[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shamm as it runs northwards from the modern Al-Namarah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārāh dam to the Ruhbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Isawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shâm as it runs northwards from the modern Al-Namârah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Ṭsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Ṭsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādí
Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined
and with stone water-channels running from it. The main concentration of published inscriptions is on the
top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the
well and on the southern headland, on the crest of which is a stone tower.

**Provenance:**
Al-ʾIsawi, Rif Dimashq, Syria

Al-ʾIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʾIsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined
and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-İsăwî is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria  
[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]

Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Commentary:
Associated drawing to be numbered. The m is written at 90°. It is possible the second letter should be read as an ḡ.

Provenance:
Al-ʿIsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

AI-ʿIsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
AI-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʿNamārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

lmnʿl bn ḫmḥt)b[n] (w)----

By Mnl son of {Hnḥḥt} {son of} {W----}

Commentary:
The shape of the fourth letter of the second name is unusual. There seems to be a loop at the top but it is uncertain because of a later abrasion. The bottom part has what might be an unfinished loop and it is possible it should be read as a t. The text is very worn after the w and there are traces of another text written horizontally through the drawing.

*l wqm bn s’r bn sḥh w r’y h- b’il h- nl h w wrd h- nmrt*

By Wqm son of S’r son of Sḥh and he pastured the camels in the valley and watered [at] Nemarah

**Apparatus Criticus:**

LP: emends the third letter to d and reads the altered bn as w which is translated as "and". The commentary suggests that the first two names might be read as one "wqmws’m" "may he humble and poison" i.e. his enemies. wrd is translated as "he drew near". JVR p.33: emends the second w in LP’s copy to bn.

**Commentary:**

The first bn has been changed to a w by the addition of lines joining the n to the arms of the b and a crossbar see K 277. There is a second line inscribed along the curve of the first r which gives it the appearance of a m.
Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. l znʾl bn ʾsmʾn bn ṣḥwm

By Znʾl son of ʾsmʾn son of ṣḥwm

Apparatus Criticus:
LP 1073: ʿsbʾn for ʾsmʾn and {ʾs¹}<g>>lm for ṣḥwm.

Commentary:
Area A. One of the forks of the two ‘s is closed by carving a line between the branches of the fork thus forming a triangle. Despite this peculiarity they are different from the š which has a semi-circular (and not triangular) loop. It is possible that the t of ṣwm is in fact an ‘ or even a š with both loops closed but as the author has apparently tried to avoid confusion it is more likely to be a t.

Provenance:
Al-ʿIsawi, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

AlʿIsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
AlʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

By Grm’l son of D’b son of Kn and tuberculosis injured him at the year the ’l Qdm contended with the ’l Hrm and so O Lt [grant] security

Commentary:

Area A. It seems that the author initially wrote a b or a r instead of a y in b-r’y and then made a loop out of the angle of the of the b/r. The n and the t of s’nt have been scratched over and rewritten (by the author?) just below the two letters. h-s’l might be equivalent to Ar. sill = “tuberculosis”. However in view of the interpretation of b-r’y gml Littmann’s interpretation from Ar. sayl = “flash-flood” is more appropriate. The phrase b-r’y gml also occurs at the end of Slz 827 (not read by Slz) but visible on the photograph) in the sentence w sr m- mdbr b-r’y gml. Littmann’s suggestion that it was a place name meaning literally “a [not “the” as in LP p. 117] watering-place of camels” with r’y being from the root rwy and meaning “watering place” is accepted faute de mieux. Indeed this would fit most of the other instances of r’y as well. See also Photo Misc PH 20 for the part of the text from kn to b-r’.

l zn’ l bn ʿlm bn grmʾ l bn ḏʾb bn {k}n

By Ẓnʾ l son of ʿlm son of Grmʾ l son of ḏʾb son of {K}n

Apparatus Criticus:
LP 430: bll for {kn}.

Commentary:
Area A. The stem of the second letter of znʾ l is not as long as it appears at first glance. It was extended up in alignment with it and a more thinly scratched line running round the ẓ was then drawn to join it with the lām auctoris. The very thinly scratched line which crosses the g is extraneous. The third prong of the ḏ is joined to the previous letter. The reading of the last two/three letters is not completely certain: it is possible that the join between the curving part of the k and the vertical stem which follows is accidental (it continues beyond the vertical line and touches the last letter). Five m of various sizes have been incised on the same face of the stone four of them partly or completely covering the text.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

/l {ḍ}/(t) ḥ- bkrt/

(By) ḏ is the young she-camel
**Commentary:**
Area A. The initial letters are preceded by a flattened circle which could possibly be a bn with the n attached to the b and it is thus possible that this text the presence of which at this point on the stone is very odd is in fact the continuation of the genealogy of the author of L 121. No satisfactory explanation can however be offered to explain why he would then have repeated h- bkrt which is very thinly scratched. See L 121.

**Provenance:**
Al-Isawi, Rif Dimaq, Syria

lʾmr bn ḥmy n w l- ǧdr mn- {s²}nʾ
By ’mr son of Ḥmyn and he shall not be found wanting in the face of {enemies}

Apparatus Criticus:
LP 475: w 党工委 mn bn <h> for w l ǧdr mn- {s²}nʾ

Commentary:
Area A. The text is written on the ridge between two faces of the stone. LP’s reading is impossible. The letter before ǧdr is too long for a n (see previous n). The s² has no zig-zags. The b and the ḥ are 90°. We have taken the l following the w as representing the negative particle lā appearing here for the first time in Safaitic which in Arabic is used with the perfect in assertions when an occurrence is considered “so certain that it may be described as having already taken place” [Wright ii 2A]. The asseverative quality of the statement has been represented in our translation by the use of the auxiliary “shall”. ǧdr would be equivalent to Ar. ǧaddara “he fell short of what was requisite he was cowardly” [Lane 2266b] with mn in the sense of “as regards to” hence “in the face of”. Alternatively it could be the equivalent of ǧadora/ ǧadira “to turn aside” though in Arabic this takes an rather than mn [Lane 2266a]. However if the l after the w is taken as a second lām auctoris introducing a second author cf. L 284. But then the rest of the text is incomprehensible. ǧdr could = Ar. ǧadar “prosperity”

Provenance:

\[\text{l̄ z̄[l]̄} \text{bn whb̄l}\]

By Zl̄l son of Whb̄l

**Apparatus Criticus:**

LP 478: s̄l̄ for z̄[l]̄. LP 946: z(d)̄l̄ for z̄l̄; whb̄l̄ corrected from whbd̄ on the copy

**Commentary:**

Area A. The second l is as long as the lām auctoris whereas the n is much smaller. The reading of whb̄l̄ implies that the vertical stroke attached to the ‘ does not belong to the letter. It is also possible that the author wrote this stroke as the final l but that finding it confusing he traced a second one above and at right angles to the letters wh. The identification of this text with LP 946 is certain the copyist taking the ‘ and the line attached to it as a d. He also copied L 130 [= LP 945] which Littmann had missed. It is not clear why this copyist chose only these relatively insignificant texts from among the 11 on this rock.

**Provenance:**

**Commentary:**
Area A. Ḥṛm could also be read ḥbn. It is however more likely to be a r because although the shape of the letter is very much like the b in this text it is much larger and has a wider angle. There is a blob on one end of the ‘but the second sprong of the ‘is still visible. This text was written after L 148 because the author was hampered by its presence. Associated drawing to be numbered.

**Provenance:**
Al-ʿIsāwī, Rif Damascus, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Commentary:
Area A. Associated drawing to be numbered. It seems unlikely that LP 1042 should be identified with this text since the latter is very faintly scratched on the side of a boulder (see also L 174).

Provenance:
Al-ʿIsawi, Rif Dimashq, Syria  
[Latitude/Longitude: 32.903569 / 37.320314]  
Al-ʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l qṭw w qlt h- ≈ṣ(m)mn
Corpus of Safaitic inscriptions

By Qtyt and Qtbt the {two best [members of the tribe]}

Commentary:
Area B. The final word is presumably in the dual referring to the two authors. The š and the following m are not very clear on the stone and could be ţ and h respectively. Šmm if that is what it is may be the equivalent of Ar. șamīm “the choice best most excellent part [of a thing]” as in the expression huwa fī șamī mi qawmi-hi “he is the among the best of his people or party” [Lane 1723c]. Șamī can also mean “pure unmixed in respect of race lineage or parentage” [Lane 1723c]. Alternatively šimma means “courageous” [Lne 1723b]

Provenance:
Al-Ġsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Ġsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namârah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

*l Ṣrḥ bn nhb h-ḥkr *

By Ṣrḥ son of Nhb is the young she-camel
Commentary:
Area B. The author’s name is not certain since the b is written within the curve of the r and so together they resemble a m. They are not joined at the bottom but the tops of the lines have been destroyed by a chip in the rock and so it is impossible to be certain that this is correct. Like 262 this text was clearly written after the drawing had been carved. Since the authors appear to be brothers and both claim the drawing it is possible that s¹lm was responsible for drawing the man and Rb for the camel.

Provenance:
Al-ʿĪsāwī, Rif Dimaşq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

$h \text{rdw hb l-} qdm \text{ nm } 's i'd \ 'bl-h$

O Rdw grant Qdm vengeance on 's i'd [for or in the form of] his camels

Commentary:
Area B. The m in mm is 90°. The b of 'bl has been partly hammered over giving it the appearance of a k and a short stroke has been added to the hook of the l in the same word. This inscription must have been written before 315 since that text is forced to swerve to the left to avoid the final -h of 319. The reading seems clear but it produces an apparently awkward construction.

Commentary:
Area B. The letters of the text have been very effectively vandalised by additions and overhammering and the reconstruction above is inevitably speculative.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

I Ḫfr bn ḫwd bn Ḥy

By Ḫfr son of ḫwd son of Ḥy

Apparatus Criticus:
LP 939: dh(l)(t) f for Ḫfr.

Commentary:
The "short stroke" which Littmann converted into a ṭ is in fact the continuation of the longer stroke which he took as ḥ. There is a small dip in the surface which can put into shadow the join between them. The apparent continuation of the lower line beyond the join is in fact part of the crack in the rock which runs from the upper fork of the ḥ across the r and then back across the lower fork of the ḥ. Although not shown on the copy in LP the crossbar of the y of ḥy is clear in this text though obscured by a chip in M 30.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

lʿsʾr bn ḥl

By ʿsʾr son of ḥl

Commentary:
A drawing (to be numbered) on an adjacent face.

Provenance:
Al-ʿIsawi, Rif Dimaq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.
Is. M. 41.1

ʾĪṣaʿî b. kūn b. šhnh

Commentary:
The y of šhnh has been made with multiple incisions. The ethnicon has not been found before in Safaitic but is attested once in Hasaitic: {ḏl} // lʾṣbhn // /d l h dn/ (Ja 2146/1-3). However with no vocalization it is impossible to tell whether the name is the same in both texts and if so whether there is any connection between the two.

Provenance:
Al-ʾĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0026808.html

Is. M. 41.2

ʾĪṣaʿî b. ᶡhḥ

Commentary:
This text must have been written after M 41.1 since it swerves to avoid colliding with it. ʾrs² does not seem to have found in Safaitic before though ʾrs² is known.

Provenance:
Al-ʾĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. Is. M. 42

ʾĪṣaʿî b. ᵡhm b. ᵱwhb b. ᵲṣ⁴wrd

Commentary:
The first two names are chiselled and the last two slightly incised. The identification of this text with LP 936 and 937 cannot be completely certain given the crudeness of the copies made by Littmann’s companions. But the fact that LP 936 and 937 contain the genealogies in the two halves of M 42 suggests that it is very probable. On the other hand the copies of LP 936 and 937 do not read boustrophedon at least in the form in which they are published.

Provenance:
Al-ʾĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʿNamārah dam to the Ruḥbah. Is.M 58
l ʾlwhb bn ʿzz bn yzʿm

By ʾlwhb son of ʿzz son of Yzʿm

Commentary:
The text was carved in a number of techniques. The first two letters were direct hammered and the lower hook of the ʿ was then extended by incising with a broad point. The next three letters lwh were incised with the same broad point and the left side and cross-bar of the w were formed by less careful multiple incisions. The b of the first name is direct hammered but the bn which immediately follows it is formed by multiple incised lines. The ʾ of the second name is shallowly incised with a narrow point. The first z was incised with a broad point. The stem of the second seems to have been formed first by a a very finer point and then incised with a different broad point (or the same point held at a different angle). The cross-stroke of the second z is direct hammered. The b of the next bn is formed by multiple scratches and the n by one such scratch reinforced by a line incised with a broad point. The final name is lightly incised with a fine point.

Provenance:
Al-‘Isawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]

l ʾnʿm bn ʾs¹wd

By ʾnʿm son of ʾs¹wd
Commentary:
Given that the inscription consists of only two common names it is difficult to identify M 60 with LSI 111 (= C 3249) or LP 960 with any certainty. It cannot be LP 486 since this is securely identified with L 28 and LP 960 could equally well be H 195. CHECK IF M 60 IS ON THE "SOUTH SIDE OF THE HILL" THE PROVENANCE GIVEN FOR LSI 111. Some of the letters (e.g. the ʾs¹-w of the second name) are lightly incised. The rest appear to have been formed by scraping the surface with a relatively narrow transverse point. On the other hand (and perhaps more likely) this effect may be the result of variations in the pressure with which the instrument was applied to the surface since both techniques can be observed in the d.

Provenance:
Al-ʿIsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿIsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ḍḥd bn ṭbr h- bkrṭ

By (Ḍḥd) son of Ṭbr is the young she-camel

Apparatus Criticus:
LP 934: Nbl for ṭbr; h-bkrṭ omitted

Commentary:
M 64 65 and 66 can be identified LP 934 933 and 932 with more by the lay-out and mutual proximity of the latter than the texts. The published versions of these inscriptions show how inaccurate some of the copies made by Littmann’s companions could be. The lower edge of the face laminated at a period before the inscriptions were carved and the final letters of all three texts are written in this more lightly patinated area. The last three letters of M 64 are very faint but just visible on the slide. Associated drawing to be numbered.

Is.M 72

l ṭmt bn ḥfy bn rbn <<< bn bny w wgm ḥbny

By Ṭmt son of Ḥfy son of Rbn son of Bny and he grieved for Bny

Apparatus Criticus:

LP 322: Ṭmn for Ṭmt; [b][n] ḥbn ḫy w wgm ḥbny for <<< bn bny w wgm ḥbny

Commentary:

There is a small curving line joining the second and third letters part of which Littmann copied and read this as ḫ. However compare the ṭ of ṭ- which is a full circle. The fifth letter which Littmann read as n has a clear cross-stroke and can only be n. After rbn the text turns sharply back on itself. To the right of the bn which follows rbn there is a ḥ in exactly the same technique as the other letters but which is curiously placed if it was intended to be read as part of the text. Moreover to take it as the first letter of the next name (ḥbn) as read by Littmann not only requires the restoration of a [b][n] between rbn and the ḥ but also an unnatural reading of the letters which follow (Littmann’s ḥy where the sequence of letters would at best be ḫy or yʿl). It therefore seems more likely that the ḥ is extraneous to the text (though see below for another suggestion). If this is accepted the text then reads easily ṭmn bn ṭmt bn ḫy w ḥbny w ṭgm ḥbny. Despite the fact that there is plenty of room on the face the statement has been written in a tight circle which places the ṭ- immediately above the final name of the genealogy bny. The obvious conclusion is that the author was grieving for bny and by an elegant device made it clear that the bny for whom he was grieving was his great grandfather. Given that the author did this at the end of the text it just possible that the ḥ discussed above is part of an even more elaborate device. If the name ḥbn did indeed occur in the author’s genealogy between rbn and bny it is just possible that he “telescoped” the five b-n sequences in the three successive names and the two “ibn”s which separated them making the b-n sequences of rbn and ḥbn do duty also for the following ibn’s. However this is a far more speculative hypothesis than the reading proposed above and is not supported by the genealogies in M 85.1 and 85.2 which appear to be by brothers of the present author. It would seem therefore that the ḥ must be treated as extraneous to the text. Ḥbn would be so far unattested in Safaitic since the references in Hn p. 175 should be deleted. The name in SİJ 550 is clearly ḥrn (which should be added to Hn. 186) and in WH 3685 ḥbn appears to be a substantive.

Provenance:

The text is surrounded by a lightly incised cartouche crossed by 7 lines. The are two chips on the edge of the face after the r which resemble part of a t.

Provenance:
Al-ʾIsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

I mtr bn ḥmlt bn ḥr bn ḥmlt w wgʾ

By Ṣmr son of Ḥmlt son of Ḥr son of Ḥmlt and he gelded

Commentary:
The surface of the stone is rough and covered with tiny pittings. The lʾs of the second and fourth names are the same length as the nʾs and significantly shorter than the lām auctoris. However in M 99 the name of the two authors’ common great-grandfather is clearly ḥmlt. The verb wgʾ has not be found before in Safaitic. Ar. waÏaʾa is used of gelding goats and it is possible that it could be used with the direct object understood just as the verb wld which is usually found with h- mʿzy as its direct object can sometimes be found alone (e.g. NSR 10 WH 1114).

--- ḯ bn 't bn mr' w ḡd s¹fr ḥl - h ms¹k f b's¹ mzll w {wg}{m} 'l- b - h w 'l- dd - h s¹k

--- ḡ bn of 't bn of Mr' and he found the writing of his maternal uncle Ms¹k and so was overshadowed with grief (he grieved) {for} his father and for his paternal uncle S¹k

**Commentary:**
The first three visible letters are written very close together and an abrasion half way down their stems gives the impression that they are joined i.e. that they are one letter t. The text appears to begin on the adjacent face but the letters there are too faint to be read. The author appears to have omitted a connective after mzll as well as the g-m of wgm and the l of the following 'l- and added them above the line. However none of these interpolations is clear. The gif that is what it is is considerably smaller than the "s of the two 'l's. The m if that is what it is has a cross-bar which makes it look like a w. The l is crossed by a stray diagonal scratch giving it the appearance of a tiny h. Finally there is an extraneous more recent triangular mark just above the ' of 'b - h. The ' of the 'l- is the same size as and a similar shape to the m of wgm as is that of the second 'l-. While the name s¹k is attested in Safaitic it is possible that the author also omitted a m at the beginning of this name.

Is.M 106 (LP 424)

l mlk bn gyrʾl bn nhb w ngr s¹nt ngy mlk s¹ltn
By Mk son of Gyrʾl son of Nhb and he kept watch the year that Mk retained power

Apparatus Criticus:
LP 424: mn h- s¹ltn for mlk s¹ltn

Commentary:
The letters are entirely clear and Littmann’s reading is impossible. The interpretation of the dating formula is difficult. The simplest translation "the year that Mk rescued s¹ltn" is unfortunately unlikely since the use
of of the term sultān as a personal name is not attested until late in the Islamic period. On the other hand s¹ltn meaning “imperium” in Safaitic is defined in all other examples except one C 66 where the copy has s¹ntnt --- m s¹ltn in which the m is probably the preposition meaning “from” but could be the end of the previous word the rest of which is lost in which case it would provide an exact parallel to our text but would be of no help in elucidating it. In all other cases s¹ltn is defined and when following the verb ngy it is preceded by the preposition m(n)- (e.g. LP 540 s¹nt ngy m - nmrt h - s¹ltn). In Arabic and apparently in Safaitic the verb ngy in the I Form means “to be rescued/escape from (mn-) something” and the II Form means “to rescue (someone) from (mn-) something/someone”. We would suggest very tentatively that here ngy mlk means “Mlk was saved” and that s¹ltn is an adverbial accusative (equivalent to Arabic sultānān) “as regards political power”. In this case mlk must be a personal name since if it represented the title “king” it would have to be defined. Given that s¹ltn seems to be used of state rather than individual power and the fact that the only rulers in the region who we know used the personal name Mlk were the Nabataean kings it is probable that this text refers to one of the Nabataean monarchs of this name either Malichos I (c. 58-30 BC) or Malichos II (AD 40/41-70/71). Malichos II’s name was in fact written Mlkw in Nabataean a form which appears in Safaitic in the forms Mk and ‘bd-Mk. It is therefore possible that this text refers to one of several known incidents in the reign of Malichos I or one of others unknown. One possibility is the war between Herod the Great and Malichos I in 32/31 BC the final battle of which took place near Qanawāt. According to Josephus Herod at first beat the Nabataeans but the latter were saved at the last minute by Cleopatra’s general Atenion who attacked and routed the Jewish army just as it was celebrating victory. Josephus notes that the latter “received a great loss in places where the horses could not be of any service and which were very stony and where those that attacked them were better acquainted with the places than they themselves” (AJ v.1.). Josephus comments “the Arabians [i.e. Nabataeans] had unexpectedly a most glorious success having gained that victory which of themselves they were in no way likely to have gained” (ibid.). On the other hand he gives no indication that loss of this battle would have resulted in the removal of Malichos from power.

l ms¹k bn 'brqn b[n] {m}{s¹}k w r'y h- d'n s¹nt s¹rt mlk b- h- 'rd f h lt s¹lm

By Ms¹k son of 'brqn son of {Ms¹k} and he pastured the sheep the year Mlk served in the great army and so O Lt [grant] security

Apparatus Criticus:
LP 326: s¹nt s¹r (h-) mlk b- h- 'rd "the year in which the king travelled in this valley (?)".

Commentary:
The inscription was carved after the the drawing and M 112 which it carefully avoids. The s¹ of the third name is attached to the y of y'wr in M 112 and the letter(s?) before it is/are damaged by abrasions. The word after s¹nt is clearly s¹rt (on both the original and Littmann's copy) and LP's reading s¹r h- mlk is therefore impossible. For our interpretation see MISS p. 468. The last three letters are scratched.

l ns²ʾl bn sʾwr bn s²dy w wgʾ ‘l- bny ʿḥt-h f m[k]m{m} h- “lḥ

By Ns²ʾl son of Sʾwr son of S²dy and he was sorrowful for the little son of his sister and so --- the gods

Commentary:

Bny could represent either the diminutive (cf. Ar. bunayy) or the oblique case of the plural (cf. Ar. banj). The latter would however require the assumption that what is a final long vowel in Arabic was pronounced as a consonant in Safaitic. The is the first occurrence in Safaitic of the plural of 'lh “deity” cf. Ar āliha. The preceding ḥ could be either the vocative particle or the definite article depending on the interpretation of the preceding word the second and third letters of which are obscured by an abrasion (see SEMB96 22:22 for best view of this passage).

Provenance:

l bn bn mlk bn whblḥ bn mrʾlh w wgm ʾl-ʾb-h

By Lbn son of Mlk son of Whblḥ son of Mrʾlh and he grieved for his father

Apparatus Criticus:
LP 338: mrʾ[ ]lh for mrʾlh

Commentary:
Incised with a relatively broad point. The last two letters are rough and careless and have noticeably different forms from the other examples of these letters in the text. Littmann omitted the ʾ of mrʾlh from his copy and "restored" it in his reading.

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

Is.M 128

\( \text{l wf bn mlk bn whbh bn mr’lh w wgm} \ 'b \cdot h \)

By Wf son of Mlk son of Whbh son of Mr’lh and he grieved for his father

Provenance:
Al-Isāwī, Rif Dimašq, Syria

Is.M 129

\( \text{l ’qr} \text{b} \text{bn mlk bn (w)} \text{hlh w wgm} \ 'b \cdot h \text{w h dt} \text{n h} \cdot \text{s’fr} \)

By ‘qr b son of Mlk son of (Whbh) and he grieved for his father and O Dtn [protect?] the writing

Apparatus Criticus:
LP 341: w (h) dt h \cdot s’fr “and he made this new inscription” for w h dt n h \cdot s’fr

Commentary:
The initial letter of the first name and the first two letters of the third name have been damaged by heavy over-hammering but are still visible. The ‘ of ‘qr b is a circle not a “dot” as suggested by Littmann. The invocation is absolutely clear on the stone and what Littmann considered to be a “flaw in the stone” following the ‘ is in fact a n. Thus the prayer is address to the deity Dtn found in other texts at al-‘Usāwī. Whether the verb has been omitted or is to be understood or the prayer is simply calling the deity’s attention to the inscription is unclear.

Provenance:
Al-Isāwī, Rif Dimašq, Syria
Al-Tisawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shama as it runs northwards from the modern Al-Namaraq dam to the Ruhab. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0026899.html

Is.M 130

l ʾgyrʾ

By ʾgyrʾ

Commentary:
A lightly scratched text between M 127 and 128 which was not copied by Littmann. There is no sign of a l following the ʾ and the text is probably unfinished.

l ʿs¹ bn ʿl bn s²hyt bn s¹ny w wgm ḥ- ʿmr ʿl- ḥn w ʿl- ʿrm

By ʿs¹ son of ʿl son of S²hyt son of S¹ny and he grieved for his two brothers for Ḥn and for ʿrm

Apparatus Criticus:
LP 386: ḥ for ʿs¹; ʿmr for ʿrm. LP 1101: s²hy(t) for s²hyt; w[g][m] for wgm; ʿl for ʿl); ʾḥ(h) (w) for ḥw -ḥ; ʿm for ʿrm

Commentary:
The text was incised with a broad point. The third letter could be ḥ or s¹ but its size in relation to the previous ʿ and compared to the ḥ later in the text suggests that it is more likely to be s¹. From the position of the ʿr of the final name it would seem that the author originally omitted them and then inserted them below the line. Littmann’s reading ʿmr is less probable since the r is placed before the m. As Littmann notes this
text shows clearly that the dual of ʾḥ in annexation is ʾḥw. Littmann did recognize the identity of LP 386 and 1101 and his reading ʾḥ-h w was based on the assumption that the order of w and had been inadvertently reversed by the author or the copyist.

I ḫlf bn bʾr bn zbdʾl bn sʾmt w ḩt hʾr ṭf h ḡt lsʾlm m- bʾsʾ w mn- ḥšt

By Ḫlf son of Bʾr son of Zbdʾl son of Sʾmt and he spent the season of the later rains in this valley and so O Lt [grant] security from misfortune and from an attack

Apparatus Criticus:
LP 374: mn ḥšt “from cunning” for mn ḥšt “from an attack”

Commentary:
See the commentary to M 142. The final phrase was read m- hʾsʾnt on the original and this would presumably mean “from this drought” (cf. Lane 1448a-b). While the expressions sʾlm m- hʾsʾnt (meaning “this year”) often appear in prayers sʾlm m- hʾsʾnt would be unique the nearest comparison being hʾst lsʾlm w ḩḥšt m- sʾnt bʾsʾ in WH 2110. However on the photographs it is clear that what was taken as the side-stroke of the h is not joined to the stem and that Littmann’s reading mn- ḥšt is equally possible. His translation however seems most unlikely and we would propose “from an attack” based on ḥallah (pronounced ḥalli) “attack” (Landberg Glossaire de la Langue des Bédouins ‘Anazeh p. 13) possibly related to ḥalla or ḥawla “strength might force” (Lane 675c 688c)?

Provenance:
Al-ʿĪsāwī, Rif Dimašq, Syria

{l's}¹ny bn s¹br bn 'bd bn 'dm bn Ms¹k w wgm 'l- hq[[m]]wm w 'cl- ḥmlt w 'l- ----

By S¹ny son of S¹br son of 'bd son of Ms¹k and he grieved for hq[[m]]wm and for ḥmlt and for ----

Apparatus Criticus:
LP 356: (ʾ)qwm for hqw[m]; w [][])l-]l̲n ---- for w 'l- ----

Commentary:
Although he copied M 144 and 147 Littmann seems to have ignored all the other inscriptions on this stone (i.e. M 145-146 148-151). Unlike the rest of the text which is incised the letters of the second name are scratched and Littmann apparently did not see and therefore did not copy the r which is particularly faint. He therefore suggested that the h was a monogram of h and r. In fact the r is larger even than the h and forms a link between the first two lines of the text. Littmann regarded hqwm as an error for 'qwm citing w wgm 'l- 'qwm in LP 410 and 'l- 'q[w] m in 411 to which one might add w wgm 'l- ḥmlt w 'q'm in M 150 (on the same stone as this text) but there is nothing to indicate that the same person is referred to in all four texts. However the author did make two errors. He wrote the q of hqwm twice making a feeble attempt to erase the second. He also wrote h for l in the second 'l-. The final name is very faintly scratched and is illegible.

I ḍyn bn sḥr bn ‘bd bn ‘dm bn msḵ bn sʳb bn ʿlmt w bd’ h-ḥrff h lt s‘lm w ṭy h-ḍn

By Dʿy son of Sʿḥr son of ‘bd son of ‘dm son of Msʿk son of Sʿʳb son of ʿlmt and the first rains began and so O Lt [grant] security and he pastured the sheep

Apparatus Criticus:
LP 355: w(b)(ʿ)(d)(-h) ḫ-ḥrff “and the autumnal rain drove him away” for w bd’ ḫ-ḥrff

Commentary:
Associated drawings to be numbered. Littmann’s copy joined parts of three letters from M 148 (the rest of which he did not record) to the tops of the b-dʿ of bd’. The verb bdʿ “to begin” has not been found before in Safaitic. On the meaning of ḥrff in this text see MST p. 4. Among the modern bedouin ḥarṣf is the end of the dry season ṣỳẓ and ends with the rains which coincide with the rising of Canopus (Suhayl). These rains are called Sheylāwi or ḫerf and belong to those called by the bedouins al-wasm which are the most important of the year for the replenishment of wells and the growth of pasture (Musil Rwala p. 58 13). It is possible that the prayer for security was occasioned by the fact the raiding was common in times of rabhī that is the abundant herbage produced by rains at any season (Musil Rwala p. 13-14 and 507).

I l(j)(y)(s) bn bny bn sḥr bn ‘bd w byt h- dr w ‘l’h- mrbšt ‘l-h- nnrt w ṭl[m](z)y (-h) ---- y(z)a’(z)s’mr----

By Lysʿ son of Byn son of Sʿḥr son of ‘bd and he spent the night here and he fed on dry fodder the camels born [or who had given birth] at al-Namārah in a time of abundance and (his) goats (failed to multiply) ----

Commentary:
The reading of the first name is very difficult and lysʿ is suggested very tentatively. The first two letters touch each other and the ”s” which is made up of one straight and one curving line could be a k. The sign immediately following the s may be the last letter of the text. Neither lysʿ nor lyk are attested but cf. perhaps Ar. lays “courage” or lkā “to chew“ (?). Littmann copied part of the f of ‘l and part of the following h and the m of mrbšt as belonging to letters in LP 355 (M 147). The word mrbšt recurs in LP 357 where Littmann took it as representing the fem. pl. of the active participle of the IV Form of rbʾ murbiʿat (Vocabulary p. 342b) and translated it “spring camels” without explaining what he meant by this. As Musil explains “in the inner desert the word rabhī does not signify a season of the year” but the abundance following good rains at any season “it is therefore impossible to translate it by the word spring as we may when we are dealing with the settled and cultivated territories. The fellāḥin inhabitants of the cultivated territories enjoy the rabhī from year to year and as it always begins at the same season the rabhī for them signifies the spring” (Rwala p. 13-14). According to Lane (p. 1017b-c) rubaʿ signifies “a young camel brought forth in season called rabhī” (of which the fem. pl. is rubaʿat) though Musil says that the Rwala give this name to a she-camel in her sixth year which is when she may first be covered by the male (Rwala p. 333). Lane (p. 1020a-b) says that murbiʿ (without tāʾ marbṭa) or mirbāʿ is “applied to a she camel that brings forth in the
season called rahʾ or that has her young with her the young one being called rubaʿ. From this it would seem that no appropriate exact parallel to mrʿt is provided by the Arabic lexica which probably explains Litlmann’s choice of the ambiguous “spring camels” but that the translations offered above are probably not too far from the mark. The author appears to have omitted the f of slf and to have added it to the side of the text. In Ar. the verb slf is used of things which do not live up to expectations (clouds which give little or no rain seed that does not produce much growth etc.) If the following word is mʿz the z is imperfectly formed. The -h is followed by two crossed lines more lightly incised than the rest of the text and which may not belong to it. I can make no sense of the rest of the text.

Provenance:
Al-ʿĪsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. l ḥny bn (ʿ)b n mlk bn ḍbd bn (m)ṣʾk bn ṡrbd w ḫmlt w ṭʾ qʾm w ----

By Ḥny son of (ʿ)b son of Mlk son of Sʾrbd and he grieved for ḫmlt and for ṭʾ qʾm and ----

Commentary:
The inscribing instrument seems to have slipped when the author was cutting the ḍ of the first ḍbd. The m of msʾk is apparently covered by an abrasion and ṡʾk are extremely close together. From ṡʾrbd onwards the letters are more lightly incised and more carelessly written. After ṭʾ qʾm there is a w followed by two illegible letters. An attempt seems to have been made to erase all three.

Provenance:
Al-ʿĪsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l s²mt bn zhb bn mʿz bn ms²r w (w)gd s¹fr ʿd f ngʿ (w) wgm ʿl- ymlk w ʿl- zhb w ʿl- mʿz w ʿl- ʿbd w ʿl- ns¹f w fwny f wnh ʿl- gs²u h ʿl- bd f h t w ds²r w s²hqm s³lm l- ʿd s²r

By S²mt son of Zhb son of Mʿz son of Ms²r and he (found) the writing of ʿd and so he was sad (and) he grieved for Ymlk and for Zhb and for Mʿz and for ʿbd and for Ns¹f and so he was depressed and will be distraught with grief for ever on account of his raiding party and so O Lt and Dṣʾr and S²h-qm [grant] security to him who leaves intact [or who remains]

Commentary:
The text is written across two faces. The w of wgd is under a patch of abrasion as is the w before wgm. The f before wh seems to carry on the sequential sense of the previous f and I have therefore translated it simply as “and” rather than “and so”. I have taken the sense of the perfect in wnh l- ʿbd to be that of “an act the occurrence of which is so certain that it may be described as having already taken place” (Wright ii 2A) since “he was distraught with grief for ever” makes little sense. It is possible that the five persons for whom he wgm were members of his gs². The author’s grief for his raiding party suggests that its members had perished and that only he (or perhaps he and a few others) had survived possibly because they had been left behind with the baggage and exhausted camels (Musil Rwala p. 523). In this case the prayer s³lm l- ʿd s²r might refer to the author “the one who is left” rather than as is usually the case to “whoever leaves [the inscription] unharmed”.

Provenance:
Al-ʿIsāwī, Rif Dimašq, Syria

{l}mm bn ḥddn bn ḥddn d-ʾl dʾf w wld h- mʾzy s־nt tʾy h- qṣ f h lt brʾ l- h- ns־

By {Tmn} son of Ḥddn son of Ḥddn of the lineage of Dʾf and he helped the goats give birth the year that the [disease] qṣ came and so O Lt [grant] healing to the people

**Commentary:**
The expression wʾty h- qṣ is unattested and in view of the prayer for healing it probably refers to an epidemic disease. Qṣ might represent Greek kausos which Liddell and Scott (p. 932a) identify as "causus i.e. bilious remittent fever (the endemic fever of the Levant)." However this is not entirely satisfactory for kausos is a true Greek word (from kaiœ "to burn") and it seems unlikely that an endemic fever would be called by a Greek name in a Safaitic inscription.

Al-ʾĪsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Commentary:
This is the translation suggested by MCAM in 'References to Sṣ in the Safaitic inscriptions' (in J. M. Dentzer: Sṣ). For ʾšlf see NA Dict. Ml cf K 196 ṭ bʾlsʾmn mw ʾrd ʾṣʾr. This suggests that the verb mwʾ has something to do with 'watering' or 'fertilizing'. In Classical Arabic the word āšāʾm is used of minor deities not just of their images (see MCAM’s Polytheism and Monotheism) See Milik in Hawran II on introduction of deities to Siʾ.

Al-Ṭsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Ṭsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l s¹d’l bn ġs’m bn s¹d’l bn ḥls bn ‘bd bn ‘d’l bn [ ] s²rk w wgł s¹fr ‘m -h f ng’ w dt’ rd f h lt s¹l(m) (s¹) t (k)’(r)

By S¹d’l son of Ġs’m son of S¹d’l son of Ḥls son of ‘bd son of ‘d’l son of S²rk and he found the inscription of his grandfather and was sad. And he spent the season of the later rains in [this] valley and so O Lt {{grant security} {the year of} ----

Commentary:
The author first wrote a n after ‘D thinking the D was a b of bn and then scratched over it. His hand seems to have slipped when carving the following s² and he scratched over it and recarved it. He also omitted the ‘ of dt’ and so coverted the h- of h- ‘rd thus losing the h-.

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʿNamārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Provenance:
Al-ʾIsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

I ḫmd bn ṭbr bn ḥld (b)[n] bhl bn s²ḥr bn qms²ṭ

By Ḥmd son of Ṭbr son of Ḥld (son of) Bhl son of S²ḥr son of Qms²ṭ

Apparatus Criticus:
LP 493: bn for (b)[n]

Commentary:
Area H. The first 3 names are written in the 90° script. The sign(s) immediately after ḥld is on the cusp between the 90° and normal parts of the text and is obscured by later hammering. It appears to have been written as a 90° b and the following n omitted though it could be interpreted as a normal b with the n joined to the upper stroke. The ḥ and r of s²ḥr are incised and the m s² and one stroke of the t of qms²ṭ are scratched as is the “circle” of the q.

Provenance:

Is.Mu 4 (LP 490)

I ḍhg(y) bn ḡn

By ḅ(hgy) son of ḡn

Apparatus Criticus:
LP 490: ḡl for ḡn

Commentary:
Area H. The upper part of the y is direct hammered and of a lighter patina than the rest of the text suggesting that it may have been added to n. The n of bn is a long straight line whereas the lām auctoris has a hook. The final letter must therefore be n. The same distinction is present in WH 497 where the reading ḡl should be corrected to ḡn. The text is enclosed in a lightly scratched cartouche. See also colour print Misc PH 19

Provenance:
Al-Ṭsawi, Rif Dimashq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

[Latitude/Longitude: 32.903569 / 37.320314]
Al-Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Sham as it runs northwards from the modern Al-Namarah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

\[ l \text{gmr b } '{'<<>>l b s}^2\text{mt} \]

By Gmr son of {'l} son of S^2 mt

**Commentary:**
Area H. This author was almost certainly responsible for Mu 32 as well and in both texts wrote b for bn. For other possible examples see WH 2529 2538 etc. He appears to have been unsatisfied with both texts since Mu 32 was left unfinished and Mu 33 was scratched over. He seems to have been an inexperienced carver since the shallower lines projecting from the the r and ' in Mu 32 (and possibly that across the r in Mu 33) suggest that his instrument slipped and if our interpretation is correct he repeated the ' of the patronym in Mu 33.

Apparatus Criticus:
LP 544: gl for mk; ď for `dr; [w] for {w}; h- dʾn for h-}]) dʾn; [h]ym for kym

Commentary:
Area H. There are a number of unusual letter-forms and signs of carelessness in this inscription. The fourth and fifth letters are obscured by over-hammering. The ` of dɗ is a small inverted triangle. There is a patch of hammering immediately above it and it is possible that it was originally written as w. It appears that the author originally omitted the r of `dr but later adapted the preceding d to form a monogram dr(compare the d of l-d dy). The w which follows looks as though it was originally written as “g” (?) to judge from the stroke projecting from the base of the w and those which can be made out beneath the rubbed area above it. A letter (possibly m) has been rubbed over between h and dʾn. A h has been omitted before sɗr and a w after it. The reading kym is clear but its meaning is obscure.

By Mn'î son of 'wsîl son of ḥml and he found the inscription of Mn'î and the inscription of Tm'î and the inscription of S'ṭhr who were lost and so O Lt [grant] security to him who remains and [take] revenge on him who killed and he grieved for 'sî and for wd'grl who were lost and 0 B's'mn blind whoever scratches out the inscription

Apparatus Criticus:
LP 305: (h-) dlln for [([]]) dlln; wd' w kl for wd'grl

Commentary: Area H. The author wrote a h before dlln and then scratched it over converting it from an adjective to a relative clause. In addition he at first continued writing b'ls'mn on the same face as the rest of the text but then realising that he had insufficient space scratched over the letters ls'mn and continued on the adjacent face. At the end of the text he wrote the fr of s'jfr rather carelessly and then rewrote them more carefully. Despite the fact that his copy has wd'grl LP reads wd' w kl. This caused him to mistake dilly for a plural [see his commentary and LP p. xix] whereas it is in fact a dual of the passive participle referring to the two names which precede it. Dlîn is the plural following the names of the three individuals whose inscriptions the author had found. The name wd'grl has not been found before. See also Photo Misc PH 28. w 'l- ed' gr- h dilly (M & Mu)

Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Is.Mu 88

l ʾsī b(n) ʾsī attacked by a chip when Littmann copied the text. The three letters after sʾr are damaged by another abrasion and could be respectively l/h/y; /s/h; /s/t/h/y. The third side-stroke of the {d} is lightly scratched and not joined to the stem and could be accidental making the letter a h. The author makes no distinction between b and r except in mrbʾt so it is not certain whether bmn or rmn should be read in the sʾnt clause. The abrasion after rm probably covers only one letter of which the ends protrude on either side. Other abrasions obscure part of the {y} and the whole of the {h} which follow. mrbʾt: cf. Ar. mbrʾt ‘abounding with the herbage called rahʾ [of land]’ (Lane 1020a) See also Photo Misc PH 24. wr{d} ‘l- mrbʾt (M & Mu)

Provenance:
Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Commentary:
The part of the text between 'bd-hm and w ḥṛṣ has been tampered with: letters have been joined and lines extended to give the impression of a series of m's (however compare the shape of the genuine m's in the text). In addition lines have been drawn across the tops and bottoms of the ḥ and ḫ of rṭḥ. See the tracing. The stem of the y of yhd is rather long but this is explicable by its position at the junction of two lines. Littmann did not copy the complete line and so read it has l (or h) followed by ḥ. There is small to one side of the stem which Littmann thought could be the side-stroke of a h.

Al-ʾTsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namearah dam to the Ruḥbah. The well is large, stone lined
and with stone water-channels running from it. The main concentration of published inscriptions is on the
top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the
well and on the southern headland, on the crest of which is a stone tower.

Al-Ṭāsawi, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-Ṭāsawi is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-'Isāwī, Rif Dimashq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al-'Isāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʾIsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Provenance:
Al-ʿĪsāwī, Rif Dimaṣq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-İşâwî is the name of a probably ancient well between two headlands on the eastern side of the Wâdî Shâm as it runs northwards from the modern Al-Nameârah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʾĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʾĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shams as it runs northwards from the modern Al-Namarah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-’Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿIsāwī, Rif Dimashq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-İsawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Sham as it runs northwards from the modern Al-Namarah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʾIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-ʾNamārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-ʿĪsāwī, Rif Dimašq, Syria
[Latitude/Longitude: 32.903569 / 37.320314]
Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

Al-'Īsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]
Al-İsâwî is the name of a probably ancient well between two headlands on the eastern side of the Wâdî Shâm as it runs northwards from the modern Al-Namârah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the
well and on the southern headland, on the crest of which is a stone tower.

al-ʿĪsāwī, Rif Dimašq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

[Latitude/Longitude: 32.903569 / 37.320314]

Al-'Isawi is the name of a probably ancient well between two headlands on the eastern side of the Wadi Shâm as it runs northwards from the modern Al-Namârah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

al-ʿĪsāwī, Rif Dimašq, Syria  
[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿĪsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruḥbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

lʾsʾlm bn {{ğ}}{{l}}{{l}}t h- bkrt
By ʾsʾlm son of (Ğlt) is the young she-camel

Commentary:
Associated drawing to be registered The original text was chiselled but direct-hammered additions have been made to the letters of both names. The forks of the ʾ of the first name have been joined as have the arms of the m. The first letter of the patronym appears to have been a ġ to which side-strokes have been added to make it look like a ġ. Direct-hammered dots have been added to the middle of the stem of the second letter and to the bottom of the third.

Provenance:

al-ʿIsāwī, Rif Dimašq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al-ʿIsāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Rubbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

l ḥgrʾ bn ṣʾr bn kn

By ḥgrʾ son of ṣʾr son of Kn

Commentary:
The author left a space between the second name and the second bn because at this point there is fold in the rock face which would have been awkward to inscribe.

Provenance:
