Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Nameerah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

ISB 95

I {ʾs¹}d bgnmh mlk brkt

By {ʾs¹d} son of {ṣf} son of Bgnmh owner of Brkt

Apparatus Criticus:
ISB 95: reads 95 and 95.1 as one text I {ʾs¹d} bn ṣm(ʾ)n w ʾgnmh h- mlk brktn b- db and translates the narrative as "and the king raided two pools at DB"

Commentary:
The first seven letters have been hammered over and the 7th appears to be an enormous f. The text then runs at right angles to the beginning for the next four letters in which the two examples of b are at right angles to the direction of the text and upside-down in relation to each other. Both features are not uncommon. The text then turns again at right angles to run below the beginning. The bgnmh has not been found before but is of a form well-known in Safaitic in which a common name is placed between b and h to form a new name. The last two words of the text are clear on the photograph but difficult to interpret. Brkt is the name of a place of semi-permanent water, apparently in the area where the harrah meets the ḥamād to judge from the distribution of the texts which mention it, and could be modern Burqū (see Macdonald 1992: 27–30). It seems unlikely that someone would declare himself "king of Brkt" in a graffito like this and so we have suggested translating mlk as "owner", though in what sense he could claim to be the "owner" of a watering place is difficult to imagine. So this interpretation is proposed very tentatively.

By ‘mdn son of ‘s¹d son of Drs¹ and he spent the season of the later rains in the ḥrt [pasturing on] ḥfg

Apparatus Criticus:
ISB: ḏ’ ḥrt ḥfg "he spent the spring in the region of basalt rocks. And the camels' knees trembled (?)"
Beeston (review of ISB, JRAS 1970: 220): ḥfg is probably the name of the particular ḥarrah

Commentary:
[ḥfg occurs here and in WH 171 and KRS 1836. A member of the Ahl al-Jabal, who inhabit the ḥarrah of southern Syria and north-eastern Jordan, identified a plant of the ḥarrah shown him by Geraldine King as ḥafaḡ, Dr Sue Colledge later identified it from a photograph as D. Harra. D ḏ’ ḥrt ḥfg is presumably an elliptical expression meaning "he spent the season of the lesser rains in the ḥarrah [pasturing on] ḥfg"

By ḫmr son of Bnḡdw son of S‘f son of ḫnf

Apparatus Criticus:
JaS: ḥmlg for ḫmr and bḡdw for bnḡdw

Commentary:
The first name is written in square letters. The final letter of the first name clearly has hooks and must be a ḫ. Jamme reads the following bn as a g despite the fact that it is open to the left. There is no sign of the letter he reads as b before ḡdw. The ḫ is of the concentric circle form more common in Thamudic E than in Safaitic. The b of the penultimate bn is at 90° to the rest of the text. The final name is all but invisible on the photograph.

Commentary:
Most of the inscription is very heavily abraded. The end curves round to meet a short text running in the opposite direction which has been read as JaS 22.1. The form of the d two concentric circles in the last name of JaS 22 is similar to that in 22.1.

JaS: ḡhmns (or ḥmn or zhmn) for Ḥmn f s²ḥl f dyt “and he got hold of the ransom” for ḥḥl(f)dyt

**Commentary:**
The k of Ḥmn is not certain. The letters ḥl after Ḥmn suggest the beginning of an invocation. However the letters which follow on Jamme’s copy produce little sense and in the absence of a photograph it seems safer
to leave them uninterpreted. Jamme's reading of the ḫ as a s¹ is untenable.

**Apparatus Criticus:**
JaS 1: l qrn bn lmw [w wg]m l šhr-h w l b-h ḥfr "[and he has mourn]ed upon his kinsman and upon his father. he was a saddle maker.

**Commentary:**
The third letter looks more like a y than a q on the copy. The following two letters would then be the bn. It is just possible that the second name is a badly copied ḥfr though this can be no more than a suggestion. Ar. ṣ̌hr is not simply a "kinsman" as suggested by Jamme but the kin of one's wife or husband. Jamme's interpretation of the final word is unconvincing.

**Apparatus Criticus:**
JaS: ẓ nm for ẓ (&) m.

**Commentary:**
The fourth letter from the end has a very short vertical stroke and resembles a Thamudic E ẓ. The copy has a dot between the second ʿ and the m but the name read by JaS is unlikely. It is possible that the text continues after the break and the name should be read ẓn and the m taken as the first letter of the following word. It is perhaps most likely however that the dot is the copyist's error or extraneous to the reading of the text which is what has been suggested here.

Commentary:
It is most likely that JaS 35 and JaS 36 are one text. The n of (n)j has been turned 90° and is written slightly to one side of the line of the text. The copyist has given no indication as to whether the stone is broken after the j and so it is not possible to tell whether there are letters missing between it and the following l. The first t is rather large and the crossbar is not facing in the direction of the text. The k is a slightly unusual shape and the following n is larger than the other n’s of the text. JaS has restored h for w before the word ḫṭṭ. Whilst this produces a better attested formula there is no justification for doing so from the copy.

he has spent the spring [here] and gone over to ‘ḥw and to ṯšl’m”.

Commentary:
See JaS 43.1 for the reason this is read as a separate text. It seems likely that the copyist has left out letters at the beginning. JaS suggests that the inscriber drew the stroke of the d of ṯš and then noticed that he had forgotten to write a w and so inscribed it partly over the stroke. The second letter of ṭšwq has a kink and then a short line which runs into the crossbar of the q of the same word which is written below it. The w has been copied as a q.

Commentary:
The reading of the first name in JaS is speculative as only a short line and a line with a circle remains. The latter might be the remains of a y t or s. It is most likely that the third letter of the name after bn is an s². JaS reads the letters after the break from right to left but it seems more likely given the amount of space that they should be read from left to right as a continuation of the existing line. After the gap in the copy the fork of a letter remains above the break which might be the remains of an ‘ as read by JaS or a h or a ş. There is not enough of the letter after the w remaining to read an s¹ as in JaS.

Apparatus Criticus:
JaS: "By Qnʾs²ṭm son of Qnʾ was made chief".

Commentary:
The interpretation of the text is unclear as compound names of this type would be unusual. It is possible that bn has been left out between qn and s²ṭm and qn and ṣ¹wd.

Apparatus Criticus:
JaS: ḏḥs¹m for ----ḥs¹m; mgdt is translated as "happiness".

Commentary:
The first letter of the third name has a very unusual shape. There is a line drawn round the middle line of the text to separate it from the two outside ones.

-----ḡt son of ḫdʿt {and} {he longed} {for} ʾlt

**Apparatus Criticus:**
JaS: read as the continuation of JaS 71.3. See JaS 71.3.

**Commentary:**
JaS reads this and JaS 71.3 as one text. However the name s²tyḡt as read by JaS in 71.3 is difficult to explain and since the ḡ is written slightly above the y it seems more likely that the letters from the ḡ onwards are part of a separate text in which the preceding letters have not been drawn on the copy or a continuation of JaS 71.2 with letters missing from the copy. The s² is doubtful and it is possible that it should be read as a f as in JaS. The ʾ of the preposition ʾl has been written slightly above the q and the l has been left out altogether.

**Apparatus Criticus:**
JaS: l yqz w ḥtw bdḥ hh lh ḥf "By Yqz. And he was grieved at the appearance - O Lh - of Hff"

**Commentary:**
The text is written on the outside of the bottom of the same dish as JaS 82.1. It is difficult from the copy to be sure how the text reads or whether the letters belong to only one text. The copy of the letter after the first l is doubtful it is most unlikely to be a y as read by JaS but could be an incomplete ḫ. JaS continues reading the text after the z with the w near the break in the opposite direction to that in which they are read above and then reads the last group of letters from top to bottom in the copy regardless of the fact that the r h ḥ and f all face in the opposite direction. If the letters are all to be read as one text it is much more likely that the part of the text missing at the break curves round and continues with the f and following letters.

Apparatus Criticus:
JaS: read with JaS 101.1: lḥbyr bn bdm w ḍḥḥ f ds²r s¹lm.

Commentary:
See JaS 101.1. The position of the letters of this text suggest that it should be read separately. It is possible that the rock is broken before the y or the beginning is written on another face. The second letter of the second name might be an ' rather than a ḏ. The b of ḍḥḥ is written in the opposite direction to the rest of the text.

JaS 118.1

[----]rt bn h(r)m bn ml(k) bn gfft w----hf----

----rt son of {Hrm} son of {Mlk} son of Gfft w----hf----

Apparatus Criticus:
JaS reads JaS 118.1 and 118.2 as one text; [----]drt bn hrm bn mlk bn gfft w ḥlf f bny 'l qnnt w 'l rfz w 'l mṣrtl w 'l drm w 'l ḍm w 'l ġnm w ṭwš²kt; translated from w ḥlf as "And progeny. And he has built upon Qnnt and on Rfz and on Mṣrtl and on Drm and on ḍm and on ġnm and he mourned over Ws²kt.

Commentary:
The rock is broken after the first w and it seems likely there are some letters missing between it and the ḥ of ḥlf. The reading of f bny in JaS is very doubtful. The sign read as f is incised unlike the other letters on the rock which are chiselled and it is inscribed horizontally slightly above the line of the other letters. It is probably extraneous. There are then two hammer marks a chip and possibly a circle. Unfortunately the next part of the rock where JaS reads qnnt is covered by the scale in the photograph and cannot be checked. The remaining letters are smaller and it is most likely they are a separate text. See JaS 118.2.

Provenance:
Wād; Shāzi al-Qulayb, unspecified region, unspecified country.
JaS 118.2

--- (w) gm 'l- ws²kt w '{l-} m-}z-} w '{l-} m-} w '{l-} rm w '{d}m ---

--- (and) (he grieved) for Ws²kt and (for) M-}z-} (and) (for) M-} for (Wrm) and for '{dm} ---

**Apparatus Criticus:**
JaS: the text is read as the continuation of JaS 118.1 see under JaS 118.1.

**Commentary:**
JaS reads this with 118.1 but the difference in the size of the letters and the uncertainty of JaS’s reading of the letters after ḫlf in 118.1 makes it more likely that there are two separate texts. The above reading starts from the upper left hand part of the rock. The l ġ n and m as read by JaS are not visible in the slide but if the interpretation adopted here is correct then the beginning of the text would be covered by the abrasions. The last part of the text which is written on the same area of the rock is also illegible in the photograph. It is possible that the first letter of the fourth name is a circle with a dot but there seems to be a line a across the middle. The reading of the second letter of the fifth name is very uncertain. It might be a circle with a dot or simply a circle which would be read g.

By 'ns¹ son of ---w {son of} {s²nk’d}

**Apparatus Criticus:**
JaS: l ‘ns¹ bn ywbġ bn kd

**Commentary:**
The copy is extremely doubtful. The letter after the first bn might be a y but it has a curve which would be unusual. The letter read as ġ by JaS is lying on its side and is more likely to a n and the tail of a s¹ which have been joined together. The letter read as k is similarly to Thamudic ġ as it has a tail. The spine of the d curves backwards at the ends and the loop of the letter is not completely joined. Next to the text there is a copy of shapes which might be joined letters and it is possible that the strange shape of some of the letters in the text is because some of the letters are joined and the copyist did not recognise this.

Commentary:
There is quite a large gap between the second bn and the name 'ln'. The seventh letter from the end in the copy is a n and the fourth letter from the end is a f but it seems more likely that they are a mistake of the copyist. JaS: The text read here is read as the last part of Jas 162.1.

**Commentary:**
See JaS 162.1. It seems most likely that this should be read as a separate text although the initial l is between the n of the fourth b n and the b. The text reads down from the corner of JaS 162.1.

By ḫnn son of ʿkr son of Why of the lineage of {Hk}

Apparatus Criticus:
JaS: gkr for ʿkr; sk for (h)k.

Commentary:
The first letter of the second name is proportionately rather large for an ʿ. The first letter of the lineal name is an unusual shape. One of the lines of the fork is longer than the other and the line from the fork has a slight curve.

Provenance:

l ʿsʿd bn mṣḥḥ bn ḍḥjd w dtʿ sʿnt wsʿq š

By ʿsʿd son of mṣḥḥ son of ḍḥ and he spent the season of the later rains the year wsʿq š

Apparatus Criticus:
JaS: l ʿsʿd bn mṣḥḥ bn ḍḥj w dtʿ sʿnt wsʿq ḫy ʿs rdḥ w ldʿy; translation from w dtʿ “And he has spent the spring [here] the year he has gathered a small quantity of crushed datestones and ʿyl has rebelled”.

Commentary:
The letters ḫy read by JaS after wsʿq are written to the left of the sʿ of wsʿq and it is unlikely that they belong to this inscription unless several letters are missing from the copy see JaS 171.3. Similarly the letters ṭḥ w ldʿy read by JaS are inscribed at right angles to the w and q of wsʿq and are either a continuation of this text with several of the letters missing from the copy or the letters of part of another inscription see JaS171.4. The second š is written directly after wsʿq and the text is either unfinished or the copy is not complete.

By Ṣḥrn son of (s¹\{h\}) son of ḥgrn ---- w m\'yb and (he was filled with longing)

Apparatus Criticus:
JaS: s¹\{h\}y for s¹\{h\}; w s²tw b y\'mw "And he has spent the winter at Y\'mw". JMAA XIV p. 195: where JaS 175 is a misprint for JaS 175. Comments on the place name being written in larger letters than the rest of the text.

Commentary:
It is possible the second letter of the second name is a k. The last part is read in the opposite direction to that read by JaS which seems the most likely interpretation given the position of the letters. There is quite a large gap between the end of the third name and the w which suggests that some letters are missing from
the copy or that possibly w mʿyḥ w ts²w(q) belong to another text the beginning of which has not been
copied. The letters w mʿy are drawn in the copy with a double outline suggesting that they are inscribed in a
different technique to the other letters of the text.

**Commentary:**
The first name is written above the following bn and the beginning of the next name. There is then a gap in the copy followed by a letter which might be a g or a m. **Commentary:**
The stone is broken into two pieces. It is perhaps most likely that the second letter should be read as s² see the other examples of this form of the letter in this collection. The k in the second name after the second occurrence of wgm is a different shape to the other k in the text and is facing in the opposite direction to the rest of the letters. **Commentary:**
There is a misprint in JaS ‘ transliteration and in the translation. The w of gwm has been left out in the transliteration and the name whb has been given for wbb in the translation. The restorations made by JaS do not seem to be based on traces of letters on the rock and although they are possible they are not the only
alternatives. The second letter of the name ǧ{s²}m might be a f. The name llʿz as read by JaS is unlikely and there are three possible explanations. The two I's might be a bad copy of another letter as has been suggested here or the second I might be dittography of either the copyist or the author of the text.

Kawar 1

l s¹mm bn ṣʾtwʾ w bny h- nfsʿt

By S¹mm son of ṣʾtwʾ and he constructed the funerary monument

Commentary:
A Safaitic inscription in the collection of Widad Kawar. The second name is unattested but seems clear. It could possibly be ṣʾhwʾ (also unattested) but the second letter is much more a t than a h. This seems to be the first record of someone making a nfsʿt. All the other occurrences of the word are in the context I N h- nfsʿt.

Apparatus Criticus:
KhBG 24: l ṣḥy h- ṣwyn “ṣwyn = jamæʿatu s-šibāʾ”

Commentary:
The editor seems to be suggesting that ṣwyn should be translated from the Ar. ʃawān which can mean a group of beasts or birds of prey. It is more likely that it is a dual form of ʃwy a “cairn”.

By Wsʾn son of Mlkt

Commentary:
From the copy there appears to be an abrasion between the l and the k which might be where the author has hammered out a mistake. The name wsʾn is not in ḤIn and it is possible that wsʾʿ should be read as the letter read as the first n is a small dash on the copy. The letter after the b of bn is also a small dash and so it is not possible to be certain about this.

By *bngn¹l* ----

Apparatus Criticus:
KhBG 382: l gn¹l bn ----

Commentary:
The letters *bn* are written next to the initial *l* and the following *g* and it is rather uncertain where they belong. It is possible a compound name "bngn¹l" should be read or maybe this inscription should be read as the patronym written as an afterthought of s²ddt the author of KhBG 383. However as the editor points out that would not explain the apparent initial *l* before the *g*. It seems less likely that the *bn* should be read after the name gn¹l as in the edition. The copy seems to suggest the inscription continues.

*lbnı’mr hn’y h rdy*

By Bny’mr hn’y 0 Rdy

**Apparatus Criticus:**
KhBG 398: *lbnı’mr hn’y h rdy*

**Commentary:**
The *Bny’mr* has been found several times before. OCIANA does not alas have access to the late Fawwaz Khraysheh’s photographs of the KhBG inscriptions, but supposing that the facsimile is correct, there are several possible explanations for *hn’y*. It could be the author’s *nisbah* referring to an “l n’ or n’t. This does not seem particularly likely. It could be the something requested of Rdy, and the root H-N-ʾ would produce suitable subjects for such a prayer, “ease”, “plentiful giving”, etc. but the form with final -y is difficult to explain. A personal name *hn’y* is otherwise unknown and so it is unlikely that it is the author’s patronym with the *bn* omitted. We have therefore left it uninterpreted for the present.

Commentary:
On the published facsimile the second letter of gn(b) is shown as the same length as the nʾs in the text and is not only too short to be a l as read by the Ed. pr. but lacks their distinctive hook at one end. However on the photograph a hook can be seen at its lower extremity and it looks as though the letter extends across the ends of both lines 2 and 3. ʾdmt: cf Ar. udma ‘sociableness companionship friendship’ (Lane 36/a)

Commentary:
/Pace/ the ed. pr. the script style is the same throughout the text and none of it resembles Thamudic E except for the d sign which however is not uncommon in Safaitic especially in this name. The author has played with the letters of the text placing one within the other at almost every opportunity regardless of word division (e.g. ẓ mʿ zr f). The y of sʾly appears to be joined to the l. The last letter in the second line cannot be sʾ as in the ed. pr.) compare the sʾ of sʾlm but must be h. The first letter of sʾnyt must be sʾ rather than f cf. the f later in the same line.

By Grm son of Ṽt son of Ṽrm of the lineage of Ṽmr and he came to a place of permanent water while pasturing in the dry season

Apparatus Criticus:
KhNSJ: ʾ[y for r'y

Commentary:
As in KhNSJ 2 a number of letters have been placed within each other again regardless of word-division (e.g. bnl Ṽbn). However at the end of the inscription the author has applied the same technique to whole words. The first letter after the w is both a q and a š hence the circle is between the middle of the stem and its top and there is a short cross stroke the bottom of the shaft. Similarly the third letter after the w is both the final r Ṽyr and the initial r of r'y but is also the š of qṣ. Thus it has the short backward strokes of the š and the incurring hooks of the r.

**Apparatus Criticus:**
KhNSJ: 'mrt for 'bs²t

**Commentary:**
The letters of the first name are very uncertain on the published photograph though the ed. pr. says that they are dear on the stone despite enclosing them in [ ] in his reading. The tribal name is clearly 'bs²t not 'mrt. The letter(s) between rm and qz are illegible on the photograph. Ed. pr. has w on the facsimile but fin the reading. The next phrase is probably qz 'll (cf. SIAM 28) though it is difficult to explain {t}yt. Ed. pr. translates brḥ qṣ r l- bṣry as 'Caesar left Boṣra' which of course is impossible. Brḥ in Safaitic presumably had a wider sense than Arabic barḥa 'to go away from' (with a direct object) and may have been closer in sense to Hebrew bārāḥ 'to flee (with l- 'to') to hasten' (BDB 138a).

KhS connects the word ’dmt to Arabic ‘admā‘-, pl ‘adam "a type of gazelle characterized by a long neck and beautiful eyes". It is so far unattested in Safaitic, so it might be better to regard this as a defective spelling of the word dmyt "drawing," with the definite article’, especially since, according to the formula l- PN def- N, we would expect a definite article on ’dmt, **h- ‘dmt. image not available

Commentary:
KhS connects ʿd to the Arabic ʿwd "to return." He also suggests that it could be connected to ʿadā "to antagonize", referring to the herds in the drawing. The absence of the medial glide in Safaitic II-weak verbs
is attested but the glide of III-weak verbs is consistently preserved, making the latter explanation unlikely. The edition points out that the position of the sun in the drawing indicates that the hunt was carried out in early dawn. Image not available

*l ḥs²b bn ---- w bkr l gźr*

By Ḥs²b son of ---- and he woke early to slaughter [a camel]

**Apparatus Criticus:**
KhMNS: Translation of bkr l gźr "and he woke up early to hunt" (wa bakkara li-ṣayd).

**Commentary:**
Safaitic gźr can be connected with Arabic ǧazara, "he rose early to slaughter a camel" (see Lane 418b ǧazara la-hum "he slaughtered a camel for them" and 419a s.v. ḡazūr "a camel for slaughter" as in the expression raʿati l-ġazūru "The camel for slaughter pastured". The normal word for hunt in Safaitic is syd. [MCAM] If this interpretation is correct, then the inscription does not correspond to the hunting scene that accompanies it.

I ḍr bn msʿk bn hgr bn ʿlt w gry h- mhr f h lt rwḥ w h ḏs²r m ēwr h- sʿfr

By Ḍr son of Msʿk son of Hgr son of ʿlt and he made the colt gallop so O Lt [grant] relief from adversity and O ḏs²r [blind] whoever effaces this inscription

Apparatus Criticus:
KhMNS: Translation of ēwr h- mhr “he made the colt run” (ǧaʿala ʿl-muḥr yaǧrī)

Commentary:
Safaitic gry is taken as a Ġ-stem of the Arabic root ĠRY “to run”, that is, to cause to run, or, when referring to horses, “to make gallop” (the fastest gait of a horse). The drawing depicts the horseman galloping (the horse is in suspension with all four feet off the ground) in pursuit of an injured oryx attempting to escape, so the sense here fits nicely with the image. The final prayer of this inscription can be interpreted in two ways: (1) the author omitted the imperative ēwr, which is found in the commonly attested ʿwr m(n) ēwr, “blind whoever effaces”; (2) the m is a negative particle, comparable to the negative mā in Arabic. This would require us to interpret yʿwr as a passive injunctive followed by its subject h- sʿfr (i.e. “may the inscription not be scratched out”). Confirmation of the latter interpretation must await further discoveries. Image not available

Commentary:
The last letter of the second name appears to have a loop half-way down the stem making it look like a d. However the area of the stem next to the "loop" has been more heavily scored than the rest of the letter and it is possible that the original line was deflected at this point by an unevenness on the surface and that the author then emphasized the intended line of the letter by repeatedly scratching the surface but did not score over the mistake. A name ʿnʾd would be difficult to explain.

I Ṣnr bn ḥḍ mʿny(n)

By Ṣnr son of ḥḍ (the) Minaean [?]

Commentary:
There seem to be faint traces of what could be a n after the y of the last word and we have tentatively suggested that this could be the -n marking the determinate state in South Arabian. Thus mʿny would be a South Arabian nisba form (as in CIS IV 84/1 and GIED.I 26) equivalent to Safaitic h-mʿny "the Minaean". On
the other hand it should be emphasized that the final -n is by no means certain and that the names Nqr and ʿḥd are unknown in South Arabian. Moreover it is very unusual for an individual to identify himself simply as a "Minaean" though so far from home it would be understandable and one of the South Arabian examples (GIED.II 26) is from the eastern desert of Egypt (see also MNBS p. 106-108). See also Sima WZKM 88 1998 246. However if the apparent -n is not intentional the final word would be an undefined nisba. This would be extremely unusual in Safaitic and would presumably mean "a Mʿnite". In this case it is more likely that it would refer to a social group or place in Syria-Palestine or northern Arabia much closer to Khirbat al-Umbashi (for some possible sites see KMAD).

l ḥʾ l b n ṭ m b n ṭ m k w q s s sʾ nʾ t (ʾ)l- ṭ ṭ g l w sʾ l m w m g d

By Ḥʾ l b son of ṭ m son of ṭ m k and he tracked an enemy [on] foot and he was secure and attained glory

Commentary:
sʾ nʾ t is either an alternative to the collective sʾ nʾ (’enemies’) or a singular (’an enemy’). The letter which follows sʾ nʾ t looks at first sight like a ṭ, and it is difficult to make sense of w l- ṭ ṭ g l w in this context. However, the central line of the w does not seem to be complete and it is just possible that it is a ’.

\[ l zwlt bn m\{(g)\}\{(n)\}\{(y)\} \{(b)\}\{(n)\} s^2br bn s^r y \lll bn s^m \]

By Zwlt son of (Mġny) {son of} S^2br son of S^r y son of S^m

Commentary:
The shapes of some of the letters of the second and third names have been altered. The g has an additional curve on the curving part of the letter, both n’s in this part of the text have been turned into loops, the y has been made into an elongated figure of eight, the b’s of bn and s^2br have a double curve and the s^2 of s^2br has a line inscribed down one side of the zig-zag. It seems that the author wrote a s^1 after the name s^r y and then wrote bn s^m realizing that he had forgotten the bn.

By ‘hđ {son of} (N’mn) son of (Ḥṛtt) son of Gly son of Whb’l and he (found) the traces of Zwlt and so he grieved in pain

Commentary:
The b of the first bn has been altered with an additional curve giving it the appearance of a m the first n of the second name has been given an additional stroke giving it the shape of a small s^1 and the following ‘ has a line across the circle giving it the shape of a small w. The r of the name hṛtt has a line across the h. The author wrote three w’s after the the genealogy but corrected his mistake by crossing out the last one and continuing the inscription in a slightly different direction.

Commentary:
The inscription is very worn between the letters wgd and y w ghm. There are faint traces of an ‘r and w and it seems very likely that ⟨⟨⟩⟩⟨⟨⟩⟩⟨⟨⟩⟩{⟨⟨⟩⟩}⟨⟨⟩⟩ should be restored. After the last occurrence of the connective w the author appears to have left out an ‘.

There are scratches over most of the inscription. The first ḏ is slightly doubtful and the top of the following letter is covered by some hammering. Commentary:
There might be a/ before the s¹ but the photograph is not good enough to be certain or to know whether the inscription begins on another face of the rock. The first n is rather faint. The loop of the ḏ is slightly uncertain and the following n is rather more lightly scratched than the rest of the letters. It is possible the text should be read s¹ṣ'lv----b (w) r/y (d){n} ṭ{n}zt where what has been read above as a ḥ is read as a ḫ and what has been read as a g is an ‘ although it would be larger than the first ḥ in the text. The letter read as a ḏ might be a y if one of the apparent prongs is incidental but even so the line joining the loop would be rather doubtful. For the place name ṭ{n}zt see KRS 26.

Commentary:
It is possible the inscription starts on another face of the boulder which was not photographed. The crossbar of the letter read as w in the sixth name is doubtful and it is possible it should be read as a g. The author appears to have left out the m of S²ḥq[m] and the r of Dṣ²[r]. A divine name 'r has not been found before. If, like the previous two divine names, it is lacking one or more letters it is difficult to suggest what they might be. l bn bn 'nhl h- dmy w ḥrsp f ṣlm 'lh dmt rw<<>>h

By 'bn son of 'nhl the Dumaite and he was cold and hungry and so O ṣlm god of Dūmat ([grant] relief from adversity and uncertainty)

**Commentary:**
There is a m after the second w and the ḥ at the end is written to the side of the other letters. It seems likely that the m was a mistake and that the author finished the text in a different direction rather than crossing it out. There is no drawing with the inscription and it seems that h- dmy here represents the nisbah from Dūmat (Akkadian Adumatu, mediaeval Arabic and still today Dumat al-Jandal, al-Jawf) the oasis in north Arabia. This is the only Safaitic inscription known so far in which there is an invocation to the god ṣlm, who is here called 'the god of Dūmat', but who is better known from the mid-sixth century BC to at least the mid-first century AD as the chief god of Taymāʾ (see the dedication to ṣlm in Taymāʾ Aramaic dated to AD 56/57 in Macdonald in preparation). As yet, neither of the personal names has been found in the inscriptions in and around Taymāʾ or Al-Jawf. However, 'nhl (as opposed to 'nhl here) is found in a Hismaic text from Qārat al-Mazād, north of Sakākā (Al-Ḍuyayb 2003: no. 36).

l s¹krn bn qdy bn qdm w ẓl’ [[]] mty f ‘dm b- s²’hqm [[]]

By S¹krn son of Qdy son of Qdm and he was limping while on a hurried journey and so he made a compact with S²’hqm for his safety

Commentary:
The author has written a g after the word ẓl’ and then crossed it out. After the final m there is a circle shape with three lines across which might also be a mistake that the author has attempted to cross out or it might be a sign. The verb mty means ‘to travel swiftly, to hurry’ and is here the infinitive used adverbially. The expression ‘dm b- s²’hqm has not been found before and is perhaps to be related to the ‘af’al (IV) form of the Arabic √DMM which can mean ‘He made a compact with someone for his own safety’ (Lane 975c–976a).

l mn’t [n] mgd bn mr’ w [w]hd f h s²’hq[...]m s’lm w h s²’n’r s’lm l- d whd w br[ [...] ] ’hl - h m- hkrn

Commentary:
The n of the first bn is illegible. Part of the outer line of the second w is not visible on the photograph; the h of the second whd has been added later; it seems likely that the author wrote a q instead of a š in the word hrs and then attempted to emend the letter by inscribing over one line protruding from the circle and adding a prong to the other. Commentary:
One of the prongs of the second ’ is covered by an abrasion. The h before word s’lm is written slightly to the
Corpus of Safaitic inscriptions

side of the other letters. The letter that has been read as $d$ in the word $ybd$ has a diagonal line running from the base of the loop and it seems possible that a $h$ was written originally and then the letter was changed to $d$ by the addition of the loop. There is what might be a $s^2$ after the $y$ of $r'y$ but there are some lines over part of it suggesting it has been crossed out. The lower stroke of the penultimate letter ($'$) runs into a $h$ in KRS 38, but it can be seen to be a thinner line than those of the $h$. For $s^2'tt$ rather than the more usual $s^2'ty$ see Al-Jallad 2015: 122. For $'f$ and $ht$ see Al-Jallad 2015: 305 and 318, respectively.

\[ l\ 'mn bn gn'l bn hy bn \$bh bn hy bn [g]n'l bn whb w nyk s\$lm 'mt s\$lm \]

By 'mn son of Gn'l son of Hy son of \$bh son of Hy son of Gn'l] son of Whb and he had sex with S\$lm S\$lm's slave-girl

**Commentary:**
It seems likely that the author made a mistake at the beginning of the sixth name and inscribed a straight line with a prong on the end which he then rubbed over and another short line. He then changed them into a g by drawing a curve to attach the lines at the top and joining them with a straight line at the bottom. Presumably, the two occurrences of s\$lm refer to two different people either with the same name or with names from the same root. The end can be translated either as above or as "S\$lm had intercourse with S\$lm's slave girl".

l ḥ(r)rb bn qqm mm---- bn n’mn w nd-----bh

By ḥ(rb) son of Qqm mm---- son of N’mn and nd-----bh

Commentary:
It seems likely that the author made a number of mistakes although it is difficult to be certain. The third letter has a bar across one end of the curve giving it the appearance of a k. However, there is also a hook at the other end which one would not expect in the letter k. It is possible that the second q should be read d but the author has made no attempt to correct it. In the photograph, the letters following the third m are partly covered by another rock. It is possible, however, that there is a f and even less certainly a n and a y which would produce the name mfny. Before the last two letters the surface of the rock has been broken and the top of a g above this patch, but it is unknown if anything else has been lost. There is enough room between the n and the b at the end for another letter but nothing is visible on the photograph.

Commentary:
The first b and second n are faint. One fork of the fourth ' is rather uncertain and it is possible the letter should be read as a s. The following n is rather short. Part of the photograph is out of focus making the reading of the fourth y, the fourth w, and the third ' rather uncertain. For the interpretation see Al-Jallad 2015: 255, 307, 313, 318, 329

l (g)mq {b}n ʾḥs¹b w {b}k̄y ʾw

By (Gmq) {son of} ʾḥs¹b and {he wept} ʾw

Commentary:
The second letter might be a m. The bn and the patronym are not very clear on the photograph but it seems that the first b has a hook as does the b of the word b̄k̄y. The inscription appears to be unfinished probably because the rock is rough after the w although there is a horizontal line above the ʿ and w which might be an attempt at a continuation.

Commentary:
Part of the final letter of the second name is obscured by an Arabic text. The prayer might be interpreted either as rwh wqyt "the relief of protection" or it is possible that the author forgot to write a connective and intended rwh [w] wqyt "relief from adversity and [grant] protection". lʾnʾm bn mhlm bn hmsʾk bn wqr b(n) wqr

By ʾnʾm son of Mhlm son of Hmsʾk son of Wqr (son of) Wqr

Commentary:
It is difficult to know how to interpret the second occurrence of bn wqr. It is lightly scratched on the rock above the last two names of the text. The letter read as the n of bn is a longline. If it is the continuation of
the genealogy then it is strange the author did not write it after the first occurrence of \textit{wqr} where there is sufficient space. It is possible it was left out of the middle of the genealogy and should be inserted after \textit{mḥlm}.

By S¹ny son of ’ṣr {son of} {Grm’l}

Commentary:
The n of the second bn is a long line going through the end of the curve of the b and it seems most likely that the author’s hand slipped when incising the letter. The second ‘ is written on the edge of the rock and the next face was not photographed. However, traces of a / are just visible on the photograph.

By Q’sn son of Nẓr son of S¹ḥr and he found the inscription of {his} paternal uncle and {he was sad}

**Commentary:**
The author forgot one of the d’s of dd and wrote it slightly below the other letters. He also wrote an ‘ after the word dd and then changed the letter to a h. There are two equally possible restorations of the text at the end. The author has either omitted the n of ng’ as suggested above or he has left out a w intending to write w wḏg “and he was sorrowful”. There is a series of lines on another face of the rock.

Commentary:
The ʾ of the word ṣm is doubtful. It seems likely that the author wrote the ʾ after the ṭ of ṭṭr and then realising that he did not have enough room to complete the inscription continued above. However, the photograph is not good enough to be certain of this interpretation.

**Commentary:**
Only the curve of the second letter of the final word is visible but it is most likely that it is the remains of a \(k\) and the word \(bkrt\) should be read. If this is correct, the drawing is most unusual since there is a very widespread convention in Arabian rock art including that associated with the Safaitic inscriptions, of showing female camels with their tails curled up and male ones with their tails hanging down (as here). The inscription and drawing are surrounded by a cartouche and there are scratches over parts of the inscription.

Corpus of Safaitic Inscriptions

KRS 166

By Whblh (slave of) the 'I Grt and he pastured the sheep and so O Lt [grant] security and abundance and he grieved for his maternal uncle and for his foster child Zn'l and his wife's relation Hgg and his wife's relation S¹'d son of (Mlk)

Commentary:
This is an unusual inscription on several counts. Slaves traditionally "do not have" relatives, but this text is full of them. Possibly, Whblh belonged to another tribe in the area and had only recently been enslaved by the 'I Grt (probably a small social group, which is not otherwise known, since it is difficult to imagine how it would work if he had been a slave of a larger group). He is therefore missing his immediate and wider family, and this is the first time the term mrby "foster child" has occurred in Safaitic, while ḥtn "wife's relations" is known from only one other text (C 4988). The text is clearly and expertly carved but the form of the final letter is puzzling.

I  --- lm bn ḏkr bn d{ḥ} dl ḏḥ b(y) h f
By --- lm sn ḏkr sn of (Ḏḥdt) ḏḥ b(y) h f

Commentary:
There are some lines before the beginning of the inscription and the first letter of the first name has been damaged by hammering. In the third name, the interpretation of the letter after the ḏ is difficult. It is most likely that the author intended to write ḏḥdt and wrote a ḏ and then realising that he had left out a ḏ he added a fork to the letter to change it. He did not however rewrite the ḏ which then needed to be added. There is a ḏ a ḏ a long line with a loop which might be a ḏ and a possible ḏ after the third name which are difficult to explain.

*l rhdt* (b)---- *(b)(n) hys'r bn Ḥdḥt bn s'id br. *(ḥ)ṭṭ*

By Rhdt (son of) ---- (son of) Hys'r son of Ḥdḥt son of S'id is the (carving)

**Commentary:**
The text between the first and third names has been scratched over and is very faint. It seems likely that the second name should be restored as *brbr* as the name *rhdt bn brbr* occurs in KRS 199 and the genealogy *rhdt bn brbr Ḥyṣ'r bn Ḥdḥt bn s'id* occurs in KRS 189. The *ḥ* of *ḥṭṭ* is damaged by scratching. The drawing shows a horseman spearing what appears to be another equid, possibly an onager.

By Ġy'r son of S'b'l son of Ḥyṣn son of Ḥwf son of Jflt son of M son of S'd son of Bwk son of *ṛs* and he camped here and he buried the son of *Gdr*.

**Commentary:**
The text is surrounded by a cartouche. The author omitted the *f* of the fifth name and squeezed it in above. The *n* of *bn gdr* was also originally omitted by the author and then added to the right of the *b*. The third letter from the end is slightly damaged and it is possible it should be read as a *w*. However the line in the circle is shallower than the other lines of the text and is probably an incidental hammer mark.

By ḫr bn ʾbrqн is the young female camel and he camped here [among] spring herbage and may he who is arrogant be thrown of the grave

Commentary:
The text is surrounded by a cartouche. The last part is presumably a curse in which the author has omitted the deity’s name. He has written ṭy twice. The author seems to have carved a r before the l near the neck of the camel. ṭy is probably to be interpreted from Arabic ʿatā “he behaved proudly”.

This [the writing] is for (Wṣn) who (returned to a place of permanent water) during the rising of Gemini the year Wgm died of extreme old age

Commentary:
There do not appear to be any letters before the first t which is written below the horse’s head. It is possible that the text is a continuation of KRS 210 but it would be unusual as the end of that text is at the bottom of the rock and these letters are at the top end. The second s is doubtful as the prong seems more lightly scratched and might not belong. It is possible the letter should be read as a y. The second l is more lightly scratched than the other letters of the text. Interpretation AA. For the translation of b- rʾy gml as “during the heliacal rising of Gemini” see Al-Jallad forthcoming. A similar phrase is found in SIJ 827: w syr m- mdbr b- rʾy gml. The interpretation of hrbt is based on Arabic hariba, a dialectal form of harima, “to become extremely aged” (Lane 2889 b-c), something unusual enough in the desert to be suitable for dating.

By S²mt son of Ḥy and so O ‘lt [grant] security to ddy

Commentary:
The reading of y at the end is clear although it is difficult to explain. It is possible that it is a dual form “two paternal uncles” although one would expect the enditic pronoun -ḥ “his”. The two possible interpretations would seem to be either that ddy is a previously unknown personal name, or that the author has changed to the first person and it means “my paternal uncle”.

The second letter is rather ineptly inscribed and the fork is not clear. Despite the presence of a drawing of a camel the final word is clearly not *bkrt* but *s’knt*, which would mean "a [single] dwelling". The implication is something permanent rather than a tent (*bt*). The word recurs in WGGR 1 (see Al-Jallad 2015: 341). KRS 274

\( l\) \textit{whb}(') \( h\) - \textit{bqr}\n
By \{\textit{Whb}'\} is [the drawing of] the oryx

Commentary:
The drawing, which shows a number of oryx, suggests that \textit{bqr} here is a collective. \textit{Bqr} is one of the words used for "oryx" in Safaitic (as in Arabic \textit{baqar waḥd}), the other is \textit{dṣy}. \textit{Bqr} is, of course, also used for "cattle".

Commentary:
It is possible that the name 'bd' should be read after s¹lm and [bn] 'bd' [bn] 's¹m' should be restored. On the other hand, the sequence 'bd 's¹m' could mean "servant of the lineage group of 's¹m'". It is unlikely that the author was a slave since he gives his father's name, whereas slaves give the name of their masters (see under fty).

Commentary:
Part of the rock has flaked away after the first t and only parts of the letters are visible. It seems most likely that a y should be restored and the word fty read and then it is possible that ḫl should be restored followed by a d. The loop of the second d is very faint. KRS 323
l hʾṣd bn ṭd h- ǧ(h)l
For Ḥʾṣd son of ṭd is the {scratching post}

Commentary:
The penultimate letter is rather carelessly inscribed. We have interpreted ḡḍl from Arabic ḡḍl “a post, or piece of wood, that is set up in in the place where camels lie down, at their watering place, for the mangy camels to rub themselves against it.” (see Lane 397a). Alternatively it could be related to Arabic ḡḍl “happy”. In earlier editions of this database there was a cross-reference to hʾṣd bn ṭdkḥg in KRS 594. However, this is the same inscription and has been removed.

Iššlm bn ʾbyn h·ḥbb h rdy ǧnmt

By ššlm son of ʾbyn the Ḥbbite O Rdy [grant] booty

Apparatus Criticus:
MNH p. 345 n. 269: on the occurrence of Ḥbb with rdy, where KRS 1804 should be corrected to KRS 371..

Commentary:
d·ʾlḥbb occurs in WH 1607.

KRS 372

Commentary:
The inscription has been scratched over. The author appears to have left out bn between all the names in his genealogy. The letter after the first d is rather long and it is possible that it should be read as a l. The name ššwdl has been found in WH 3851, and ššwdl in JS 5.

By ġyrʾ son of S¹d son of ġyrʾ and he found the writing of Zkr and so O Lt [grant] security to the descendant of Zkr

Commentary:
There is an extra l at the beginning of the text at a slightly different angle to the rest of the text presumably the author decided to carve the inscription in a different direction to that in which he had originally started. In the light of KRS 379, it seems likely that the author here is using the word bn to mean “descendent” rather than “son”.

l ((w))((l))r b(n) (n)---(l)s¹ bn ((l))m((r))((l)) bn ((h))((r))---

By {Wʿr} son of {N}---s¹ son of ḫmr son of ḫr---

Commentary:
A cross has been scratched over the w and a line across the ʿ; the n of the first bn has been joined by two lines to the following letter which is probably also a n; the next letter is partly covered by hammering and only a short line is visible; there are some miscellaneous lines after the next bn and there is a line through the ‘ in the following name; the arms of the next two r’s have been joined to the back of the letter by diagonal lines and the arms of the next two t’s are joined together. There is hammering after the final r and no more letters are legible. The names nks¹ bn ‘mr bn ḫrg occur in KRS 1829 and 1830 and it is possible that nks¹ and ḫrg should be restored here for the second and fourth names respectively.

--- bn ḫl((m)) w ṭmr h·s¹fr

--- son of ḫlm and he scratched out the writing

Commentary:
What comes before bn ḫl(m) is difficult to make out on the photograph. The m of ḫlm has been altered by the edition of an extra lin to make it look like a w. This is an usual text as the author seems to be claiming that he “scratched out the inscription”. Both KRS 391 and 392 are to some extent damaged by hammering.
However, the fact that some letters of KRS 392 seem to be written over some letters of the present text suggests that KRS 392 was written later and that the author is not referring to this particular damage. It seems more likely that he is referring to the changes made to the letters of KRS 391.

*l `b bn s¹dy h- dr w qtl hgm*l

`b son of S¹dy was here and he fought with Hgml

Commentary:
There are some scratches covering the inscription. The text has been translated from Form III of the root qtl qātala "he fought" but there is not enough context to be certain of the translation. It is possible that the verb should be translated on the basis of Arabic Form I qatala "he killed" and that the phrase should be translated as "he killed the camel" or "he killed Hgml". However, the former translation begs the question "which camel" (one might expect rather w qtl gml ("and he killed a camel", for food or sacrifice), while the latter would be a dangerous announcement to make.

l mt----(n) bn *(m)t w ts²wq *l-- w *l- qymt [w] *(q)-(khl [w] *(q)-w*j wbn [w] *(q)- wrb w *(q)-hbn w *(q)-h(n)[n]

By Mt----(n) son of *(mt) and he longed for ---- and for Qymt and *(for) Khl *(and) for Wl and for Whbn *(and) for *(qrb and for *(Shbn) and for *(Hnn)

Commentary:
The inscription is badly damaged by abrasions and hammering. The first n is rather short and the second m is damaged. After the first occurrence of *l there are two lines with prongs which are partially covered by an abrasion and which might be *(s, s's, or h's. There is sufficient space in between them for another letter. No w is visible after the name qymt and the following *(l*s is damaged as is the w after the khl. The w after *whbn is covered by an abrasion. The s is an unusual shape consisting of a small circle with two lines attached, and the last two letters are damaged by hammering.

{lI} ms²k bn gzl{{l} bn s²rk bn g{(y)}r{r} bn ms²r w *r'y h. hhr f h It s²lm w *wr d y'[w]r

{By} Ms²k son of *(gzt) son of S²rk son of *(gyr!'l) son of Ms²r and he pastured the hhr and so O L[t] grant] security and blind whoever *(scratches out) [the inscription]

Commentary:
A prong has been added to the initial l. The s², k, and b of the first name and the following bn have been inscribed so that the letters are touching each other; lines and scratches have been added to the t of gzt; the y of gyr!'l has been changed to a s and the *(l has been joined to the l by the addition of a third line to the prong. The w of the last word has been obscured by a chip. The last part of the inscription is written on an adjacent face. The word h. hhr is difficult to interpret. All the letters are clear, but it is difficult to find any parallels to such a word. The context requires it to represent a type of animal, a topographical feature, or a type of pasture.

l w(g)r bn ----

By {Wgr} son of

Commentary:
The text is written vertically behind and below the smaller camel and is difficult to interpret as it has been tampered with by the addition of lines and infilling. The w has been joined to the initial l by a line. The third letter might be a g but the variation in technique of some of the hammering suggests that it might have been a b and then the arms were enclosed by a line. The r has been joined to the following b by a line. The n is joined to the following letter which is an infilled circle. It is small enough to be an ‘ or it might be a g or w. The next letter is a line with a slight protusion in the middle. It might be a q with the loop filled in or a t or the protusion might be part of a line joining the letter to the preceding one in which case it should be read as a l. The last letter is a line with infilled loops at either end. It might be a ū or a ʕ.

[l] ʾṣḥb bn ʾḥrt bn ḍbʾ bn ʾḥb bn {r}ʾ

(By) ’ṣḥb son of Ṭḥrt son of ḏbʾ son of Ṣḥb son of {Rʾ}

Commentary:
The initial l is covered by abrasions. The penultimate letter might be a ṛ although one arm is at a strange angle and the other is not quite attached to the line. The second ʾ is on the edge of the rock and it is unclear whether or not the inscription continues on another face. If it does not and the reading of ṛ is correct, it is possible that the letters are a metathesis of the name ṛ. The sequence of names ʾḥrt bn ḍbʾ bn ʾḥb bn {Rʾ} occurs in KRS 734. There are some lines going through the inscription.

By (ṣdm) (son of) Wty (son of) F----{h} and (he grieved) {for} W----

**Commentary:**
Most of the inscription is covered by KRS 696 and some of the letters seem to have been altered and so the reading is very uncertain. The second letter could be a ṣ and the third letter might be a q. The n's in both the occurrences of bn appear to have been extended to enclose the arms of the b's. All that is visible of the second letter of the third name is a line. The third letter of the name might be an ḥ or a h. The central part of the third w and g are covered by parts of the letters of KRS 696 and the ʿ is a rather large circle. After the fourth w there are lightly scratched lines and it is difficult to know what should be read.

By Mr’son of S’s d and he pastured and he sought for pasture on stony tracts [or: he grieved in pain for Hr]

Commentary:
The second \( n \) is a rather rough line. The author appears to have left out the second \( l \) and written it to the side of the ‘and \( h \).

Provenance:
Unspecified site, Al-Mafraq, Jordan

By S’s d son of Mr’ and he found the writing of his maternal uncle and so he was sick [with grief]

Commentary:
The author has used \( f \) as the conjunction implying that the finding of his maternal uncle’s writing has made the author sick. The sickness implied therefore is presumably an emotional one rather than some physical ailment.

Commentary:

By Ḫmr son of Ḥrb son of Grf son of ṣʾwr is [the drawing of] the camel and the animals

**Commentary:**
The inscription begins in faint letters just behind the camel's hump and ends just above the beginning where it runs onto an adjacent face. There do not appear to be any other animals on the stone so one might question the traditional interpretation of ḫyt as "animals" here.

$l ---- bn bs'l $h'glm----$

By --- (son of) Bs'l (h- glm)----

Commentary:
The inscription is written in between KRS 788 and the thighs of the woman in the drawing. It is badly damaged and after the initial l there is room for several names. One line of the letter read as s is damaged. It is unclear whether the text continues after the m or whether there are any letters at the end of KRS 790. It is quite likely that the end should be read h-glmt "the slave-girl" referring to the drawing.

----d b(n) (f)lh bn f wI(y)

----db(n)(f)hbnmwI(y)

**Commentary:**
The text is written along the edge of the rock to the right of the end of KRS 789. It is possible it should be read as a continuation of KRS 788 and that some letters have been obscured by abrasions before the d read here and what has been read as the end of KRS 788. The d is carved between the h and g of KRS 789. There then appears to be a b and possibly a n and a f or possibly a s². The loop of the y at the end is doubtful.

By (Grs²) son of Dhy h- ml'

**Commentary:**
The text is written down the right hand side of the rock and the reading is very uncertain. It seems likely that the first name might have been written over other letters. The r is doubtful as the arms of the letter are not very distinctive. The 'at the end is finely scratched.

**Commentary:**
The sml often occurs in connection with ḍbh "sacrifice" and since in Arabic al-ṣamad can signify al-naṣab "the setting up or erecting a thing" (Lane 1726c) and ṣamad means "elevated ground", it seems possible that in Safaitic it may have meant a place where sacrifices were made.

l ṭnt b(n) {y}mlk bn ṭm w wgd ṭr ----
By ṭnt {son of} {Ymlk} son of ṭm and he found [the] traces ----

Commentary:
There does not appear to be a n after the first b unless it is a short line attached to the curve of the b. There is a line across the line of the y which gives the letter the appearance of a s. It is unclear whether it was intentional or not. Only a damaged line and part of a curve is visible after the r and the inscription might continue under some hammering or on another face of the rock.

**Commentary:**
The letters mgm are written on the edge of the rock and it is unclear from the photograph whether there are further letters on another face or whether the t is the next letter of the text. After ṣng the text is written on another face and is extremely faint.

---(y)w Ṣḥq (d) ʿwr wr(h) dl---- and he watered at (al-Namārah)

**Commentary:**
The text is written on three faces. The first was not photographed and, from what is visible of it, it appears to be covered in lichen. The first legible letter might be a y, ṣ, or t as only a line and a loop can be read. The letter read as d is doubtful as the lines of the prong are short and indistinctly inscribed. The fork of the first h is rather doubtful. After the l and before the fourth w there is a rather large curve shape and it is difficult to know what was intended. The photograph is not good enough to be sure that the letter at the end is a t.

Commentary:
The author seems to have written 'l twice before šhr. The ' has been lightly scratched over but the l has been left untouched. It is possible that the text continues after the t and so the interpretation is doubtful. Note dkr where one expect ḏkr, a possible Aramaism?

ʾyrʾl bn {{l}} ᵗʾr b----rr bn {{l}}}ʾḥ

By ʾyrʾl son of ᵗʾr b----rr bn {{l}}}ʾḥ

Commentary:
There is some scratching after the first ᵗ which suggests the author made a mistake and then crossed it out. It is difficult to interpret the rest of the inscription as it seems that some letters have been changed and other letters have been written over them. The letters ḏgm have been written over the patronym. After the second ᵗ the photograph is not very good and no letters are visible until the two r’s. The letter after the second ᵗ might be an ṭ but it seems possible that it was originally a l and then a curved line was added to one side, either to change it into an ṭ or to superimpose a r. The following letters are quite clear although their meaning is obscure. There is a ṭ written across the fourth ᵗ and the ʾḥ, possibly because someone else was trying to turn the original name into his own name. There is a possible ṭ above the inscription and perhaps lines of other letters as well.

By mlk son of ʾbd son of sōr son of ġlmtn son of s²r(b)

**Commentary:**
The first letter of the second name looks more like a w than a ʿ, but the sequence of names in other inscriptions on this rock suggest that ʿbd was intended. It is possible that the author left out the name ʿd after ʿbd as the sequence mlk bn ʿbd bn ʿd occurs in KRS 979 and 981, and mlk bn ʿbd bn ʿd bn sōr in KRS 982 on this rock. The last letter of the text is slightly damaged and the photograph is not very clear. It is possible that it should be read as a r.

l mrs' bn ū bn mr[f] w h - <ṛ>ṭṭ

By Mṛṣ' son of U son of {Mṛṣ'} and [by him] is the carving

Commentary:
There is part of a zig-zag line between the ṛ and {f} which might be belong to the drawing or to the inscription although it is difficult to see where it belongs in either. The fork of the second s is very faint. After the names, the inscription is written on another face of the rock near the top of the drawing. There are four straight lines before the first ṭ which are presumably a mistake for ḫ.

By Whblh son of ġyr' l son of 'bdh'ktb son of ġyr' l son of Rwḥ son of ḫnn' l son of 'dy and the dearth was widespread and so O Lt and O Gddf and O B's¹mn and --- 'lh let there be abundance and he travelled to the inner desert the year Mty was appointed commander and so O ʿSr may he be secure and may whoever spoils the (carving) be thrown out of the grave by his loved one

Commentary:
There are three lines before the deity's name 'lh which seem to be quite clear although there are some extraneous lines across them but it is difficult to know how to explain them. It is possible the author started to write the name 'lh and then abandoned the first attempt and wrote the name again. There is also a line curving round some of the letters in the middle of the inscription. At the end it looks as though the author has written a b, h, and ḫ and then put a line across the two vertical lines to form a ẓ. There is then a l and h and it seems most likely that they were a mistake and a vertical line has been added to the h to form a partial ẓ with the line of the prong of the h forming a crossbar. Contra Al-Jallad 2015: 258, the divine name read hear as ʿsr is clear and it is not possible to read it as ʿẓ.

Commentary:
The drawing shows a Bactrian camel and the fact that it is called h-gml in the inscription suggests that there was no special name in Safaitic for animals of this breed. For the interpretation of ḥḍʾ cf Arabic ḥuddaʾa-hu "it (poverty) lowered, humbled or abased him" (Lane 758a).

Commentary:
The lines of the second ' are slightly doubtful and the fourth d is doubtful as there is an extra line which gives the letter the appearance of a q. The author seems to have made a mistake after the deity's name s\text{z}'hm and then attempted to cross it out. (By) S¹-- son of S¹Ny son of Mḥnn and he grieved for Ṿs¹ḥr

Commentary:
The first name and following bn are partly covered by hammering. It is possible that s¹Ny should be restored on the basis of s¹Ny bn s¹Ny bn mḥnn occurring in KRS 984 from the same site. There are some letters directly after the name mḥnn which have been scratched over. They appear to read Ṽw Ṽg---mḥ. The g is written to the side of the other letters and the hammering completely obscures the next letter before the m. It seems likely that the author was going to continue the inscription in this direction and then changed his mind and wrote the second part of the text curving up the rock instead.

Commentary:  
The author wrote a ḥ at the beginning of the third name presumably because he forgot he had already written the name ṭlr. He then scratched out half of the letter leaving a V shape with a vertical stance which he appears to have used as a sʾ at the beginning of the name. The m of sʾḥqm has been decorated with lines. The two letters after the second w are partially covered by lichen. The first might be a sʾ, ʾg, or w and the second might be a t, ʾṣ, or ʾy. The loop of the second d is damaged and rather doubtful. **Apparatus Criticus:**

Macdonald 1995: 286: sʾnt qttl Ḫrds "the year Herod died mad"; probably referring to Herod the Great

Al-Jallad 2015: 131: sʾnt qttl Ḫrds - the year Herod waged war

**Commentary:**

The ʾs and tʾs have "square" forms. After the w following the name msʾl k the text continues in two directions one of which has been abandoned. The author wrote wgmʾ lʾm and then presumably decided that if he continued in this direction there would not be enough room to complete what he wanted to say and so continued to the right instead. There is scratching over the ninth l and the fourth letter from the end is a loop which might be a g or a m similar in form to the m of the word sʾlm. On the interpretation of sʾrt as "he served [in an army unit]", see Macdonald 2014: 159–160. We have interpreted sʾrt [ft]- Ḫ ṭdʾw as "he served [under] Ḫr the commander", literally "he served, Ḫr being commander", compare Arabic ʿalay-hi amrnun "commander lies upon him, he is in command", (Lane 2145a, and see Macdonald 2014:160, n. 78). See also RQA 10 w []]sʾrt l- mlk h- sʾltn "and he served [in an army unit] under the possessor of authority". We have

Commentary:
The line of one prong of the ' is rather faint. By Dʿyt son of ʾsʿlm and he pastured on account of {Suhayl}

Commentary:
There is a slight gap between the second m and the following letter but there does not appear to be anything written there. The letter read as the second sʿ is a different shape from the first one and is written the other way up. There is a further straight line after the third l which might be a another letter or intended to be part of a cartouche which was never completed around the inscription. The word *m- sʿhl* probably means "on account of Suhayl" (Canpous), the star whose rising introduces the first winter rains in October. See Musil 1928: 7-8. See also Macdonald 1992: 2.

By \( \{\prime\}\, bgr \)

**Commentary:**
The \( \prime \) has a loop in the middle of the vertical stroke and it is possible that someone has tried to alter the letter probably to a \( d \). After the \( b \), there are two zig-zag lines inscribed in parallel which are possibly the hind legs of an unfinished drawing of an animal, similar in style to the legs of the completed animal next to them. The line below the animal and after the \( g \) above it are more lightly inscribed than the letters and are extraneous to the inscription.

By Q---- {son of} ʾdm and 0 Lt and {S²hqm} [grant] abundance and w---- nʾm and so he grieved in pain

Commentary:
The letters after the first q and the fourth w are covered by abrasions. It is quite likely that w/[g][d] [s²][ʃ][ʃ][r] nʾm "he found the inscription of Nʾm" should be restored in the latter case. for bgr and he kept watch for the enemy and so O {Lt} may he be secure and blind whoever scratches out [the inscription]

**Commentary:**
There is a hammer mark after the fourth bn and it seems likely that the author made a mistake and then crossed out what he had written. The sequence ʾṣd bn ʾlyn bn mrwn recurs in KRS 1567 and ʾṣd bn ʾlyn bn ---- wn in KRS 1233. The author has omitted the l of ʾbgr before the name qdm and there is an abrasion after the l of the deity’s name. From the shape of the damage it is most likely that the damaged letter was a t. By Mġt son of Gnʾl and he came to a watering-place f ny tl ḥms š m- nmrt and so O Bʿlsʾmn [grant] relief from adversity and uncertainty

Commentary:
The passage between wrd and the prayer is difficult to interpret. It seems unlikely that nmrt here refers to al-Namārah since this always appears as h-nmrt in Safaitic. The author wrote mrwḥ after the deity’s name and then crossed the letters out and wrote the word rwh next to them.

By Bnt son of Zʾn son of ḫtsʾt son of Wsʾm is [the drawing of] the horse and O Lt may whoever {scratches out} [the drawing of] the horse be thrown out of the grave

Commentary:
The inscription is partly covered by later hammering over the drawing. There is a w carved slightly below the inscription between the w preceding the deity’s name and the q of nqʾt. It is inscribed in a different technique from the rest of the letters in the inscription. There is a letter that has been crossed out by being filled in after the y of ywr. The w and r of ywr are covered by the later hammering. The r and sʾ of the second frsʾ are carved on another face of the rock and cross the last three letters of KRS 1167.

By Wd son of Š²’m son of Mṭr son of ‘ws¹ and he returned to a watering place hungry and cold and so O Lt and Ds²r may he be secure

Commentary:
The word ḥṛṣ can mean "he was on the look-out" or "he was hungry and cold". Since there is no w between syr and ḥṛṣ, ḥṛṣ describes the circumstances in which "he returned to a watering place", in which case "he was hungry and cold" would seem to be a more appropriate translation, though "keeping watch" is not impossible.

Corpus of Safaitic inscriptions

<<<<< {l} Rs²ḥ bn Qdy w r'y bg ---- h ----(n)tt ---- r

{By} Rs²ḥ son of Qdy and {he pastured} ----

Commentary:
There are two lines and traces of a small curve at the beginning of the text. There is a horizontal line at the top of the lam auctoris which, however, is different from the other lines in the inscription. Commentary:
The second letter is faint and there is some lichen over the next letter or letters which makes it difficult to know how it should be read. It seems likely that the author wrote a r after the second g and then realising that there was not enough room to continue the inscription down towards KRS 1213 wrote another smaller r and then, without crossing out the first r, continued above KRS 1213.

By ḫlyn son of Rgl son of ḥd son of ḫlyn son of Mrwn and he came to a watering-place and so O {Bʿlsʿmn} [grant] relief from adversity and uncertainty with {rain}

Commentary:
The second letter is considerably larger than the other ṣ's in the text, but ḫlyn seems a more likely reading than glym. The sequence rgl bn ḥd bn ḫlyn bn [[[]]) mrwn occurs in KRS 1124. The author appears to have made a mistake before the fifth name and then crossed out a letter which also seems to be the case in KRS 1124. The sequence ḥd bn ḫlyn bn mrwn occurs in KRS 1567. The last letter of the deity's name is covered by the scratches over the inscription and the m of the last word is damaged by a chip in the rock.

l ḥḏr bn dr{{ʾ}}l w ṣgm ‘l- š’d
By Ḥḏr son of Drʾl and he grieved for Š’d

Commentary:
There is a short line after the ḥ but it is lighter and inscribed with a thinner point than the rest of the text and is probably extraneous. The n of the following bn is a long line attached to the arm of the b, see the second bn in KRS 1278 which is inscribed in a similar way. There is a line across one fork of the ‘giving it the form of a š.

By Sʾd son of Hy son of Ṣḥb son of Hy son of Gnʾl son of Whb son of Sʾb and he found the writing of ‘sʾlm ṣḥb and so he grieved for his companions and so O Lt may he be secure ----

Commentary:
There is a step in the rock between ‘sʾlm and ṣḥb and it is possible that a ṭ was inscribed very lightly because of the awkwardness of the surface or simply left out. The letter after the ḥ is more like a r. There are
some further letters on another face of the rock which it is not possible to read with certainty from the photograph. They might be a continuation of this text and might read ḥlʾ or possibly ẓlʾ.

ll bh(I) bn ngr bn wʿl bn sʔzht

By {Bḥlh} son of Ngr son of Wʿl son of Sʔzht

Commentary:
The second l is a rather short line. The sequence wgm bn ʿsˤl bn ngr bn wʿl bn fḥzt recurs in KRS 1569 and it seems likely that the fourth names in these texts should be read as the same although the readings in both cases are clear and it would assume a metathesis of the middle letters in one of the texts. None of the roots from the possible combinations are attested although ᵃʔhzn is attested as a man’s name in Qatabanian (see DASI).

Commentary:
The beginning of the first name is faint. The third letter of the third name has the appearance of an ‘ with a thin line forming the upper fork. However, it seems most likely that this is a d in which the third prong has been rubbed away as has the lower part of the following b. l m\l ila bn h\l (r)m h\l b\l (k)\l rt

By (M\l ila) son of (H\l rm) is "the drawing of" the (young she-camel)

Commentary:
In KRS 1300, which is below the left camel on the same stone, we find what may well be the same sequence, \m\l ila bn h\l rm. In both cases the l\l s in the first name have short horizontal lines at their tops, even though the lam auctoris does not. In each case too, the l\l has a medial stroke making it appear like a w. The second and third letters of the second name are partly obscured by the drawing. It is possible the third letter is a r, although only part of it is showing. A line has been added across the fork of the first h possibly in an attempt to change it to a y. There is a lightly scratched line turning the k into the shape of a m.

By ʾl son of {ṣ¹}m is [the drawing of] the male camel

Commentary:
The reading of the names is doubtful as the author of KRS 1318 has written over parts of all the letters of the name after the third one. He has probably also hammered round the originally scratched outline of the camel and the g and m of gml. The letter read as b has a rather shallow curve and what looks like a fork at one end, though this is probably a mistake. The tail of the s¹ is rather long. There might be another letter after the first m covered by hammering although there is not much room.

Commentary:
Curves have been added to the forks of the ṭ to form a ṭ. The n after the l in the firm name looks deliberate, even though this produces a strange name. The ḥ is doubtful as the middle line does not protrude from the centre. No further traces of letters are visible after the ḥ and it is possible the inscription is unfinished.

By Ṣ³b’ son of Ghfl son of Lb’t and he found the writing of (Km)

**Commentary:**
There is a circle which has been hammered over before the first letter of the third name. It seems possible that the author began writing w wgd and then decided to include the third name and so crossed out the w. The final letter is doubtful. It has a tail and it is possible it is a y. If the tail is a slip in inscribing the letter
might be a g or m.

By Bny son of Zn¹l son of Tm and he grieved for his father and for his companions and so he was distraught for ever and O S²qm [grant] relief from adversity and uncertainty to {him who} s¹ln hll {k)

Commentary:
The eighth letter has three prongs with a line going across the top. It might be a y but the enclosing line is shallower than other lines of the letter and it seems more likely that the letter is a d and that the line was added later. The line of the k at the end does not continue beyond the curve of the letter probably because it is written on the very edge of the rock. It is possible that the text continues on another face of the rock which was not photographed.

l wd mʾ(l)ʾlnqt(ʾ)l
By Wd mʾ(l)ʾlnqt(ʾ)l

Commentary:
The text begins immediately after KRS 1367. The reading of the letters is more or less certain except for the second d which is rather carelessly done and the fork of the second ʾ which is faint. There is a further line next to the q and t but it is difficult to know where it fits in. The name is written in KRS 1367 and it is possible the author was just practising.

Commentary:
The first and second letters of the second name and the m of sʾmy have been damaged by hammering. The sʾs have tails and have been rotated 90º. For ʾlmn as the planet Mars see Al-Jallad 2014: 225–226; 2015: 260, 299; but see also Al-Jallad 2016: 87, 102.

The crossbar of the q is written over one side of the circle and it is possible that the line is extraneous and the letter should be read as g. It is likely that the author has left out a m after rwb. Parts of the text are written across the cartouche surrounding KRS 1376.

The ends of the line of the first \(f\) have been joined with a curve which gives the letter the appearance of a \(m\). The name \(s^qr\) was presumably left out originally and was then inscribed in between the lines of the first names and final names of the text. No \(bn\) was added before it. The \(yt\) is much larger than that of \(w\)r, and
does not seem to be a complete circle. But is difficult to see what else can have been intended to be.

\textbf{Commentary:}
Several of the letters in the text have been tampered with. The second letter is a large oval with a line across it. It seems likely, given that the w's of the text are smaller, that the letter should be emended to a \textit{g}. The r's of the first name and the deity's name have been changed to m's. The n of bn has been altered to a h, the first n of the second name has been changed to s, and the second has been changed to a t. The k of gkr and the b of ḥbb have been altered to h's. Commentary:
The author wrote a w after the first h and then scored over it realising that he had made a mistake. Commentary:
The last letter of the fifth name and the two following letters are damaged by a chip. It seems likely that g should be restored at the end of the fifth name given the curve that remains of the letter and the occurrence of the sequence sʰhyt bn ᵇ¹ bn ḡg in KRS 1486, 1489, and 1491. Enough of the following two letters remains to restore w and r given the context of the next part of the inscription. On the possible spelling of the month name nīṣān with a s see Al-Jallad 2015: 45. If this interpretation is correct, having to go to a place of permanent water in this month (March-April) would be sufficiently unusual (and disastrous) to be worthy of mention. The next word is difficult to interpret. The plural relative pronoun, ḡw, is unusual in this formula. Despite the damage, the third letter from the end is clearly a ’ (i.e. one form of the definite article) not a h, and author appears to have omitted the h.

Corpus of Safaitic inscriptions

By Mʿz son of S₁ dʿ w ---- the {young she-camel} w(l) ℓ{ḥt} w flt (m) ----{ls¹

Commentary:
The author has crossed out a letter after the z. After the first w there are traces of letters but it is unclear what they are. The letter read as r is doubtful as it does not appear to have two arms. The five letters after the second w are damaged by a chip. The l and ʿ are doubtful and the following letter might be a f, s, or y. After that, there are two letters of which only the V-shapes of the the forks remain. The end of the inscription runs into the end of KRS 1492 which makes the reading difficult. There is a d written over the second m and the following w should probably be read with KRS 1492 although that leaves a rather large gap in this inscription. The next letter is partially covered by some scratch marks. The following n belongs to KRS 1492 and the l is connected to the arms of a b in KRS 1492 and the s¹ is partially covered by the r of that text.

{l ‘rs\(^3\) ‘nhm b<><><{tn}} w {s}yr m- ḡrb s\(^1\)nt hrbl ḃb(q) w ‘s\(^2\)ll

By ‘rs\(^3\) son of ’nhm (son of) {‘twb) and {he returned to a watering place} from settled lands the year of the war of {Ḥbq} and {s\(^2\)ll

Commentary:
Several letters of the text have been altered. In the first name a loop has been made on one fork of the ‘ forming a ş, a line has been added in the middle of the s\(^2\) forming a ḫ, and a line has been drawn across the ‘ forming a w. There are scratches attached to the n of the second name and the h of the name has two lightly scratched lines added to one fork of the letter. The lines after the second b are difficult to interpret. The n seems to be written under the arm of the h and attached to it with a line and then there is the form of a s\(^2\) which might have been added later. A scratched line has been added in the middle of one fork of the next ‘ and the curve of the following b has been joined up to form a m. The loop of the ş has been hammered over and only part of the circle of the q is visible on the photograph.

1 ḏbb bn ḍbdʾl wr ṣ:mm ḥḥbb ṣ:mm ṭl qtāl

By ḏbb son of ḍbdʾl and he grieved for a friend for ṣ:mm [who had been] killed

Commentary:

It is difficult to read the beginning of the second name as there is a slight hammer mark and scratching over the letter. The sequence ḏbb bn ḍbdʾl occurs in the genealogy of KRS 710 and ḏbb bn ḍbdʾl occurs in KRS 519 and 520. It is possible the author wrote a letter and then scratched it out. This inscription and KRS 1511-1513 are surrounded by a cartouche.

There is a line across the fork of the fifth letter. It is thicker than the rest and was probably added later either to change the h to a y or as a simple act of vandalism. l {Lf}b{f} {b}n bødḥ

By (Ll) son of Bḥdḥ

**Commentary:**
The reading of the inscription is difficult and it seems possible that some of the letters might have been changed although there is little difference in the technique of the additions that might have been made to create the changes. The second and third letters seem to have been joined but it is unclear whether the second letter should be read as a l or a n with a slightly longer ligature. The fourth letter might be an ʿ with a second circle added later. If these corrections are right then the first name would read nf. The following letter should probably be read as a b with the shorter prong having been added later.

By Mksʿr (son of) (Nd) and (he pastured) (the) stony tracts (whilst migrating with tribe)

**Commentary:**
It seems likely that a number of the letters have been tampered with but it is extremely difficult from the lines of the text to be sure how the original letters should be read. The b and n of the first bn are joined. The following n has been hammered over. The prongs of the g have been joined up and a line and circles seem to have been added to the arms of the r. An additional line has been added to the middle of the third r possibly joining it to a ʾ in the form of a dot. It is possible that the next letter should be read as a ʿ, but there is a hammer mark over one line of the fork and it seems more likely that it should be read as a y. The next letter might be a ʿ or a h. The third n is attached to the arm of the preceding r. The crossbar of the w is rather carelessly hammered and the final letter might be a ʿ, although the second dot at the end of the line is rather carelessly done.

KRS 1542
l ħlst bn rb bn mtr w ḥll $h$.- {$(s^{3})$} {$(n)$} {$(n)$} w ṭzr m- ḥrn $h$.- $r$
By Ḫlst son of Rb son of Mtr and he camped [on] the (track) and he was waiting for the caravan from [the] Ḥawrān

Commentary:
The first name is carved in much larger letters than the rest of the text. The reading of some of the most crucial parts of the inscription are doubtful. After the first $h$ the depth of some of the lines of the letters suggest that they have been altered. It seems likely that the letter after the $h$ should be read as a $s^{2}$ which has been turned 90°. That it is not an $h$ is suggested by the fact that the fork is much deeper that those of the other two $h$’s in the text and the tail of the letter is not so long. The letter has a circle but it is not as carefully cut as the other lines of the letter and is shallower and it seems likely that it was added later to turn the letter into a $s$. The following letters are difficult to interpret. They are both the same and consist of lines with a slight curve at one end. They are too short to be $l$’s and are different shapes from the $h$’s and $r$’s in the text which are respectively deep curves and lines with distinct arms. It seems most likely that they should be read as $n$’s. As with the previous letter, it seems that they have been changed in this case to a $r$ and a $d$ by the addition of arms to the first and a loop added to the middle of the second. It appears possible therefore that $s^{n}n$ was what was originally carved and that it was then changed to $zrd$. After the second $h$, the $n$ was incised almost touching the arms of the preceding $r$ but there does seem to be a sufficient gap to be certain of this interpretation. For the interpretation of $s^{n}n$ here and perhaps in KRS 1701, cf. Arabic sanān “a way, beaten track” (Lane 1438c).

By $hl$ son of $dhr$ (son of) $s^2bnk$ (son of) (Gml) and O Yt [grant] deliverance to his 'lg

**Commentary:**
The second and fourth $b$'s are attached by scratched lines to the $n$'s that follow turning them into circle shapes. After the $s^2$ there are two circles, the second with a tail. Although it is difficult to tell from the incised lines whether they have been tampered with, it seems from changes made to the other letters that the first circle was originally a $b$ and the second was a $k$ and in both cases the arms of the letters have been closed by the addition of a line. The last letter of the fourth name consists of two lines drawn parallel to one another. The sequence $dhr\, bn\, s^2bnk\, bn\, gml$ occurs in KRS 1792 and $s^2bnk\, bn\, gml$ in KRS 902.

_ l frʾ bn ʿll h-ʿtn w h- gr_

By Frʾ son of ʿll is [the drawing of] the she-ass and the snare

**Commentary:**
For gr perhaps see Lane 400c ḥurrah "a piece of wood about a cubit long having a snare at the head and a cord at the middle with which gazelles are caught". If this interpretation of gr is correct it is not clear whether the she-ass is wild and snared on purpose or a domestic one and snared by accident.

The first t is written to the side of the other letters and was presumably originally left out by the author. There is a slight protuberance on the line of the second h but it is probably a misdirected hammer mark rather than an attempt to change the letter.

By (Whb) {son of} (Bnh) {son of} 'my {son of} {S’wd} is [the drawing of] the {slave girl}

Commentary:
Incised vertically down the left edge of the face. Several letters appear to have been altered or joined together obscuring the sense of the text. It seems possible that the second letter is a w and lines have been added giving it the appearance of a g. The h has been joined to the following b by inscribing the back of the latter along the line of the h. The following b and n have been joined together as have the b and n of the second name. The next b and n have been joined together and a cross line has been added to form a w. The n of the next bn has been joined to the first letter of the fourth name giving it the appearance of a h. A line has been added to the l after ḡ giving it the appearance of a s'. All four inscriptions on the rock claim the drawing.

Commentary:
Incised vertically immediately to the left of the woman's body. The rock is rubbed between the second \(m\) and the \(\text{'}\). The \(l\) of the last word seems to have been changed to a \(s\) as in KRS 1603. All four inscriptions on the rock claim the drawing.

Commentary:
Incised vertically immediately to the right of the woman's body. There is a line going through the second \(l\) but it is shallower than the other lines of the text and is probably incidental. The rock is damaged after the \(m\) but there is a short line visible and it seems likely that a \(\text{'}\) should be restored at the end. All four inscriptions on the rock claim the drawing.

l m {(?):} s bn nqd {t} w (s)

By M (son of) Nq (t)w (s)

Commentary:
The third letter is a line with an infilled circle at one end and infilling or destructive hammering at the other end. Originally it might have been an ḫ, s, h, or y. The next letter might be a ḫ but the way the loop is attached to the line and the slightly rougher technique used in inscribing the fork suggest that both might have been added later and that the original letter was a l. The third letter from the end looks like a ḫ but again, from the texture of the line of one loop, it is possible that it was a y and the fork has been closed up. The last letter has the form of a y but the fork is rather doubtful and it is possible that it was added later to what was originally a y. It is difficult to be certain about these changes but if the interpretation is correct then the word at the end would read swer "he built a cairn". The reading ṯw at the end is difficult to explain.

l m’d b (n) {b} n {l} b (n) {l} b

By M’d (son of) {b} n (son of) {l} b

Commentary:
The above is one possible interpretation of the inscription as the letters are crudely hammered and the author appears to have attempted to join them together. The circular shape after the fourth letter is probably a b and n joined together. The next letter might be a h or a t and the following line a t attached to a b. The next letter is probably a n with a hammer mark attaching it to the back of the d. After the ḫ there is a straight line, possibly a l, joined slightly to one fork of the ḫ and then joined to the next letter which is a b.

Commentary:
There is a line attached to the initial l and some hammering over part of the second letter. The fourth letter might be a r but it is more rounded than the other r in the text. Commentary:
The loop of the ṣḥ has been hammered over. Given the context however the reading is probably certain. The inscription is notable as being one of the very few containing the second person pronominal suffixes, both singular (though apparently referring to two deities, see Al-Jallad 2015: 99, 143) and plural. It is also worth noting that the author invokes the ḡḏ of both the two major tribal divisions ( ṣḏ and ḡḏ) in the area, cf. C 2246 whose author, however, had been pasturing herds of ṣḏ and ḡḏ.

By ġnṯ son of ⟨‘wdʾ⟩l son of Lḏn and (he grived) (for) Ymlk and O Lt blind whoever scratches out (the) writing

Commentary:
There are two l’s at the beginning of the text. The inscription has been heavily scratched over and parts of it are difficult to read. The second name is restored on the basis of the names occurring KRS 1694. After w w, a g can just be seen but, although there is space for a m and a ‘ after it, it is difficult to see traces of them. Only a line of the h after yʿwr is visible.

l wqf bn ʿsn fn bn grm w mn’ sʿfr y ġnṯ m- yzr

By Wqf son of ʿSn fn son of Grm and he protected two inscriptions belonging to ġnṯ from Yzr

Commentary:
There are some scratches over the inscription after the r of sʿfr y but the reading is clear. There are two inscriptions by someone called ġnṯ on the same rock and it is possible that Wqf, the author of KRS 1693, felt they needed protection from someone called Yzr. Another interpretation of m yzr would be as a relative clause “who was keeping watch” referring to ġnṯ. In this case yzr would be the 3rd person masculine preform of n zr where the n has been assimilated.

**Commentary:**
There is a shallower line at a slightly odd angle which gives the last letter the appearance of a d, but is clearly extraneous. The letters hmlk might be the proper name Hmlk or could be read as h- mlk "the king". On the use of 'yr for 'wr here see Al-Jallad 2105: 125.

By Mrʾ son of ḏ bd son of ḏ son of Sʾrb and he collected truffles at the rising of Scorpio b

\textbf{Commentary:}

There is a b after the last word and it is possible the inscription is unfinished. There is some scratching next to the inscription. Truffles abound in the season of the later rains, from February to April, but they can continue to grow as late as June. Perhaps it was this especially long season that caused the author to mention it in an inscription. The final b could indicate that the inscription is incomplete.

Commentary:
Lines have been drawn across the inscription and drawing and some of the letters have been altered making reading the original difficult and uncertain. The third letter, and the penultimate letter of the third name, which have been read as ʿy have a line going across the loop and it is possible they were originally ʿd s with the prongs closed by a line. The crossbar of the fifth letter is shallower than the down stroke and it is possible that it was originally a n. The following b and n have been joined together to form a circle. The fifth b has several lines forming the curve. There is then a line which was presumably a n which has been extended with thinner lines and a crossbar has been added at one end. There then appears to be another b, w, and b which are difficult to make sense of as a name. The following b and n have been joined to form a circle. A circle has been drawn around the first t of sʿtrt. A curve has been added to the b of hbb forming a w and the last b of the word has been changed to a ɡ.

\[l \{m\} \{d\} \{m\} \{\{n\}\} \{m\} \{\{h\}\} \{d\} \] dm----

By \{Mdd\} \{mn\} \{M\} \{the\} \[d\]m----

Commentary:
The shapes of the letters give the impression that the author was rather uncertain as to how to write. The second letter seems to be an unfinished \(m\) and the next letter is a carelessly inscribed \(d\). The sixth letter has the shape of a \(m\) as does the eighth, although the letter is indented and a different shape to the other \(m\)'s in the text. It is possible that the letters of this part of the text have been altered but, if so, it is not possible to distinguish the original lines. The first \(m\) could originally have been a \(b\) to which a curve was then added, the \(n\) to have had a loop added turning it into a \(d\) and the second \(m\) might originally have been a \(l\) to which a wavy line was added or a \(f\) to which a straight vertical line was added. The last word is partly hidden by another rock. It is possible that \(dmyt\) 'drawing' should be restored.

$l$ $dl$ {{((b))){{(n)}} {{(l)}}{{(l)}}}'}/b$

By $Dl$ (son of) L'lb

Commentary:
The reading is doubtful because it seems that the shapes of some of the original letters have been altered by attempts at joining them. There is a slight extension to one line of the $d$ which joins it to the preceding $l$. The $b$ of $bn$ has been joined to the preceding $l$ by two dots, making it look like a $s^5$, while the $n$ has been joined to the following $l$ giving the combination the appearance of a $s$. This $l$ is then joined to the following $q$.

{l(l)} gml bn m((n))y (ʾ-ː) m{(r)}y

{By} Gml son of {Mny} the {Mrite}

**Commentary:**
The letters seem to have been altered. A stroke has been added to the initial *l* giving it the appearance of a *h*. The *b* and *n* are smaller than the other letters and are written slightly below the second *m*. There is a horizontal line across the *n* of the second name turning it into a *t*. There is a line across one of the forks of the *ʾ* turning the letter into a *ṣ*. Lines have been drawn across the arms of the penultimate letter changing the *r* into a *ṯ*. Note the use of *ʾ* as the definite article before the *nisbah.*

Commentary:
There is a recent wasm hammered across this inscription and KRS 1774-1775. The third bn, and the fifth and sixth names are covered by the wasm. The letter following rʿy has the shape of a s² but it is presumably meant to be a j. The r of tṣr and part of the fourth letter from the end are covered by the wasm. The latter might be a ṣ, or a h. It is possible that a s² should be restored before the following m and {h·} [s²]my read but there does not seem to be enough space for another letter. The phrases w tṣr · my and w tṣr my occur in KRS 102 and 1267 respectively.

l ⟨’w’d¹⟩ bn s²----mh bn qdm<<>>{t}

By ⟨’w’d¹⟩ son of ⟨S²---- mh⟩ son of {Qdmt}

Commentary:
The second letter has a line across the circle but it seems likely it should be emended to ‘. The d has been hammered over and there are scratched lines across the ‘. The second letter of the second name is difficult to interpret but might be a s¹. The first three letters of the third name are rather squashed together and have been scratched over. They are followed by a h and a t which is doubtful as one line of the cross seems to be less definite than the other. It is difficult to explain why there is a h but perhaps it was a mistake that the author did not correct. Another possibility is that the lines read as q and d are in fact a q where the additional vertical line is incidental and the slight rubbing at one end of the h covers a loop, in which case the letter should be read as a s. The name at the end would then read qmṣt.

Commentary:
The arms of the r are uncertain. It seems likely that a y should be restored after the s[7] to read ’s[s][y]’. Commentary:
The author has written s[7] instead of ḏ before the deity’s name and in the word ḏf. ḏf occurs here and in WH 171 and ISB 113. A member of the Ahl al-Jabal, who inhabit the ḫarrah of southern Syria and north-eastern Jordan, identified a plant of the ḫarrah shown to him by Geraldine King as ḥafāq. Dr Sue Colledge later identified it from a photograph as Diplotaxis Harra. A deity h- brk has not been found before in Safaitic and it may be a way of referring back to B’ls’mmn. The translation of <f> h b’ls’mmn hlmt m- ḏ qbl w r’y h- ’bl ḏ<f>g b- r’y ’qbt is that of Al-Jallad (forthcoming).

Al-Jallad 2015: 262: "may pasturing bring abundance" for "grant abundance from a stony land"

**Commentary:**
It is not clear what Al-Jallad's "may pasturing bring abundance" means. The translation we have offered is based on Arabic ri\(\underline{y}\)\_ah "Land in which are projecting stones that impeded the plough", a good description of the harrah.

By (Ḥr) (son of) (Grs ʿ) w f l f l t w l h ʾnys ʿ ʿ

Commentary:
The second letter is rather large and has an usual stance. There is possibly an ʿ which has been filled in after the first r. The sixth letter has a crossbar which appears to be slightly shallower and was probably added later. If it is intentional then the word would read b t "daughter". The letters of the second name have been altered. The first has been filled in and lines have been joined to the arms of the next letter. By 'dm son of 'lyn son of Mrwn son of S^4d son of Ys^4\m'l and he grieved for a friend

**Commentary:**
After the name Mrwn the author carved \( bn\ s^4\d\ bn\ ys^4\l\ bn\ \sb\ \) and then crossed out the names and instead continued the text \( bn\ s^4\d\ bn\ ys^4\m'l\ w\ wgm\ \l\ hbb\ \) curving round. Presumably the first attempt was because of the mistake of \( ys^4\l\) for \( ys^4\m'l\). It is unclear why the author did not re-carve the name \( \sb\ \) in the second attempt.

By ʾḥbr son of ʾḥbʾ son of ʾḥl and he wintered taken captive (or suffering distress) [and] [in deficiency] [of provisions] and he made safe the sheep of the lineage of ḥš

Commentary: It is possible that the first letter after ʾny is a ṣ but the form of the letter is probably closer to the examples of ʾ in the text than to those of ṣ. ʾlʾḥš is carved in larger letters and the ʾd and ʾḥš have the Hismaic forms of these letters. If the ʾ before ʾdʾn is an article then the lineal affiliation must refer to the author rather than the owner of the sheep.

I mrbḥ bn ymlk w sṭr f ḥnn ʾl-ḥ

By Mrbḥ son of Ymlk and he had withdrawn far from his family and yearned for it [his family]

Commentary:
sṭr has been interpreted on the basis of Arabic ṣṭṭara "he withdrew far away from his family; or broke off from them, or quit them in anger" (Lane p. 1550c). Although, Lane gives this as the meaning of ṣṭṭara ʿalā ahlihi, the meaning of the active participle ṣṭṭir "one who withdraws far away from his family; or breaks off from them, or quits them in anger" (Lane p. 1551b) suggests that the verb can mean "he withdrew from his family", etc. without specifying ʿalā ahlihi. In Arabic, the verb ḥanna "he longed for" takes the preposition ilā (Lane p. 652c) which suggests that the letters ḫḥ after ḥnn should be interpreted as ʾl-ḥ "for it", rather than ʾl-ḥ "his family".

KRS 2022

{$l}$ \'{m}<\textgreaterевич<($k$)l$}{b} h----

{By} {ʾmrlt} son of {Klb} h----

**Commentary:**
There is a dot after the m which is probably extraneous as the name ʾmrlt is difficult to explain. The second name might read llt or, as suggested here, klb with one line of the k joined to the l which is then joined with another line to the following b. The author has not finished the inscription or the drawing of an ibex.

\textit{l ʿztt bn ʿgd(h)}

By ʿztt son of ʿgd(h)

**Commentary:**
The prongs of the last letter are very short and indistinct and it is possible that the letter should be read as a l. It is possible the inscription is unfinished and the end should be read ʿgd (h). Neither of the names ʿgdh or ʿgd are known in Safaitic, though ʿgd and ʿgdn have been found once each (KshMSMI 1 and KRS 1742 respectively). There appear to be two false starts at inscriptions on the rock. One is a l and possible ʿ and the other is a l and a s°.

By \( S^3tm\ \) son of \{Grmlh\} \( \text{is} \) \{the\} \( \text{two camels} \)

**Commentary:**
The eleventh letter has a loop at one end which is not completely closed. The name grmy is not attested and neither is gml as read by SIJ. It is possible the letter should be emended to \( l \) and the name grmlh read. If this is correct, the final \(-h\) and the following definite article may have been treated as a geminate consonant and therefore not carved twice (see Al-Jallad 2015: 38). The last letter is only a slight dash.

**Apparatus Criticus:**
SIJ 253: \( l s^1k\-\ h\ y\) \( h\)\-\ ħwlt \( h\)\-\ s\'trt \( h\)\-\ s\'rs^1
SIJ 254: ...\ ħwlt \( h\)\-\ s\'trth\-\ s^2rs^1

JSaf.N p. 112: reads the second half of SIJ 253+254: \( h\ \)\( ħwlt \)\( h\)\-\ s\'trt \( h\)\-\ s\'rs(t)\ "O Rdw [grant] a young girl, from \( Ħ\)lt, the modest, the beautiful"

**Commentary:**
This inscription and SIJ 255-256 (= KRS 2077-2078) were originally on a boulder which had cracked into three parts with SIJ 251-252 (= KRS 2079-2080), KRS 2081 (not read by SIJ), and SIJ 257-258. The bulldozers creating tracks for the oil exploration vehicles in 1989 broke up the boulder and the parts were scattered around. SIJ 257-258 were not found by the Rescue Survey. The letters of the first name have been joined up by carelessly carved ligatures. After this, the text was very heavily scored over and SIJ’s reading of \( (s^1\)\( h\)\-\( bn \)) \( ħf\) is not justified on the original. The third \( n \) is rather long and might have been added to later. After \( ġnmt, \) SIJ reads the letters as a separate text (SIJ 254) but the spacing of the letters indicates they should all be read as one text, as suggested by JSafN p. 112, although his interpretation is clearly wrong. It is unusual that the author did not place a connective before the beginning of the prayer and it is possible that he left out a connective or preposition in the last part of the text.

There is a chip after the the last letter although this might have occurred before the inscription was written as there seem to be traces of hammering on the chipped part. The traces might be part of the letter in which case it would read g or it might be a continuation of the cartouche in which case the letter would read b.

Commentary:
The letters ṭkbb are written after the name and the words w ḥkr ḫbb are written to one side. It seems likely that the author made a mistake after the name and then decided to write the correct words running down next to it. Commentary:
The middle prong of the first ḏ is doubtful. After the second y the rock is damaged and then most of the curse is written on another face of the rock. It is difficult to tell from the photographs whether it should be read with this inscription or as the end of KRS 2130. The r of the deity’s name is damaged by abrasions as is the third ṣ. O (S²n’r) help ’wd w (lnm) ’l ġ mlg -h

Commentary:
The thirteenth letter has short arms and it is possible that it should be read as a r. It would however be a different shape to the other r in the text which is a slight curve. The other l’s in the text have one hook and it is possible that the bottom hook of this letter is simply the result of the careless hammering technique used to carve the inscription. The letter read as a g has a hammered dot on one side of the circle. The divine name s²n’r occurs in KRS 36. There is no clear second ‘ in the name here although possibly a small hammered dot above the preceding n is intended to be one and was added later having been left out. If that was the case the name should be read s²n ‘+ ‘+ r.

Commentary:
The letters are written carelessly and are lightly scratched on the rock. The prong of the second h is slightly covered by lichen. The prongs of the following ḫ are rather unclear and the next letter is not very straight. The prong of the third h is very shallow and the crossbar of the first t is doubtful as the line has a black patina and might not belong to the inscription. l mhwd grh----s₁’d ḍrṭ

By Mhwd grh----s₁’d and so he farted

Commentary:

l mhwd is carved in a different style from the rest of the text. It is possible, but not certain, that there is a letter between the ḧ and the s₁. The last part of the text is written across KRS 2271 and the cartouche surrounding it.

1 {ʿ}r w (ḥ)<<<<rs f h lt s¹lm

By {ʿr} and {he was on the look out} and so O Lt may he be secure

**Commentary:**
The lines of the ‘ are slightly doubtful and there is a line after the ḥ which is presumably extraneous. It is not absolutely certain that the letter read as the initial l is the first letter of the text as it is written on the edge of the rock and it is possible there are letters before it on another face which was not photographed. Equally, it might be a continuation of KRS 2274 although it is difficult to see why the author wrote the l on the edge of the rock and not after the b of hbb.

The first letter of the third name has a slight tail which is probably an incidental stroke made when inscribing. There is part of another letter after the sixth n and then the rock is broken and the inscription continues on another line with a s². There are some scratched lines after the z and it seems likely that the
author made a mistake and then erased it. The sign read as r at the end is rather long and thinner than the other letters of the text and it is possible that it is extraneous.

Commentary:
There is a $l$ and $S^{2}$ on the left of the drawing which is presumably a false start at KRS 2318. Part of the first
letter and all of the second letter of the second name are damaged by a chip on the rock. It seems likely that ‘ and b should be restored. The sequence s²ʿṯm bn ‘bgr ln ‘m occurs in KRS 1065. The t of the name ḫsts²t has been left out and added above the s¹ and the following w.

**Commentary:**

Commentary:
The q of the word ts²wq is not in the photograph and the last five letters are written on the third face of the rock. By ḫr son of ‘s¹ son of ḫr son of (‘)s¹ son of Mḏny of the lineage of {Ms¹----} and he pastured the sheep at ‘nzt on spring herbage

Commentary:
The first letter of the fourth name and the lineal name are partially covered by a drawing. A fork of the former is visible and it should probably be read as a ḍ rather than a š or h which are the other possibilities and enough of the second letter of the lineal name remains for it to be read as a s¹. In view of the narrative w r’y h- ḏ’n b- ‘nzt "and he pastured the sheep at ‘nzt", it is worth noting that the area where this inscription was found is known today as Khallat ʿAnazah.

By (Qblt) (son of) (Ṣ'b) (son of) (Gs²w)

Commentary:
The letters have been joined together and possibly tampered with and it is very difficult to be sure of much of the reading. The first letter looks like a q although some of the hammering over the loop might have been intended for joining and the letter could have been a d. The next letter is either a b or a s¹ and the next one looks like a t although it is possible that one hammered dot was intended to join the letter to the previous one. If that is the case the letter could have been a y. The following b and n have been joined together forming a circle. The letter after the t is possibly a b although it is difficult to explain the thick line joining the arms of the letter. It seems most likely that the next part of the inscription should be read downwards and parallel to the first part although it is still difficult to make sense of the patronym and it would also be possible to make a case for reading the letters up the rock except for the last one which would be difficult to explain. The b and n have been joined together with a line which also runs into the next letter which could be a y. The next letter is possibly a s² and the last one possibly a w.

By (Ryd) (son of) (Nt) son of Mṣ son of ----\{wq\} son of Wrd son of (Ṣḥm)

Commentary:
As with KRS 2376 the letters have been joined together and possibly changed making the reading difficult. The third letter has the appearance of a t but it seems likely that one of the hammered dots was used to join the letter to the second arm of the preceding letter. The first n is joined to one arm of the preceding b and then by a small curve to the second n. There is a line going from the second n through the t and through the next letter which might be a another n. The third b and n have been joined together to form a circle. The following letter is very difficult to interpret. It might have been a s¹ but there is possibly a y inscribed over it. The following b and n have been joined into a circle. The fork of the third letter from the end is doubtful and it could just be an attempt at joining in which case the letter would appear to be a y.

Some lines of the loop of the $d$ are lightly scratched and the letter read as a $h$ has an arm and the fork is faint and slightly curved. There are light scratches around parts of the text which might be a crude cartouche. $lqys¹$ bn dhml occurs in SIJ 990.

Commentary:
There is a small line between the h and ṣ after the word ḥrṣ. It is possible that it is a n and the words h-ḥṣhy should be read. However, its position near the tops of the other letters rather than in the middle as is usual in the Safaitic script suggests that it might be incidental or a false start at a letter. The loop of the d and what is probably a n in the word before the beginning of the prayer have been hammered over.

l ʾbdʾl bn --- nn h- g(z)lw rʿy h- nhbl

By ʾbdʾl son of --- nn h- g(z)lw and he pastured the valley

Commentary:
There are lines joining the initial l to the ʿ and the ʿ to the following b. There is also a line going from the n of bn to the following n. It is unclear whether the name nn should be read or whether the line covers another letter possibly an ʿ. The letters of the next word are joined as well making their interpretation rather difficult. The h is joined by a ligature to the back of the following letter which is a circle shape. The next letter might be a z, n, or l. If either of the latter then a bar has been added to the top to join it to the preceding letter although it does not reach to the following one. The l is then joined to a crossbar of the t.

\( l \, ln \, bn \, \{h\} \{n\} \, y \, bn \, f\---- \)

by Ln son of \(\{\text{Hny}\}\) son of F----

Commentary:
The text is incised in very small letters and some of them are too small in the photograph to be read with any certainty. The middle prong of the letter read as \(\text{ḥ}\) is shorter and thinner than the other lines and it is possible the letter should be read as a \(\text{s'}\). The seventh letter might be a natural line in the rock. The text might be unfinished but it is possible there are further letters written in very faint lines and maybe a \(\text{n}\) and a \(\text{y}\) should be read after the \(f\).

**Commentary:**
Lines have been added to some of the letters. There is a line enclosing the arms of the second letter; the g has a line across the middle forming a w; the first b has been changed to a f; the second r has a short additional line turning it into a h; the h has a line across the prong and the second n has been changed to a h. Commentary:
Several letters of the text have been altered. The second letter is most probably an ʿ. There is a dot and lines have been added on either side. A tail has been added to the following b forming a k and a circle has been added around the t. There is a short line next to the letter. A middle line has been added to the next b to form a h. A dot has been hammered on to one arm of the r and the following b and n have been joined together to form a shape that resembles m or g. The cross bar of the z has been hammered over. There are two lines to the right of the inscription.

1 ḥt {{b}}{{n}} sʾd (b)n {(n)}g(y) {(b)}{(n)} {{ˈ}}{(g)}{(r)}

By Ḥt (son of) Sʾd (son of) Ng(y) (son of) ʾgr

Commentary:
The inscription is difficult to interpret and presumably the letters have been altered. We present one possible interpretation here. The fourth letter has the appearance of a w but it seems possible that the b and n have been joined together and an additional line has been added. The b has been joined to the n of the next bn. It is possible the next letter was originally a n and a cross-bar has been added later. The b and n of the third bn have joined together to form a g. A line has been added across the fork of the ῖ to form a ʿ and an additional loop has been added to the following g. One arm of the final letter has only a slight curve and the other has been hammered over.

Commentary:
There are scratches and some hammering covering the inscription. The letter after the first ‘ is damaged by hammering. Given the context it seems likely that y should be restored. The letter read as the first sʾ has a vertical stance unlike the sʾ at the end but it has a short tail suggesting that it is most likely a sʾ and not a h. It also seems most probable that the author left out a n between this letter and the following t and that h- sʾnt should be read.

----ṣ’dḥ{ḥ}ʾq----
----ṣ’dḥbʾq----

Commentary:
The beginning of the inscription is possibly covered by part of the drawing although there is not very much space for letters under the hammering. The second ḥ is not as carefully scratched as the other letters of the text. It is difficult to make sense of the letters covered by part of the drawing.

l dh bn dmg (b)(n) h(l)(l) b----

By Dh son of Dgm (son of) (Hll) b----

Commentary:
There is a cartouche which runs through the second bn and then the rest of the inscription is written outside. The letters of the last name have been joined together with lines at the top and bottom of them and it is difficult to know whether the two letters after the h are l’s or r’s.
