḍlly.*

Commentary:
After *w s¹fr s¹ẖr* the author appears to have carved a *d* before scratching over it and carving a *ḍ*. It is impossible to know whether he had originally intended to carve something else or whether /d/ and /ḍ/ were close enough in his dialect for him to be uncertain as to which was required. *Ḍlln* here is the plural of the passive participle. Although, it literally means "lost", it is clear from what follows that they had been killed. Whereas, *s¹ʾr* is usually found in blessings on those who leave the inscription "untouched", here, in the context of the cry for revenge on the murderer(s), it would seem to refer to the author as the one who was not killed, and so "remains". After *wdʿ*, Littmann reads *w kl ḍlly*, despite the fact that his copy has *gr {-h}*. We have interpreted *gr* on the basis of Arabic *ǧār* "neighbour". If the next letter is a *h*, as we have read it, it's fork has been covered by a thicker line running from the *ḍ* across it and the *r* and ending just above the *g*. *Ḍlly* here would be the dual referring to the two men for whom he was grieving. In the following prayer, the author first continued the divine name *bʿls¹mn* on the same face, but then realised that he did not have enough space for the rest of the prayer and so scratched out the letters *lmn* and recarved them on the adjacent face with the rest of the prayer.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. LP 306 (Is.Mu 60)

l bnʾlh bn ʾḥlm bn ʾġrr w ṯql ʿl- [[]] ʾḫ -h w ʿl- ʾb -h w ʿl- dd -h w qnṭ h- s²nʾ f h lt [[]] {w} gdʿwḏ wqyt w wgd ʾṯr ʾs²yʿ -h f ngʿ

By Bnʾlh son of ʾḥlm son of ʾġrr and he was heavy-hearted on account of his brother and of his father and of his paternal uncle and he was afraid of the enemy and so O Lt {and} Gd-ʿwḏ [grant] protection; and he found the inscriptions of his companions and he was sad.

Apparatus Criticus:
LP 306: *ʾzkr* for *ʾġrr*; *[ʾ]b -h* for *ʾb -h*; *w gdʿwḏ* for *[[]] {w} gdʿwḏ*

Commentary:
The second letter of the third name is clearly *ġ* and though the next looks at first like a *k* it has a hook at the bottom of the stem making it a *r*. The name *ʾġrr* is unattested but compare. Arabic *aġarr* "of a bright complexion". The author erased a letter between *ʿl-* and *ʾḫ*. Between *lt* and *gdʿwḏ* he wrote *w* twice and seems to have tried to erase both. We follow Littmann's interpretation of the words *ṯql* and *qnṭ*.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

LP 307 (Is.Mu 61)

l ʾḥlm bn bnʾlh bn ʾ<ḥ>lm

By ʾḥlm son of Bnʾlh son of {ʾḥlm}

Commentary:
Area H. The author appears to have written *ʾʾlm* for the third name and then erased the second *ʾ*. *ʾḥlm* is restored on the basis of LP 306

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

LP 311 (Is.M 89)

l hgry bn ṯry bn kn h- ḫṭṭ

By Hgry son of Ṯry son of Kn is the carving

Apparatus Criticus:
LP 311: hghy for hgry; omits bn kn; reads h- ḫṭṭ with LP 312.

Commentary:
Associated drawing to be numbered. See also photo PH ZF 7-8 This author may be the same as that of C 54. The reading of the third and fourth letters is complicated by the fact that the surface in this area of the face has flaked and repatinated to exactly the same colour as the letters. It is this flaking which is responsible for the apparent fork at the end of the fifth letter which caused Littmann to read it as h. The second bn is at 90° to the rest of the text and the b is square as opposed to the rounded first b. Although the letters h- ḫṭṭ are incised (like M 90) rather than chiselled (like the rest of M 89) their size and position suggests that they are more likely to belong to 89 than to 90.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

LP 313 (Is.M 87)

l mġny bn s^{2}br bn s^{1}ry bn s^{1}mʿ bn s^{1}ḫb w wgd ʾṯr ʾs^{2}yʿ -h f wgm

By Mġny son of S^{2}br son of S^{1}ry son of S^{1}mʿ son of S^{1}ḫb and he found the inscriptions of his companions and he grieved

Apparatus Criticus:
LP 313: *s^{1}ḫr* for *s^{1}ḫb*

Commentary:
The last letter of the fifth name has a small abrasion at each end which may cover hooks making the name *s^{1}ḫr* as read by Littmann. However, if so, these would be far less pronounced than the hooks of the *r*'s in *s^{2}br*, *s^{1}ry* and *ʾṯr* and a careful examination of the original convinced us that the letter was *b*.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

LP 315 (Is.M 88)

l ʾḏrb bn ghm

By ʾḏrb bn Ghm

Apparatus Criticus:
LP 315: *ʾḏrr* for *ʾḏrb* but in the commentary *ʾḏrb* is given as one of several possible alternative readings.

Commentary:
The *r* and the *b* of the first name are clearly distinguished and the latter is identical to the *b* of *bn*. There is therefore is no doubt about the reading *ʾḏrb*. Immediately after the *b* there is a failed attempt at writing *bn* and Littmann copied this rather than the successful second attempt immediately below it.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. LP 325 (Is.M. 112; MISS.G 1)

l mṭr bn ʿm bn mṭr bn ʾnʿm bn qdm ḏ- ʾl ʿwḏ w dmy l- -h ʾb -h w ḫrṣ h- nw mʿ ʾḫ -h m- mdbr f h lt s¹lm w ġnmt l- ḏ dʿy h- s¹fr w ʿwr w ḫrs¹ l- ḏ yʿwr h- ḫṭṭ

By Mṭr son of ʿm son of mṭr son of ʾnʿm son of Qdm of the lineage of ʿwḏ and his father drew a picture for him and he kept watch with his brother for the migrating group from the desert and O Lt [grant] booty to whoever leaves the inscription [intact] and blind and strike dumb whoever scratches out the carving

Apparatus Criticus:
LP 325: *w ḫrṣ -h mʿ ʾḫ -h m- mdbr* "And there appeared to him [a vision of] his father and he looked out for him with his brother from the desert" for *w ḫrṣ h- nw mʿ ʾḫ -h m- mdbr* "and his father drew a picture for him and he kept watch with his brother for the migrating group from the desert"
Macdonald 1990: 27 n. 5: *w dmy l- -h ʾb -h* "and his father drew a picture for him"
Macdonald, Al Muʾazzin & Nehmé 1996: 470: as here.
The final *ṭ* of *ḫṭṭ*, missed by Littmann, can be seen just below the chin of the Bactrian camel.

Commentary:
The reading is clear though some parts are visible only in certain lights. The inscription is finely incised and the letters have square forms from the beginning up to and including the first two letters of *ḫrṣ*, after which the "normal" script is used. The text clearly postdates the drawing, since it carefully avoids encroaching on it and thus was carved by the author *after* his father had made the drawing. On *dmy l- -h* see Macdonald, Al Muʾazzin & Nehmé 1996: 470; on *h- nw* see p. 471. Note that the stone bearing LP 403 was found a few metres away from this stone and is by a first cousin of the author of LP 325 who says that the drawing of a dancing girl encircled by his text was made by his paternal uncle ʿm, the father of Mṭr in LP 325. The meaning of the verb *dmy* "to draw a picture" was first proposed by G. Lankester Harding in the commentary to HCH 73. Another example of the expression *w dmy l- -h* "and drew a picture for him" can be found in C 1186. The syntax of the phrase *w ḫrṣ h- nw mʿ ʾḫ -h m- mdbr* is awkward and the literal meaning "while they kept watch for the tribal migration with his brother from the inner desert." could also mean that "they kept watch for the tribal migration in which his brother was taking part [on its way] from the inner desert." In either case *mʿ ʾḫ -h* may have been an afterthought.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice

when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 326 (Is.M 113; MISS p. 473)

l ms^{1}k bn ʾbrqn b[n] {m}{s^1}k w {r}{ʿ}y h- ḍʾn s^{1}nt s^{1}rt mlk b- h- ʿrḍ f h lt s^{1}lm

By Ms^{1}k son of ʾbrqn son of {Ms^{1}k} and {he pastured} the sheep the year Mlk served in the great army and so O Lt [grant] security

Apparatus Criticus:
LP 326: *s^{1}nt s^{1}r (h-) mlk - h- ʿrḍ* "the year {the} king travelled in this valley [?]" for *s^{1}nt s^{1}rt mlk b- h- ʿrḍ* "the year Mlk served in the [great] army."

Commentary:
The inscription was carved after the the drawing and LP 325, which it carefully avoids. The *s^1* of the third name is attached to the *y* of *yʿwr* in LP 325 and the letter(s?) before it is/are damaged by abrasions. The word after *s^{1}nt* is clearly *s^{1}rt* (on both the original and Littmann's copy) and LP's reading *s^{1}r h- mlk* is therefore impossible. For our interpretation see MISS p. 468. The last three letters are lightly scratched. For the verb *s^{1}rt* "to serve in a military unit" see Macdonald 2014: 59–160, and n. 78. For *ʿrḍ* compare Arabic *arḍ/irḍ* an "army" or a "great army" (Lane 2007a, 2008a).

LP 326.1 (Is.M 114, 115; MISS p. 473)

l mnʿ ---- bn mr{'} ---- {s²}{f}r ḫl {-h} mmk

By Mnʿ ---- son of Mr{'} ---- *s²rḫ* {his} maternal uncle *mmk*

Apparatus Criticus:
Not read in LP.

Commentary:
The text starts just behind the head of the dromedary and runs up the front of its hump and down the back of it. There is something between the front legs of the Bactrian camel but it is too damaged to interpret and may not belong to the inscription. There is a patch of heavy hammering immediately above the dromedary's hump which has obscured part of the text and only the lower parts of an *s²* and a *f* can be seen after it. The last three letters are facing in the opposite direction to the rest of the text and may not belong to it. They were read as a separate inscription by Is.M 115.

Provenance:

LP 330 (Is.Mu 144)

l qdm bn ʾnʿm bn mġny bn mġny w qyẓ ʿl- h- nmrt w qnṭ h- s²nʾ f h lt s¹lm

By Qdm son of ʾnʿm son of Mġny son of Mġny and he spent the dry season near Al-Namārah and he feared the enemy, so, O Lt, [grant] security

Apparatus Criticus:
LP 330: *ʿl- h- nmrt* "in front of han-Namārat" for "near Al-Namārah"

Commentary:
The usual expression is *w qyẓ* + place name or topographic feature, and it is not entirely clear what *qyẓ ʿl-* implies. Al-ʿĪsāwī where this inscription was found is about 3.3 km north of the basin of Al-Namārah and about 1 km north-east of the modern barrage at the north-eastern end of the (ancient) lake at Ishbikkat al-Namārah. For this reason we have translated *ʿl-* as "near" here,

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria

LP 334 (Is.Mu 193)

l mrʾ bn mqtl bn mġyr w wgd ʾṯr ʿḏ f w[[]]gm ʿl- ʿḏ

By Mrʾ son of Mqtl son of Mġyr and he found the traces of ʿḏ and so {he grieved} for ʿḏ

Apparatus Criticus:
LP 334: *ʾṯr ʿḏr (w) wʿl (w) (w)gm ʿl- ʿḏ* for *ʾṯr* "the inscriptions of ʿḏr {and} Wʿl {and} {he laid a stone on the tomb} of ʿḏ" for *ʾṯr ʿḏ f w[[]]gm ʿl- ʿḏ* "the traces of ʿḏ and so {he grieved} for ʿḏ"

Commentary:
It seems that the author carved the *w* of *wgm*, but omitted the *gm*, before carving *ʿl- ʿḏ*. Realising his error he then lightly scratched this over, but retained the *w* and carved *gm ʿl- ʿḏ* to the left of the original *ʿl- ʿḏ*. The reading has been rendered more difficult by later hammering over some of the letters. The *ʿḏ* whose traces the author found could be *ʿḏ bn ʿḏ* the author of LP 332 or *ʿḏ bn ġṯ* the author of LP 333.

By Lfʿt son of Bʾs¹h son of Bqrt son of {Ḫld}. And, O Rḍw, [grant] health for the mount she-camels were sickened by their date-stones (or: during his absence)

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 342 (Is.Mu 117)

l hnʾ bn s²rk bn mḥlm bn ʾḏnt bn wrd bn nġbr ḏ- ʾl ʿwḏ w wgd s¹fr ʾs²yʿ -h f ndm s¹nt ws¹q qbr w ʿzz h- ḥmy ʾl ʿwḏ f h gdʿwḏ w ds²r w h lt mʿwn s¹lm l- ḏ s¹ʾr w ġnyt m- s²hṣ w mḥlt w ḫrs¹ w ʿrg l- ḏ ḫbl h- s¹fr w ġnmt l- ḏ dʿy

By Hnʾ son of S²rk son of Mḥlm son of ʾḏnt son of Wrd son of Nġbr of the lineage of ʿwḏ and he found the inscription of his companions and so he was devastated by grief in the year of the struggle of Qbr and ʿzz [over] this protected area of pasture of the lineage of ʿwḏ and so O Gdʿwḏ and Ds²r and O Lt [grant] secure help to whoever leaves this inscription untouched and freedom from want but [inflict] dearth of pasture and dumbness and lameness on whoever would damage this writing and [grant] booty to whoever would read [it] aloud

Apparatus Criticus:
LP 342: *s¹nt ws¹q qbr w ʿzz h- ḥmy ʾl ʿwḏ* "in the year in which he united tombs and made them honoured as a sanctuary of the people ofʿwḏ" for "in the year of the struggle of Qbr and ʿzz [over] this protected area of

pasture of the lineage of ʿwḏ"

Commentary:
The expression *h- ḥmy ʾl ʿwḏ* is an example of the demonstrative adjective *h-* used before a genitive construction, on which see Al-Jallad 2015: 77–78. For *ḥmy* (cg. Arabic *ḥimā*) as an area of protected pasture, either forbidden to the animals of all but a certain group, or tribal leader, or dedicated to a deity, or a sort of reservation where wild and domestic animals could graze without being hunted or slaughtered. See, for instance, Chelhod 1964: 230–231; 1979: 393; Henninger 1981: 256–258. The word *mʿwn* is either an epithet of Lt (as in Al-Jallad 2015: 268) or could be in construct with *s¹lm* as interpreted here. Compare Classical Arabic *maʿūn*, *maʿwunah*, *maʿwanah* "help, assistance" (Lane 2203c).

Provenance:

LP 343 (Is.Mu 118)

l ẓnʾl bn s¹lmn bn s¹lm w rʿy s¹nt s¹mh h- qy

By Ẓnʾl son of S¹lmn son of S¹lm and he pastured in the year in which he pastured the desert

Apparatus Criticus:
LP 343: *s¹nt s¹mh h- qṣl* "the year in which he let the small herd of camels pasture" for *s¹nt s¹mh h- qy* "the year in which he pastured the desert"

Commentary:
Unfortunately LP's interpretation was based on taking the *t* as a *ṣ* and taking a stray line at the end of LP 342 as a *l* belonging to the end of this text. As can be seen on the photographs, the line is much thicker and more firmly incised than the last two letters of this text and there would have been no reason for the author to have placed it there if it was part of his text. There are thinly scratched lines crossing between LP 343 and the last line of of LP 342 and one of these crossed the bottom of the final *y* in LP 343. LP seems to have mistaken this for the fork of a *ṣ*. All the letters are clear but it is difficult to interpret the text. The translation offered here is not very satisfactory. It is based on the Arabic verb *sammaha* "to let [beasts] pasture" (Hava p. 337b) and Arabic *qiyy* "desert" (Hava p. 636a).

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria

LP 347

Apparatus Criticus:
This was not included in C.

Commentary:
A chiselled *ṣ* between *bn* and *ʿbṭ* of LP 346 [= C 3264] and three other possible letters around the end of the text were read by Littmann as LP 347 *(l ṣʿb*). However, their position on the stone and their distribution in around C 3264 make this improbable and they do not seem to constitute a text.

The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 391: *f ngʿ kbr w [wgm] ʿl* for *f ngʿ kbr w ʿl*

Commentary:
The last two letters are on an adjacent face and are not visible on any of the photographs. However, they occur in Littmann's and the SESP copies.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 406

l ʾs¹ bn ʾs¹d bn rbʾl bn ʾnʿm bn ms¹k bn s²kr bn ġlmt bn ʿbd w wr{d} {b-} {h-} mrb w ḫws¹ ʾbl -h {ʾ}b -h [h-]gw ṣlf h- s²ty s¹nt ngy wdn m- rm <<>>

By ʾs¹ son of ʾs¹d son of Rbʾl son of ʾnʿm son of Ms¹k son of S²kr son of Ġlmt son of ʿbd and {he came to water} {at} {this *mrb*} and {his father} sent his camels to water one by one in the *ǧaww* the winter having brought no rain the year Wdn fled from Roman territory

Apparatus Criticus:
LP 406: *w wrd h- nmr{t}* for *w wr{d} {b-} {h-} mrb*; *w ḫws¹ ʾbl [ʾ][ṯ]r ḏ w wṣl f h-s²ty* for *w ḫws¹ ʾbl -h {ʾ}b -h [h-]gw ṣlf h- s²ty*
MST p. 7 & n. 30: *w ṣlf h- s²ty* "the winter brought no rain"

Commentary:
w wr{d} {b-} {h-} mrb: As can be seen on the photographs, Littmann's reading *w wrd h- nmr{t}* is not possible. A *marabb* in Arabic is an area of "low-lying ground where the rain-water of a channel is absorbed" (Groom 1983: 177), hence the water is not very far below the surface. *w ḫws¹ ʾbl -h {ʾ}b -h [h-]gw*: Again, Littmann's reading is not supported by the photographs. In Arabic, a *ǧaww* is topographical term meaning "a basin in which water collects", an "open plain with many wells" (Groom 1983: 129), and clearly the context requires something similar to this. *ṣlf h- s²ty*. In Classical Arabic, the basic meaning of the root Ṣ-L-F is to "disappoint expectations" and the verb is used in for instance *ṣalifa ʾl-saḥāb* "the clouds had in them no water" (Lane 1717c–1718a), hence here "the winter having brought no rain" (see Macdonald 1992: 7 and n. 30). At the end of the text, there is waht looks like a *h* carved at right angles to the letters *rm* and which does

not seem to be part of the text.

By Wrd son of Ḥr son of Wrd and he camped here and pastured on spring herbage during the cosmical setting/full moon of Libra and he was saved the year in which calamity befell his children through the epidemic of pox [lit. the pox of the people] and the live-stock died [lit. went astray] and so O Bʿls^{1}mn [send] relief to whoever leaves intact and blindness to whoever scratches out the writing

Apparatus Criticus:
LP 407: *ḥb* for *ḥr* ; *rʿy bql b- ks^{1}ʾ h- ʾmt* "and he tended flocks seeking green fodder at the expense of the community" for *rʿy bql b- ks^{1}ʾ ʾmt* "pastured on spring herbage during the cosmical setting/full moon of Libra"; *w ngy s^{1}nt bʾs^{1} m- s^{2}ry h- ns^{1} ʾndh* "and he rushed forth in the year in which he was grieved by the scoff of the people" for *w ngy s^{1}nt {ʾ}bʾs^{1} m- s^{2}ry h- ns^{1} ʾld -h* "and he was saved the year in which calamity befell his children through the epidemic of pox [lit. the pox of the people]"; *w ḏll h- nʿm* "he drove together and lost the camels" for "and the livestock died [lit. went astray]".

O'Connor (1986: 609-610) wrongly emends what is clearly *m- s^{2}ry* to read *ms^{2}rk*.

Commentary:
The *r*'s in this text have hooks and the second name is clearly *ḥr*. For *b- ks^{1}ʾ ʾmt* meaning "during the cosmical setting/full moon of Libra" see Al-Jallad 2016: 101. Littmann omitted the *{ʾ}* after *s^{1}nt* on his copy. On the black-and-white photograph showing a detail of this section of the text the very faint lower fork of the *ʾ* can be made out. In *s^{1}nt {ʾ}bʾs^{1} m- s^{2}ry h- ns^{1} ʾld -h*, the verb is *ʾbʾs^{1}* "calamity befell (him)" (Lane 146a), the subject being *ʾld -h* (*ʾawladu-hu*). In the expression *s^{2}ry h- ns^{1}*, *s^{2}ry* would seem to be cognate with Classical Arabic *s^{2}aran* "a kind of pox (Lane 1545c) and *h- ns^{1}* "of the people", thus "the pox of the people", i.e. "an epidemic". *ḏll* may be meant literally "went astray" or metaphorically "died". *nʿm* = "camels, cattle, sheep". Note that O'Connor (1986: 609-610) wrongly emends the text in order to create the word ms^{2}rk See also Photo Misc PH 24. s^{1}nt h- bʾs^{1} m- s^{2}ryhns^{1}ʾl-dhw perhaps h- bʾs^{1} m- s^{2}ry h- nʾs^{1} ʾld -h [ld = ʿgreat enemyʾ] (M & Mu)

Provenance:

[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

By S¹krn son of Tmn son of Hʿwḏ

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 442 (Is.L 63)

l mʿḍ bn ḥmyn h- bkrt f h rḍw nqm l- nhḍ

By Mʿḍ son of Ḥmyn is [the drawing of] the young she-camel so O Rḍw [grant] revenge for Nhḍ

Apparatus Criticus:
LP 442 takes the inscription to be "a document of property or a record of sale".

Commentary:
It is not clear what *nhḍ* means here. In Arabic, *nahda* means to "arise, hasten" and *inhaḍḍa* (√H-Ḍ-Ḍ) means "to be broken or crushed", neither of which seem suitable for this context. It seems therefore better to take it as the personal name which is known in Safaitic.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria

LP 457

l ʾs¹ h- ʿr bn ʿz{z}t

By ʾs¹ is the hinny son of {ʿzzt}

Commentary:
In his commentary to C 511 — which ironically is not an inscription of this type — C notes that C 3506, 4780, and LP 457 are other examples of the structure where the genealogy is interrupted by a statement. Note, however, that he gives a much longer list but that the other inscriptions he cites are not of this type. Possibly the generation(s) after the statement were added as an afterthought. For the interpretation of *ʿr* as " a hinny" see Macdonald in press a

By Whblh son of Mlk son of Whblh son of Mrʾlh son of ʾḥlm son of Lbb and he grieved for Mlk and for Ḫrg and for Gm and for ʾys¹ and for Ẓn. So, O Lt and Ds²r, grant blood-revenge! And strike blind him who effaces (this inscription)! And may the lion alight upon the effacer! Wqʿ of the tribe of Zdʾl

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 463 (Is.R 135)

l rhn bn s²gʿt h- frs¹

By Rhn son of S²gʿt is the horse

Apparatus Criticus:
LP 463: *s²ġʿ* for *s²gʿt*

Commentary:
On the same face as LP 464. It seems that the author of LP 464 drew the picture but that the author of this inscription (LP 463) then appropriated the credit for the drawing and rendered the original author's name unrecognizable. In view of this, it seems likely that the author of LP 464 used the end of of 463 (*t h- frs¹*) as the end of his own inscription.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

LP 464 (Is.R 134)

l ʿ{{b}}dt h- frs¹

By {ʿbdt} is the horse

Apparatus Criticus:
LP: *ʿʾdt* for *ʿ{{b}}dt*

Commentary:
On the same face as LP 463 and the drawing of a horse. The second letter has been filled in and the third has had projections added it to turn it from a *b* to a *ʾ*. It seems that the author of LP 464 carved the drawing but that the author of LP 463 then appropriated the credit for the drawing by carving his name at such an angle that he could use the *t* of the original author's name and *h- frs¹*.

Provenance:

The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the

Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

l ḥwr

By Ḥwr

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 665

l qdm bn ẓnn bn ṭḥr

By Qdm son of Ẓnn son of Ṭḥr

Provenance:
"On the road from Qabr Nāṣir to Ṣanayim al-Gharz, not far from east from Ghadīr al-Darb" (Littmann 1943: 170), Rif Dimashq, Syria
[Latitude/Longitude: 32.8333 / 37.0667]
Unfortunately, the Safaitic Epigraphic Survey Programme was unable to locate the sites of Qabr Nāṣir and Ṣanayim al-Gharz and they do not appear in Geonames. Dussaud & Macler describe Ghadīr al-Darb as "a muddy pool of water" in Wādī al-Gharz (1903: 27 [429]). The co-ordinates given above are those provided by Geonames, but this places it some 220 m north of the left bank of the wadi, so they should be taken as approximate.

l ḥny bn s¹ḫr bn ʿbd bn ʾdm bn ms¹k bn s²rb w tʾs¹ rdf bn ʾḫ -h qtl ʿrḍt f h lt ṯʾr m ʾ(ẓ)lf (w) (ṯ)(b)r l- -hm

By Ḥny son of S¹ḫr son of ʿbd son of ʾdm son of Ms¹k son of S²rb and he despaired of Rdf, his brother's son, who was killed by/in an army, so, O Lt, he will have vengeance against the ones who {committed this act} and {destruction} be upon them!

Provenance:
"On the road from Qabr Nāṣir to Ṣanayim al-Gharz, not far from east from Ghadīr al-Darb" (Littmann 1943: 170), Rif Dimashq, Syria
[Latitude/Longitude: 32.8333 / 37.0667]

Unfortunately, the Safaitic Epigraphic Survey Programme was unable to locate the sites of Qabr Nāṣir and Ṣanayim al-Gharz and they do not appear in Geonames. Dussaud & Macler describe Ghadīr al-Darb as "a muddy pool of water" in Wādī al-Gharz (1903: 27 [429]). The co-ordinates given above are those provided by Geonames, but this places it some 220 m north of the left bank of the wadi, so they should be taken as approximate.

LP 769

l ḍb bn thmy bn ʿbd bn wrd

By Ḍb son of Thmy son of ʿbd son of Wrd

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of

which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

l ʾmr bn ʿwḏ bn ḥy

By ʾmr son of ʿwḏ son of Ḥy

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the wadi, north of the pool. This is site C in Macdonald, Al Muʾazzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. There are several pools in the wadi, some of which are said to contain water throughout the year. The bed of the wadi is wide enough to secure pasturage for the animals of the Bedawin during spring-time. The bank of the south [right] side is rather high and steep, and at a few places it is overhanging so that there is even shelter against the rain. In the bed of the wadi there are a great many camping-places: stone fences, more or less round, encircling places of different size that are cleaned of stones. There are also several tombs, one of which is surrounded by a small fence and seems to be a Bedawin sanctuary being covered with rags and locks of hair. The Safaitic inscriptions are mostly on the banks or behind them" (Littmann 1943: 1).

Provenance:
Al-Ḥifnah, Al-Suweidah, Syria
[Latitude/Longitude: 32.76784 / 37.00326]
The Wādī al-Shām is a wide gorge at this point and the site of al-Ḥifna runs downstream from a series of wells in the wādī bed to a series of pools which were still full in mid-July 1995. Some of the wells are large and probably ancient, others are of the small bedouin type. In July 1995 three were blocked and one was operational. The main concentration of inscriptions is to be found on the escarpment of the left bank of the

wadi, north of the pool. This is site C in Macdonald, Al Mu'azzin, Nehmé 1996. Littmann wrote "Al-Ḥifnah is a water-place in the Wādī al-Shām, between the Ḥawrān mountains [Ǧabal al-ʿArab] and al-Nemārah. l grm

By Grm

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

l ḥlqn bn ʾkl

By Ḥlqn son of ʾkl

Provenance:
Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

Al-Mrōshan, Al-Suweidah, Syria
[Latitude/Longitude: 32.844275 / 37.19575]
Al-Mrōshan consists of four long, low mounds, running roughly east-west in a flat area where the Wādī al-Gharz spreads out. These mounds create a series of "gorges" perhaps 3 m high in the wadi which is otherwise very flat and at this point hardly distinguishable from the surrounding area, the "wadi-bed" consisting of several channels approximately 30–80 cm deep and 4–10 m wide. The southerly three mounds are covered with graves and enclosures. Much of the rock is not suitable for inscribing. It was visited in 1995 by the Safaitic Epigraphic Survey Programme and all the published texts it rediscovered came from the most northerly of the southern three mounds, and most were concentrated at its eastern end.

LP 925 see C 4360

Provenance:
Al-Namārah, Rif Dimashq, Syria
[Latitude/Longitude: 32.88545 / 37.29163]
Al-Namārah itself is an "island" in a basin at the confluence of the Wādī al-Ṣawṭ and the Wādī al-Shām. The island rises to a considerable height above the wadi bed. On it's top are the ruins of a Roman fort the outlines of which, and the square north-east and south-west towers, can still be made out. However, much of the masonry has been reused to build a mediaeval mausoleum, including a lintel with an unfinished Greek inscription mentioning Marcus Aurelius (Waddington 1870: no. 2264) and stone doors. There are many Safaitic, Greek and two Latin graffiti on the slopes of the island and the banks of the wadi. In antiquity, there were small dams, cisterns, wells and diversion channels to trap the water and to lead it to nearby fields, see Macdonald 2009.

By S¹hm son of Fny son of Fny son of Qdm son of Fny son of Ġyrʾl and he grieved for his brother

Commentary:
C wrongly identifies this text with DM 515 = C 4406.

Provenance:
Al-Namārah, Rif Dimashq, Syria
[Latitude/Longitude: 32.88545 / 37.29163]
Al-Namārah itself is an "island" in a basin at the confluence of the Wādī al-Ṣawṭ and the Wādī al-Shām. The island rises to a considerable height above the wadi bed. On it's top are the ruins of a Roman fort the outlines of which, and the square north-east and south-west towers, can still be made out. However, much of the masonry has been reused to build a mediaeval mausoleum, including a lintel with an unfinished Greek inscription mentioning Marcus Aurelius (Waddington 1870: no. 2264) and stone doors. There are many Safaitic, Greek and two Latin graffiti on the slopes of the island and the banks of the wadi. In antiquity, there were small dams, cisterns, wells and diversion channels to trap the water and to lead it to nearby fields, see Macdonald 2009.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.

LP 968

l ʾmn bn bdly w rʿ(y) (h-) (ʾ)bl

By ʾmn son of Bdly and he {pastured the camels}

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.89645 / 37.31101]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower. Littmann visited the site twice when he and other members of the expeditions copied some 450 inscriptions. Between 1996 and 2003, the Safaitic Epigraphic Survey Programme [SESP] made a comprehensive survey of the site recording over 3500 inscriptions.
